

ICSE Previous Year Practice 2024 (2024)

Subject: General | Topic: C Programming

1. A student says 'segmentation faults' is not relevant to real projects. What is the best correction? (variation 99)
2. What is the most accurate beginner-level explanation of malloc? (variation 82)
3. Which statement best describes pointers in C Programming? (variation 80)
4. When working with C Programming, why would a developer use null terminator? (variation 106)
5. A student says 'segmentation faults' is not relevant to real projects. What is the best correction?
6. Which statement best describes the stack in C Programming? (variation 355)
7. When working with C Programming, why would a developer use arrays? (variation 81)
8. What is the most accurate beginner-level explanation of pass by pointer? (variation 107)
9. Which option is a correct use case for structs in C Programming? (variation 353)
10. Which statement best describes the stack in C Programming?
11. When working with C Programming, why would a developer use null terminator?
12. Which option is a correct use case for structs in C Programming?
13. When working with C Programming, why would a developer use null terminator? (variation 76)
14. What is the most accurate beginner-level explanation of malloc?
15. Which option is a correct use case for preprocessor macros in C Programming? (variation 78)
16. Which statement best describes pointers in C Programming? (variation 100)
17. A student says 'header files' is not relevant to real projects. What is the best correction? (variation 74)

18. A student says 'segmentation faults' is not relevant to real projects. What is the best correction? (variation 79)
19. What is the most accurate beginner-level explanation of malloc? (variation 352)
20. Which option is a correct use case for preprocessor macros in C Programming? (variation 98)
21. What is the most accurate beginner-level explanation of pass by pointer? (variation 77)
22. Which statement best describes the stack in C Programming? (variation 75)
23. A student says 'header files' is not relevant to real projects. What is the best correction? (variation 354)
24. What is the most accurate beginner-level explanation of pass by pointer?
25. Which option is a correct use case for structs in C Programming? (variation 103)
26. A student says 'segmentation faults' is not relevant to real projects. What is the best correction? (variation 89)
27. What is the most accurate beginner-level explanation of pass by pointer? (variation 97)
28. When working with C Programming, why would a developer use null terminator? (variation 96)
29. What is the most accurate beginner-level explanation of pass by pointer? (variation 357)
30. When working with C Programming, why would a developer use arrays? (variation 91)
31. Which statement best describes pointers in C Programming? (variation 70)
32. What is the most accurate beginner-level explanation of malloc? (variation 72)
33. Which statement best describes the stack in C Programming? (variation 95)
34. When working with C Programming, why would a developer use arrays? (variation 351)
35. A student says 'header files' is not relevant to real projects. What is the best correction? (variation 94)
36. Which statement best describes the stack in C Programming? (variation 85)

37. What is the most accurate beginner-level explanation of malloc? (variation 92)
38. Which option is a correct use case for preprocessor macros in C Programming?
39. A student says 'segmentation faults' is not relevant to real projects. What is the best correction? (variation 359)
40. Which statement best describes pointers in C Programming?
41. A student says 'header files' is not relevant to real projects. What is the best correction? (variation 84)
42. When working with C Programming, why would a developer use arrays? (variation 101)
43. Which statement best describes the stack in C Programming? (variation 105)
44. What is the most accurate beginner-level explanation of pass by pointer? (variation 87)
45. What is the most accurate beginner-level explanation of malloc? (variation 102)
46. When working with C Programming, why would a developer use null terminator? (variation 86)
47. Which statement best describes pointers in C Programming? (variation 90)
48. Which option is a correct use case for structs in C Programming? (variation 93)
49. Which statement best describes pointers in C Programming? (variation 350)
50. When working with C Programming, why would a developer use null terminator? (variation 356)
51. When working with C Programming, why would a developer use arrays? (variation 71)
52. Which option is a correct use case for structs in C Programming? (variation 73)
53. When working with C Programming, why would a developer use arrays?
54. Which option is a correct use case for structs in C Programming? (variation 83)
55. A student says 'segmentation faults' is not relevant to real projects. What is the best correction? (variation 109)

56. Which option is a correct use case for preprocessor macros in C Programming? (variation 358)

57. Which option is a correct use case for preprocessor macros in C Programming? (variation 88)

58. A student says 'header files' is not relevant to real projects. What is the best correction? (variation 104)

59. A student says 'header files' is not relevant to real projects. What is the best correction?

60. Which option is a correct use case for preprocessor macros in C Programming? (variation 108)
