

ICSE Previous Year Practice 2021 (2021)

Subject: General | Topic: C Programming

1. A student says 'segmentation faults' is not relevant to real projects. What is the best correction? (variation 359)
2. A student says 'header files' is not relevant to real projects. What is the best correction?
3. What is the most accurate beginner-level explanation of malloc? (variation 352)
4. A student says 'header files' is not relevant to real projects. What is the best correction? (variation 94)
5. Which option is a correct use case for structs in C Programming?
6. What is the most accurate beginner-level explanation of malloc? (variation 82)
7. When working with C Programming, why would a developer use arrays? (variation 71)
8. Which option is a correct use case for structs in C Programming? (variation 353)
9. What is the most accurate beginner-level explanation of malloc? (variation 72)
10. Which statement best describes the stack in C Programming? (variation 75)
11. Which statement best describes the stack in C Programming? (variation 355)
12. When working with C Programming, why would a developer use arrays? (variation 91)
13. What is the most accurate beginner-level explanation of pass by pointer? (variation 107)
14. A student says 'segmentation faults' is not relevant to real projects. What is the best correction? (variation 99)
15. When working with C Programming, why would a developer use arrays? (variation 81)
16. When working with C Programming, why would a developer use null terminator? (variation 106)
17. Which option is a correct use case for preprocessor macros in C Programming? (variation 108)

18. Which statement best describes pointers in C Programming?
19. What is the most accurate beginner-level explanation of pass by pointer? (variation 97)
20. Which statement best describes the stack in C Programming?
21. A student says 'segmentation faults' is not relevant to real projects. What is the best correction?
22. When working with C Programming, why would a developer use null terminator? (variation 76)
23. What is the most accurate beginner-level explanation of malloc?
24. What is the most accurate beginner-level explanation of pass by pointer?
25. A student says 'header files' is not relevant to real projects. What is the best correction? (variation 104)
26. Which statement best describes pointers in C Programming? (variation 80)
27. Which option is a correct use case for structs in C Programming? (variation 83)
28. A student says 'header files' is not relevant to real projects. What is the best correction? (variation 354)
29. A student says 'header files' is not relevant to real projects. What is the best correction? (variation 84)
30. Which option is a correct use case for structs in C Programming? (variation 73)
31. Which option is a correct use case for preprocessor macros in C Programming? (variation 78)
32. Which option is a correct use case for structs in C Programming? (variation 103)
33. A student says 'header files' is not relevant to real projects. What is the best correction? (variation 74)
34. Which statement best describes pointers in C Programming? (variation 70)
35. When working with C Programming, why would a developer use arrays? (variation 351)
36. Which option is a correct use case for preprocessor macros in C Programming? (variation 358)

37. A student says 'segmentation faults' is not relevant to real projects. What is the best correction? (variation 79)
38. Which statement best describes pointers in C Programming? (variation 90)
39. Which statement best describes pointers in C Programming? (variation 350)
40. What is the most accurate beginner-level explanation of pass by pointer? (variation 87)
41. What is the most accurate beginner-level explanation of pass by pointer? (variation 357)
42. Which option is a correct use case for structs in C Programming? (variation 93)
43. What is the most accurate beginner-level explanation of malloc? (variation 92)
44. When working with C Programming, why would a developer use null terminator? (variation 96)
45. When working with C Programming, why would a developer use null terminator? (variation 356)
46. Which statement best describes the stack in C Programming? (variation 95)
47. Which statement best describes pointers in C Programming? (variation 100)
48. A student says 'segmentation faults' is not relevant to real projects. What is the best correction? (variation 89)
49. Which statement best describes the stack in C Programming? (variation 105)
50. When working with C Programming, why would a developer use null terminator? (variation 86)
51. Which option is a correct use case for preprocessor macros in C Programming? (variation 88)
52. A student says 'segmentation faults' is not relevant to real projects. What is the best correction? (variation 109)
53. What is the most accurate beginner-level explanation of malloc? (variation 102)
54. When working with C Programming, why would a developer use null terminator?
55. When working with C Programming, why would a developer use arrays? (variation 101)

56. When working with C Programming, why would a developer use arrays?
57. Which option is a correct use case for preprocessor macros in C Programming?
58. What is the most accurate beginner-level explanation of pass by pointer? (variation 77)
59. Which statement best describes the stack in C Programming? (variation 85)
60. Which option is a correct use case for preprocessor macros in C Programming? (variation 98)
