

ICSE Previous Year Practice 2020 (2020)

Subject: General | Topic: C Programming

1. A student says 'segmentation faults' is not relevant to real projects. What is the best correction? (variation 109)
2. What is the most accurate beginner-level explanation of malloc? (variation 82)
3. Which option is a correct use case for structs in C Programming? (variation 353)
4. A student says 'segmentation faults' is not relevant to real projects. What is the best correction? (variation 99)
5. A student says 'segmentation faults' is not relevant to real projects. What is the best correction? (variation 79)
6. Which option is a correct use case for structs in C Programming? (variation 103)
7. What is the most accurate beginner-level explanation of pass by pointer? (variation 357)
8. What is the most accurate beginner-level explanation of malloc? (variation 72)
9. What is the most accurate beginner-level explanation of pass by pointer? (variation 97)
10. When working with C Programming, why would a developer use arrays?
11. A student says 'header files' is not relevant to real projects. What is the best correction? (variation 104)
12. When working with C Programming, why would a developer use null terminator? (variation 96)
13. When working with C Programming, why would a developer use arrays? (variation 351)
14. When working with C Programming, why would a developer use null terminator? (variation 106)
15. What is the most accurate beginner-level explanation of malloc? (variation 92)
16. Which option is a correct use case for preprocessor macros in C Programming? (variation 108)
17. A student says 'segmentation faults' is not relevant to real projects. What is the best correction?

18. A student says 'header files' is not relevant to real projects. What is the best correction? (variation 94)
19. Which option is a correct use case for preprocessor macros in C Programming? (variation 98)
20. When working with C Programming, why would a developer use null terminator? (variation 356)
21. What is the most accurate beginner-level explanation of pass by pointer?
22. Which statement best describes the stack in C Programming? (variation 75)
23. What is the most accurate beginner-level explanation of pass by pointer? (variation 77)
24. A student says 'header files' is not relevant to real projects. What is the best correction? (variation 74)
25. Which statement best describes pointers in C Programming? (variation 90)
26. A student says 'header files' is not relevant to real projects. What is the best correction? (variation 354)
27. Which statement best describes pointers in C Programming? (variation 100)
28. What is the most accurate beginner-level explanation of malloc?
29. Which option is a correct use case for structs in C Programming?
30. Which statement best describes the stack in C Programming?
31. When working with C Programming, why would a developer use arrays? (variation 91)
32. A student says 'header files' is not relevant to real projects. What is the best correction? (variation 84)
33. Which statement best describes the stack in C Programming? (variation 355)
34. Which option is a correct use case for structs in C Programming? (variation 73)
35. Which option is a correct use case for preprocessor macros in C Programming? (variation 78)
36. Which option is a correct use case for preprocessor macros in C Programming? (variation 88)

37. What is the most accurate beginner-level explanation of pass by pointer? (variation 107)
38. Which statement best describes pointers in C Programming? (variation 70)
39. Which option is a correct use case for structs in C Programming? (variation 83)
40. What is the most accurate beginner-level explanation of pass by pointer? (variation 87)
41. When working with C Programming, why would a developer use arrays? (variation 81)
42. A student says 'segmentation faults' is not relevant to real projects. What is the best correction? (variation 359)
43. What is the most accurate beginner-level explanation of malloc? (variation 352)
44. When working with C Programming, why would a developer use null terminator?
45. Which statement best describes pointers in C Programming?
46. Which option is a correct use case for preprocessor macros in C Programming?
47. When working with C Programming, why would a developer use arrays? (variation 101)
48. When working with C Programming, why would a developer use null terminator? (variation 76)
49. Which statement best describes pointers in C Programming? (variation 80)
50. When working with C Programming, why would a developer use arrays? (variation 71)
51. Which statement best describes the stack in C Programming? (variation 95)
52. When working with C Programming, why would a developer use null terminator? (variation 86)
53. Which statement best describes the stack in C Programming? (variation 105)
54. What is the most accurate beginner-level explanation of malloc? (variation 102)
55. A student says 'segmentation faults' is not relevant to real projects. What is the best correction? (variation 89)

56. A student says 'header files' is not relevant to real projects. What is the best correction?
57. Which statement best describes the stack in C Programming? (variation 85)
58. Which statement best describes pointers in C Programming? (variation 350)
59. Which option is a correct use case for structs in C Programming? (variation 93)
60. Which option is a correct use case for preprocessor macros in C Programming? (variation 358)
