

# ICSE Previous Year Practice 2018 (2018)

Subject: General | Topic: C Programming

1. Which option is a correct use case for structs in C Programming? (variation 103)
2. When working with C Programming, why would a developer use arrays? (variation 71)
3. Which statement best describes the stack in C Programming? (variation 85)
4. When working with C Programming, why would a developer use arrays? (variation 101)
5. Which statement best describes pointers in C Programming? (variation 350)
6. Which statement best describes the stack in C Programming?
7. What is the most accurate beginner-level explanation of pass by pointer? (variation 107)
8. What is the most accurate beginner-level explanation of pass by pointer? (variation 357)
9. What is the most accurate beginner-level explanation of malloc? (variation 92)
10. Which statement best describes the stack in C Programming? (variation 95)
11. When working with C Programming, why would a developer use null terminator? (variation 86)
12. A student says 'header files' is not relevant to real projects. What is the best correction? (variation 104)
13. When working with C Programming, why would a developer use null terminator? (variation 356)
14. Which option is a correct use case for preprocessor macros in C Programming? (variation 98)
15. What is the most accurate beginner-level explanation of pass by pointer? (variation 97)
16. Which option is a correct use case for structs in C Programming?
17. A student says 'header files' is not relevant to real projects. What is the best correction? (variation 74)

18. A student says 'segmentation faults' is not relevant to real projects. What is the best correction? (variation 79)
19. When working with C Programming, why would a developer use null terminator?
20. What is the most accurate beginner-level explanation of pass by pointer? (variation 87)
21. Which statement best describes the stack in C Programming? (variation 75)
22. What is the most accurate beginner-level explanation of pass by pointer?
23. What is the most accurate beginner-level explanation of malloc? (variation 72)
24. Which option is a correct use case for structs in C Programming? (variation 83)
25. Which option is a correct use case for structs in C Programming? (variation 93)
26. A student says 'segmentation faults' is not relevant to real projects. What is the best correction?
27. When working with C Programming, why would a developer use arrays? (variation 81)
28. Which option is a correct use case for preprocessor macros in C Programming? (variation 358)
29. A student says 'segmentation faults' is not relevant to real projects. What is the best correction? (variation 109)
30. A student says 'segmentation faults' is not relevant to real projects. What is the best correction? (variation 359)
31. Which statement best describes pointers in C Programming?
32. A student says 'header files' is not relevant to real projects. What is the best correction?
33. Which statement best describes pointers in C Programming? (variation 80)
34. Which statement best describes the stack in C Programming? (variation 355)
35. A student says 'header files' is not relevant to real projects. What is the best correction? (variation 84)
36. What is the most accurate beginner-level explanation of malloc? (variation 82)

37. When working with C Programming, why would a developer use arrays? (variation 91)
38. When working with C Programming, why would a developer use arrays? (variation 351)
39. A student says 'segmentation faults' is not relevant to real projects. What is the best correction? (variation 99)
40. Which option is a correct use case for structs in C Programming? (variation 353)
41. What is the most accurate beginner-level explanation of malloc? (variation 352)
42. Which option is a correct use case for preprocessor macros in C Programming?
43. A student says 'segmentation faults' is not relevant to real projects. What is the best correction? (variation 89)
44. When working with C Programming, why would a developer use null terminator? (variation 76)
45. Which option is a correct use case for preprocessor macros in C Programming? (variation 88)
46. When working with C Programming, why would a developer use null terminator? (variation 106)
47. What is the most accurate beginner-level explanation of malloc? (variation 102)
48. Which option is a correct use case for preprocessor macros in C Programming? (variation 108)
49. A student says 'header files' is not relevant to real projects. What is the best correction? (variation 94)
50. When working with C Programming, why would a developer use null terminator? (variation 96)
51. When working with C Programming, why would a developer use arrays?
52. Which statement best describes pointers in C Programming? (variation 90)
53. What is the most accurate beginner-level explanation of pass by pointer? (variation 77)
54. Which option is a correct use case for preprocessor macros in C Programming? (variation 78)
55. Which option is a correct use case for structs in C Programming? (variation 73)

56. Which statement best describes the stack in C Programming? (variation 105)

57. What is the most accurate beginner-level explanation of malloc?

58. Which statement best describes pointers in C Programming? (variation 70)

59. Which statement best describes pointers in C Programming? (variation 100)

60. A student says 'header files' is not relevant to real projects. What is the best correction? (variation 354)
