

State Board Previous Year Practice 2017 (2017)

Subject: General | Topic: C Programming

1. Which statement best describes the stack in C Programming? (variation 95)
2. When working with C Programming, why would a developer use arrays? (variation 351)
3. What is the most accurate beginner-level explanation of malloc? (variation 352)
4. When working with C Programming, why would a developer use null terminator? (variation 96)
5. What is the most accurate beginner-level explanation of malloc? (variation 92)
6. Which statement best describes pointers in C Programming? (variation 90)
7. A student says 'segmentation faults' is not relevant to real projects. What is the best correction? (variation 109)
8. Which option is a correct use case for preprocessor macros in C Programming?
9. Which option is a correct use case for structs in C Programming? (variation 83)
10. When working with C Programming, why would a developer use arrays? (variation 81)
11. A student says 'segmentation faults' is not relevant to real projects. What is the best correction? (variation 359)
12. Which statement best describes pointers in C Programming? (variation 80)
13. Which option is a correct use case for structs in C Programming? (variation 93)
14. What is the most accurate beginner-level explanation of malloc?
15. When working with C Programming, why would a developer use null terminator? (variation 86)
16. Which statement best describes pointers in C Programming?
17. Which statement best describes pointers in C Programming? (variation 350)

18. Which statement best describes the stack in C Programming? (variation 75)
19. What is the most accurate beginner-level explanation of pass by pointer? (variation 357)
20. Which option is a correct use case for preprocessor macros in C Programming? (variation 358)
21. A student says 'header files' is not relevant to real projects. What is the best correction? (variation 84)
22. What is the most accurate beginner-level explanation of pass by pointer?
23. What is the most accurate beginner-level explanation of pass by pointer? (variation 77)
24. What is the most accurate beginner-level explanation of pass by pointer? (variation 107)
25. What is the most accurate beginner-level explanation of pass by pointer? (variation 87)
26. Which option is a correct use case for structs in C Programming? (variation 353)
27. When working with C Programming, why would a developer use null terminator?
28. Which statement best describes the stack in C Programming? (variation 355)
29. A student says 'segmentation faults' is not relevant to real projects. What is the best correction? (variation 79)
30. What is the most accurate beginner-level explanation of malloc? (variation 82)
31. When working with C Programming, why would a developer use null terminator? (variation 356)
32. Which option is a correct use case for preprocessor macros in C Programming? (variation 108)
33. A student says 'header files' is not relevant to real projects. What is the best correction?
34. What is the most accurate beginner-level explanation of malloc? (variation 102)
35. Which statement best describes the stack in C Programming? (variation 85)
36. Which option is a correct use case for structs in C Programming? (variation 73)

37. A student says 'segmentation faults' is not relevant to real projects. What is the best correction? (variation 89)
38. Which statement best describes the stack in C Programming? (variation 105)
39. A student says 'header files' is not relevant to real projects. What is the best correction? (variation 104)
40. A student says 'header files' is not relevant to real projects. What is the best correction? (variation 74)
41. When working with C Programming, why would a developer use arrays? (variation 71)
42. What is the most accurate beginner-level explanation of malloc? (variation 72)
43. Which option is a correct use case for structs in C Programming? (variation 103)
44. Which statement best describes the stack in C Programming?
45. A student says 'segmentation faults' is not relevant to real projects. What is the best correction? (variation 99)
46. A student says 'header files' is not relevant to real projects. What is the best correction? (variation 354)
47. Which statement best describes pointers in C Programming? (variation 70)
48. What is the most accurate beginner-level explanation of pass by pointer? (variation 97)
49. When working with C Programming, why would a developer use arrays? (variation 101)
50. Which option is a correct use case for preprocessor macros in C Programming? (variation 78)
51. When working with C Programming, why would a developer use null terminator? (variation 76)
52. Which option is a correct use case for structs in C Programming?
53. When working with C Programming, why would a developer use null terminator? (variation 106)
54. When working with C Programming, why would a developer use arrays? (variation 91)
55. When working with C Programming, why would a developer use arrays?

56. A student says 'header files' is not relevant to real projects. What is the best correction? (variation 94)

57. Which option is a correct use case for preprocessor macros in C Programming? (variation 88)

58. Which statement best describes pointers in C Programming? (variation 100)

59. A student says 'segmentation faults' is not relevant to real projects. What is the best correction?

60. Which option is a correct use case for preprocessor macros in C Programming? (variation 98)
