

State Board Previous Year Practice 2018 (2018)

Subject: General | Topic: C Programming

1. Which option is a correct use case for structs in C Programming? (variation 73)
2. Which statement best describes pointers in C Programming? (variation 90)
3. A student says 'segmentation faults' is not relevant to real projects. What is the best correction? (variation 79)
4. Which statement best describes pointers in C Programming? (variation 350)
5. When working with C Programming, why would a developer use arrays? (variation 101)
6. When working with C Programming, why would a developer use arrays? (variation 351)
7. Which statement best describes the stack in C Programming? (variation 75)
8. Which statement best describes pointers in C Programming? (variation 100)
9. What is the most accurate beginner-level explanation of malloc? (variation 72)
10. A student says 'header files' is not relevant to real projects. What is the best correction? (variation 94)
11. When working with C Programming, why would a developer use null terminator? (variation 96)
12. What is the most accurate beginner-level explanation of pass by pointer? (variation 97)
13. When working with C Programming, why would a developer use arrays? (variation 71)
14. A student says 'header files' is not relevant to real projects. What is the best correction?
15. Which statement best describes the stack in C Programming?
16. Which option is a correct use case for preprocessor macros in C Programming? (variation 88)
17. Which option is a correct use case for preprocessor macros in C Programming? (variation 98)

18. A student says 'segmentation faults' is not relevant to real projects. What is the best correction? (variation 89)
19. A student says 'segmentation faults' is not relevant to real projects. What is the best correction? (variation 99)
20. Which option is a correct use case for structs in C Programming? (variation 353)
21. When working with C Programming, why would a developer use arrays? (variation 81)
22. Which option is a correct use case for structs in C Programming? (variation 93)
23. Which statement best describes the stack in C Programming? (variation 95)
24. What is the most accurate beginner-level explanation of malloc? (variation 92)
25. When working with C Programming, why would a developer use null terminator? (variation 356)
26. A student says 'header files' is not relevant to real projects. What is the best correction? (variation 84)
27. When working with C Programming, why would a developer use null terminator? (variation 86)
28. What is the most accurate beginner-level explanation of pass by pointer? (variation 107)
29. Which statement best describes pointers in C Programming? (variation 80)
30. What is the most accurate beginner-level explanation of pass by pointer?
31. What is the most accurate beginner-level explanation of pass by pointer? (variation 357)
32. When working with C Programming, why would a developer use null terminator?
33. Which option is a correct use case for preprocessor macros in C Programming? (variation 358)
34. Which option is a correct use case for structs in C Programming? (variation 103)
35. Which statement best describes pointers in C Programming? (variation 70)
36. When working with C Programming, why would a developer use arrays? (variation 91)

37. Which option is a correct use case for preprocessor macros in C Programming?
38. Which option is a correct use case for structs in C Programming? (variation 83)
39. What is the most accurate beginner-level explanation of pass by pointer? (variation 77)
40. A student says 'header files' is not relevant to real projects. What is the best correction? (variation 74)
41. What is the most accurate beginner-level explanation of malloc?
42. When working with C Programming, why would a developer use null terminator? (variation 76)
43. What is the most accurate beginner-level explanation of malloc? (variation 352)
44. Which statement best describes the stack in C Programming? (variation 85)
45. Which statement best describes the stack in C Programming? (variation 355)
46. A student says 'segmentation faults' is not relevant to real projects. What is the best correction? (variation 109)
47. What is the most accurate beginner-level explanation of malloc? (variation 102)
48. A student says 'header files' is not relevant to real projects. What is the best correction? (variation 104)
49. Which option is a correct use case for preprocessor macros in C Programming? (variation 108)
50. When working with C Programming, why would a developer use arrays?
51. Which option is a correct use case for structs in C Programming?
52. Which option is a correct use case for preprocessor macros in C Programming? (variation 78)
53. What is the most accurate beginner-level explanation of malloc? (variation 82)
54. When working with C Programming, why would a developer use null terminator? (variation 106)
55. A student says 'segmentation faults' is not relevant to real projects. What is the best correction? (variation 359)

56. Which statement best describes the stack in C Programming? (variation 105)
57. A student says 'segmentation faults' is not relevant to real projects. What is the best correction?
58. A student says 'header files' is not relevant to real projects. What is the best correction? (variation 354)
59. What is the most accurate beginner-level explanation of pass by pointer? (variation 87)
60. Which statement best describes pointers in C Programming?
