

ICSE Previous Year Practice 2022 (2022)

Subject: General | Topic: C Programming

1. Which option is a correct use case for preprocessor macros in C Programming? (variation 88)
2. When working with C Programming, why would a developer use null terminator? (variation 96)
3. Which option is a correct use case for preprocessor macros in C Programming? (variation 98)
4. Which statement best describes the stack in C Programming? (variation 355)
5. Which statement best describes pointers in C Programming? (variation 90)
6. When working with C Programming, why would a developer use arrays?
7. When working with C Programming, why would a developer use arrays? (variation 91)
8. A student says 'header files' is not relevant to real projects. What is the best correction?
9. A student says 'header files' is not relevant to real projects. What is the best correction? (variation 84)
10. Which statement best describes the stack in C Programming? (variation 95)
11. A student says 'segmentation faults' is not relevant to real projects. What is the best correction? (variation 79)
12. Which option is a correct use case for preprocessor macros in C Programming? (variation 108)
13. Which option is a correct use case for structs in C Programming? (variation 353)
14. A student says 'segmentation faults' is not relevant to real projects. What is the best correction? (variation 89)
15. When working with C Programming, why would a developer use null terminator? (variation 106)
16. Which statement best describes pointers in C Programming? (variation 70)
17. What is the most accurate beginner-level explanation of malloc? (variation 82)

18. Which statement best describes pointers in C Programming? (variation 80)
19. When working with C Programming, why would a developer use null terminator? (variation 86)
20. What is the most accurate beginner-level explanation of pass by pointer? (variation 77)
21. What is the most accurate beginner-level explanation of malloc? (variation 72)
22. A student says 'header files' is not relevant to real projects. What is the best correction? (variation 354)
23. When working with C Programming, why would a developer use arrays? (variation 101)
24. Which statement best describes pointers in C Programming? (variation 100)
25. A student says 'segmentation faults' is not relevant to real projects. What is the best correction? (variation 109)
26. Which statement best describes pointers in C Programming? (variation 350)
27. Which statement best describes the stack in C Programming? (variation 85)
28. A student says 'header files' is not relevant to real projects. What is the best correction? (variation 104)
29. Which statement best describes the stack in C Programming?
30. When working with C Programming, why would a developer use arrays? (variation 81)
31. Which statement best describes the stack in C Programming? (variation 105)
32. A student says 'header files' is not relevant to real projects. What is the best correction? (variation 74)
33. Which option is a correct use case for structs in C Programming? (variation 93)
34. Which option is a correct use case for structs in C Programming? (variation 83)
35. What is the most accurate beginner-level explanation of malloc? (variation 352)
36. A student says 'segmentation faults' is not relevant to real projects. What is the best correction? (variation 99)

37. What is the most accurate beginner-level explanation of pass by pointer? (variation 107)
38. Which option is a correct use case for structs in C Programming?
39. When working with C Programming, why would a developer use null terminator?
40. What is the most accurate beginner-level explanation of pass by pointer? (variation 87)
41. A student says 'segmentation faults' is not relevant to real projects. What is the best correction? (variation 359)
42. When working with C Programming, why would a developer use null terminator? (variation 356)
43. What is the most accurate beginner-level explanation of pass by pointer? (variation 357)
44. When working with C Programming, why would a developer use arrays? (variation 71)
45. Which statement best describes the stack in C Programming? (variation 75)
46. Which option is a correct use case for structs in C Programming? (variation 73)
47. What is the most accurate beginner-level explanation of malloc? (variation 92)
48. What is the most accurate beginner-level explanation of pass by pointer?
49. When working with C Programming, why would a developer use null terminator? (variation 76)
50. Which statement best describes pointers in C Programming?
51. Which option is a correct use case for preprocessor macros in C Programming? (variation 78)
52. A student says 'segmentation faults' is not relevant to real projects. What is the best correction?
53. Which option is a correct use case for structs in C Programming? (variation 103)
54. Which option is a correct use case for preprocessor macros in C Programming? (variation 358)
55. What is the most accurate beginner-level explanation of malloc?

56. Which option is a correct use case for preprocessor macros in C Programming?
57. What is the most accurate beginner-level explanation of malloc? (variation 102)
58. What is the most accurate beginner-level explanation of pass by pointer? (variation 97)
59. When working with C Programming, why would a developer use arrays? (variation 351)
60. A student says 'header files' is not relevant to real projects. What is the best correction? (variation 94)
