

ICSE Previous Year Practice 2025 (2025)

Subject: General | Topic: C Programming

1. When working with C Programming, why would a developer use null terminator? (variation 76)
2. A student says 'segmentation faults' is not relevant to real projects. What is the best correction? (variation 79)
3. Which option is a correct use case for preprocessor macros in C Programming? (variation 88)
4. What is the most accurate beginner-level explanation of malloc? (variation 92)
5. Which statement best describes pointers in C Programming?
6. When working with C Programming, why would a developer use arrays? (variation 101)
7. Which statement best describes the stack in C Programming? (variation 105)
8. Which option is a correct use case for preprocessor macros in C Programming? (variation 98)
9. What is the most accurate beginner-level explanation of pass by pointer?
10. Which statement best describes the stack in C Programming? (variation 95)
11. A student says 'header files' is not relevant to real projects. What is the best correction? (variation 74)
12. What is the most accurate beginner-level explanation of malloc? (variation 72)
13. Which option is a correct use case for structs in C Programming? (variation 83)
14. A student says 'segmentation faults' is not relevant to real projects. What is the best correction?
15. A student says 'segmentation faults' is not relevant to real projects. What is the best correction? (variation 99)
16. When working with C Programming, why would a developer use null terminator? (variation 86)
17. Which statement best describes the stack in C Programming? (variation 75)

18. When working with C Programming, why would a developer use null terminator? (variation 96)
19. What is the most accurate beginner-level explanation of pass by pointer? (variation 97)
20. Which option is a correct use case for preprocessor macros in C Programming? (variation 78)
21. A student says 'segmentation faults' is not relevant to real projects. What is the best correction? (variation 359)
22. A student says 'segmentation faults' is not relevant to real projects. What is the best correction? (variation 109)
23. Which option is a correct use case for structs in C Programming? (variation 93)
24. Which statement best describes pointers in C Programming? (variation 70)
25. Which option is a correct use case for preprocessor macros in C Programming? (variation 108)
26. Which statement best describes pointers in C Programming? (variation 80)
27. Which option is a correct use case for structs in C Programming? (variation 103)
28. What is the most accurate beginner-level explanation of malloc?
29. What is the most accurate beginner-level explanation of malloc? (variation 102)
30. Which statement best describes pointers in C Programming? (variation 90)
31. A student says 'header files' is not relevant to real projects. What is the best correction? (variation 84)
32. When working with C Programming, why would a developer use arrays? (variation 71)
33. What is the most accurate beginner-level explanation of pass by pointer? (variation 87)
34. Which option is a correct use case for structs in C Programming? (variation 73)
35. Which statement best describes the stack in C Programming? (variation 355)
36. When working with C Programming, why would a developer use null terminator?

37. A student says 'header files' is not relevant to real projects. What is the best correction?
38. Which option is a correct use case for preprocessor macros in C Programming? (variation 358)
39. What is the most accurate beginner-level explanation of malloc? (variation 82)
40. A student says 'segmentation faults' is not relevant to real projects. What is the best correction? (variation 89)
41. When working with C Programming, why would a developer use arrays? (variation 81)
42. A student says 'header files' is not relevant to real projects. What is the best correction? (variation 354)
43. Which option is a correct use case for structs in C Programming?
44. Which statement best describes pointers in C Programming? (variation 100)
45. A student says 'header files' is not relevant to real projects. What is the best correction? (variation 94)
46. A student says 'header files' is not relevant to real projects. What is the best correction? (variation 104)
47. What is the most accurate beginner-level explanation of pass by pointer? (variation 107)
48. When working with C Programming, why would a developer use arrays? (variation 91)
49. When working with C Programming, why would a developer use null terminator? (variation 106)
50. What is the most accurate beginner-level explanation of pass by pointer? (variation 357)
51. When working with C Programming, why would a developer use arrays?
52. Which option is a correct use case for structs in C Programming? (variation 353)
53. What is the most accurate beginner-level explanation of malloc? (variation 352)
54. Which statement best describes pointers in C Programming? (variation 350)
55. Which option is a correct use case for preprocessor macros in C Programming?

56. Which statement best describes the stack in C Programming?

57. When working with C Programming, why would a developer use arrays? (variation 351)

58. When working with C Programming, why would a developer use null terminator? (variation 356)

59. Which statement best describes the stack in C Programming? (variation 85)

60. What is the most accurate beginner-level explanation of pass by pointer? (variation 77)
