

ICSE Previous Year Practice 2026 (2026)

Subject: General | Topic: C Programming

1. What is the most accurate beginner-level explanation of malloc? (variation 102)
2. What is the most accurate beginner-level explanation of pass by pointer? (variation 87)
3. When working with C Programming, why would a developer use arrays? (variation 81)
4. Which option is a correct use case for structs in C Programming? (variation 103)
5. A student says 'segmentation faults' is not relevant to real projects. What is the best correction? (variation 359)
6. A student says 'header files' is not relevant to real projects. What is the best correction? (variation 354)
7. When working with C Programming, why would a developer use null terminator? (variation 76)
8. When working with C Programming, why would a developer use null terminator? (variation 96)
9. Which option is a correct use case for preprocessor macros in C Programming?
10. Which statement best describes pointers in C Programming? (variation 80)
11. When working with C Programming, why would a developer use arrays? (variation 91)
12. When working with C Programming, why would a developer use null terminator? (variation 356)
13. What is the most accurate beginner-level explanation of malloc? (variation 82)
14. When working with C Programming, why would a developer use arrays?
15. What is the most accurate beginner-level explanation of malloc?
16. A student says 'header files' is not relevant to real projects. What is the best correction? (variation 104)
17. Which option is a correct use case for structs in C Programming? (variation 83)

18. What is the most accurate beginner-level explanation of malloc? (variation 352)
19. Which statement best describes pointers in C Programming? (variation 70)
20. A student says 'segmentation faults' is not relevant to real projects. What is the best correction? (variation 79)
21. Which statement best describes the stack in C Programming? (variation 105)
22. Which statement best describes pointers in C Programming? (variation 90)
23. Which option is a correct use case for preprocessor macros in C Programming? (variation 78)
24. Which statement best describes the stack in C Programming?
25. What is the most accurate beginner-level explanation of pass by pointer?
26. When working with C Programming, why would a developer use arrays? (variation 71)
27. A student says 'header files' is not relevant to real projects. What is the best correction? (variation 74)
28. A student says 'header files' is not relevant to real projects. What is the best correction? (variation 94)
29. Which option is a correct use case for preprocessor macros in C Programming? (variation 88)
30. Which option is a correct use case for structs in C Programming? (variation 353)
31. When working with C Programming, why would a developer use null terminator? (variation 106)
32. Which option is a correct use case for structs in C Programming? (variation 73)
33. Which option is a correct use case for preprocessor macros in C Programming? (variation 108)
34. A student says 'segmentation faults' is not relevant to real projects. What is the best correction? (variation 99)
35. Which option is a correct use case for structs in C Programming?
36. Which statement best describes pointers in C Programming? (variation 350)

37. A student says 'header files' is not relevant to real projects. What is the best correction?
38. Which statement best describes the stack in C Programming? (variation 95)
39. A student says 'segmentation faults' is not relevant to real projects. What is the best correction?
40. What is the most accurate beginner-level explanation of pass by pointer? (variation 357)
41. When working with C Programming, why would a developer use null terminator?
42. What is the most accurate beginner-level explanation of pass by pointer? (variation 97)
43. When working with C Programming, why would a developer use arrays? (variation 101)
44. Which statement best describes pointers in C Programming?
45. Which statement best describes the stack in C Programming? (variation 85)
46. Which option is a correct use case for structs in C Programming? (variation 93)
47. A student says 'segmentation faults' is not relevant to real projects. What is the best correction? (variation 89)
48. When working with C Programming, why would a developer use null terminator? (variation 86)
49. What is the most accurate beginner-level explanation of pass by pointer? (variation 107)
50. Which statement best describes the stack in C Programming? (variation 355)
51. Which statement best describes pointers in C Programming? (variation 100)
52. What is the most accurate beginner-level explanation of pass by pointer? (variation 77)
53. A student says 'segmentation faults' is not relevant to real projects. What is the best correction? (variation 109)
54. Which option is a correct use case for preprocessor macros in C Programming? (variation 98)
55. What is the most accurate beginner-level explanation of malloc? (variation 72)

56. Which option is a correct use case for preprocessor macros in C Programming? (variation 358)
57. What is the most accurate beginner-level explanation of malloc? (variation 92)
58. When working with C Programming, why would a developer use arrays? (variation 351)
59. A student says 'header files' is not relevant to real projects. What is the best correction? (variation 84)
60. Which statement best describes the stack in C Programming? (variation 75)
