

ICSE Previous Year Practice 2019 (2019)

Subject: General | Topic: C Programming

1. A student says 'header files' is not relevant to real projects. What is the best correction? (variation 104)
2. Which statement best describes the stack in C Programming? (variation 355)
3. What is the most accurate beginner-level explanation of malloc? (variation 102)
4. A student says 'header files' is not relevant to real projects. What is the best correction? (variation 354)
5. Which option is a correct use case for preprocessor macros in C Programming? (variation 108)
6. What is the most accurate beginner-level explanation of pass by pointer?
7. Which option is a correct use case for preprocessor macros in C Programming? (variation 88)
8. A student says 'header files' is not relevant to real projects. What is the best correction?
9. A student says 'segmentation faults' is not relevant to real projects. What is the best correction? (variation 99)
10. When working with C Programming, why would a developer use null terminator? (variation 76)
11. Which statement best describes pointers in C Programming? (variation 70)
12. What is the most accurate beginner-level explanation of pass by pointer? (variation 97)
13. A student says 'header files' is not relevant to real projects. What is the best correction? (variation 84)
14. What is the most accurate beginner-level explanation of malloc?
15. Which option is a correct use case for structs in C Programming? (variation 93)
16. A student says 'segmentation faults' is not relevant to real projects. What is the best correction?
17. Which statement best describes the stack in C Programming? (variation 95)

18. When working with C Programming, why would a developer use arrays? (variation 101)
19. Which option is a correct use case for preprocessor macros in C Programming? (variation 98)
20. What is the most accurate beginner-level explanation of pass by pointer? (variation 87)
21. Which option is a correct use case for preprocessor macros in C Programming? (variation 358)
22. A student says 'segmentation faults' is not relevant to real projects. What is the best correction? (variation 79)
23. When working with C Programming, why would a developer use arrays? (variation 351)
24. Which statement best describes pointers in C Programming?
25. Which statement best describes the stack in C Programming? (variation 105)
26. Which option is a correct use case for structs in C Programming? (variation 83)
27. Which statement best describes the stack in C Programming? (variation 75)
28. When working with C Programming, why would a developer use null terminator? (variation 356)
29. Which statement best describes the stack in C Programming? (variation 85)
30. Which option is a correct use case for preprocessor macros in C Programming? (variation 78)
31. Which statement best describes the stack in C Programming?
32. Which option is a correct use case for preprocessor macros in C Programming?
33. When working with C Programming, why would a developer use null terminator? (variation 96)
34. Which statement best describes pointers in C Programming? (variation 80)
35. When working with C Programming, why would a developer use arrays?
36. What is the most accurate beginner-level explanation of malloc? (variation 82)

37. Which option is a correct use case for structs in C Programming? (variation 353)
38. When working with C Programming, why would a developer use null terminator? (variation 86)
39. A student says 'segmentation faults' is not relevant to real projects. What is the best correction? (variation 109)
40. A student says 'header files' is not relevant to real projects. What is the best correction? (variation 94)
41. What is the most accurate beginner-level explanation of pass by pointer? (variation 77)
42. What is the most accurate beginner-level explanation of malloc? (variation 92)
43. When working with C Programming, why would a developer use null terminator? (variation 106)
44. What is the most accurate beginner-level explanation of pass by pointer? (variation 357)
45. Which statement best describes pointers in C Programming? (variation 100)
46. Which option is a correct use case for structs in C Programming?
47. When working with C Programming, why would a developer use null terminator?
48. What is the most accurate beginner-level explanation of malloc? (variation 72)
49. Which statement best describes pointers in C Programming? (variation 350)
50. What is the most accurate beginner-level explanation of pass by pointer? (variation 107)
51. When working with C Programming, why would a developer use arrays? (variation 81)
52. Which option is a correct use case for structs in C Programming? (variation 103)
53. When working with C Programming, why would a developer use arrays? (variation 71)
54. Which option is a correct use case for structs in C Programming? (variation 73)
55. Which statement best describes pointers in C Programming? (variation 90)

56. A student says 'segmentation faults' is not relevant to real projects. What is the best correction? (variation 89)

57. What is the most accurate beginner-level explanation of malloc? (variation 352)

58. A student says 'segmentation faults' is not relevant to real projects. What is the best correction? (variation 359)

59. When working with C Programming, why would a developer use arrays? (variation 91)

60. A student says 'header files' is not relevant to real projects. What is the best correction? (variation 74)
