

State Board Previous Year Practice 2020 (2020)

Subject: General | Topic: C Programming

1. A student says 'header files' is not relevant to real projects. What is the best correction? (variation 94)
2. A student says 'header files' is not relevant to real projects. What is the best correction? (variation 104)
3. What is the most accurate beginner-level explanation of pass by pointer? (variation 357)
4. What is the most accurate beginner-level explanation of malloc? (variation 92)
5. What is the most accurate beginner-level explanation of pass by pointer? (variation 107)
6. A student says 'segmentation faults' is not relevant to real projects. What is the best correction?
7. Which option is a correct use case for preprocessor macros in C Programming? (variation 108)
8. When working with C Programming, why would a developer use null terminator? (variation 96)
9. When working with C Programming, why would a developer use arrays? (variation 101)
10. Which option is a correct use case for structs in C Programming?
11. Which option is a correct use case for structs in C Programming? (variation 83)
12. A student says 'segmentation faults' is not relevant to real projects. What is the best correction? (variation 99)
13. Which statement best describes the stack in C Programming? (variation 85)
14. A student says 'header files' is not relevant to real projects. What is the best correction?
15. What is the most accurate beginner-level explanation of pass by pointer?
16. Which option is a correct use case for structs in C Programming? (variation 93)
17. When working with C Programming, why would a developer use arrays? (variation 81)

18. What is the most accurate beginner-level explanation of malloc? (variation 82)
19. Which option is a correct use case for preprocessor macros in C Programming?
20. What is the most accurate beginner-level explanation of malloc? (variation 72)
21. What is the most accurate beginner-level explanation of pass by pointer? (variation 87)
22. Which option is a correct use case for structs in C Programming? (variation 103)
23. What is the most accurate beginner-level explanation of malloc? (variation 102)
24. What is the most accurate beginner-level explanation of malloc? (variation 352)
25. Which option is a correct use case for preprocessor macros in C Programming? (variation 88)
26. A student says 'header files' is not relevant to real projects. What is the best correction? (variation 84)
27. When working with C Programming, why would a developer use null terminator? (variation 76)
28. A student says 'segmentation faults' is not relevant to real projects. What is the best correction? (variation 79)
29. What is the most accurate beginner-level explanation of pass by pointer? (variation 77)
30. When working with C Programming, why would a developer use arrays? (variation 351)
31. When working with C Programming, why would a developer use null terminator? (variation 106)
32. Which statement best describes pointers in C Programming? (variation 100)
33. A student says 'header files' is not relevant to real projects. What is the best correction? (variation 354)
34. When working with C Programming, why would a developer use arrays? (variation 91)
35. Which statement best describes pointers in C Programming? (variation 350)
36. Which statement best describes the stack in C Programming? (variation 355)

37. A student says 'segmentation faults' is not relevant to real projects. What is the best correction? (variation 109)
38. Which statement best describes the stack in C Programming? (variation 75)
39. When working with C Programming, why would a developer use null terminator?
40. When working with C Programming, why would a developer use null terminator? (variation 86)
41. Which option is a correct use case for preprocessor macros in C Programming? (variation 98)
42. A student says 'segmentation faults' is not relevant to real projects. What is the best correction? (variation 359)
43. What is the most accurate beginner-level explanation of pass by pointer? (variation 97)
44. Which statement best describes pointers in C Programming?
45. A student says 'segmentation faults' is not relevant to real projects. What is the best correction? (variation 89)
46. When working with C Programming, why would a developer use arrays?
47. Which statement best describes the stack in C Programming? (variation 95)
48. When working with C Programming, why would a developer use arrays? (variation 71)
49. Which option is a correct use case for preprocessor macros in C Programming? (variation 78)
50. Which statement best describes pointers in C Programming? (variation 80)
51. Which statement best describes pointers in C Programming? (variation 90)
52. What is the most accurate beginner-level explanation of malloc?
53. A student says 'header files' is not relevant to real projects. What is the best correction? (variation 74)
54. Which statement best describes the stack in C Programming? (variation 105)
55. Which option is a correct use case for structs in C Programming? (variation 353)

56. Which statement best describes pointers in C Programming? (variation 70)

57. When working with C Programming, why would a developer use null terminator? (variation 356)

58. Which option is a correct use case for structs in C Programming? (variation 73)

59. Which option is a correct use case for preprocessor macros in C Programming? (variation 358)

60. Which statement best describes the stack in C Programming?
