

State Board Previous Year Practice 2021 (2021)

Subject: General | Topic: C Programming

1. Which option is a correct use case for preprocessor macros in C Programming?
2. A student says 'segmentation faults' is not relevant to real projects. What is the best correction? (variation 109)
3. Which option is a correct use case for structs in C Programming? (variation 83)
4. Which statement best describes the stack in C Programming? (variation 95)
5. A student says 'segmentation faults' is not relevant to real projects. What is the best correction? (variation 359)
6. A student says 'header files' is not relevant to real projects. What is the best correction? (variation 94)
7. Which statement best describes pointers in C Programming? (variation 80)
8. When working with C Programming, why would a developer use arrays? (variation 351)
9. What is the most accurate beginner-level explanation of pass by pointer? (variation 357)
10. What is the most accurate beginner-level explanation of malloc? (variation 92)
11. Which statement best describes the stack in C Programming?
12. Which statement best describes pointers in C Programming?
13. When working with C Programming, why would a developer use arrays? (variation 81)
14. When working with C Programming, why would a developer use arrays? (variation 71)
15. What is the most accurate beginner-level explanation of pass by pointer? (variation 77)
16. Which option is a correct use case for structs in C Programming? (variation 73)
17. When working with C Programming, why would a developer use null terminator? (variation 86)

18. When working with C Programming, why would a developer use null terminator? (variation 96)
19. What is the most accurate beginner-level explanation of malloc? (variation 82)
20. What is the most accurate beginner-level explanation of pass by pointer? (variation 97)
21. Which statement best describes pointers in C Programming? (variation 350)
22. What is the most accurate beginner-level explanation of pass by pointer? (variation 87)
23. A student says 'segmentation faults' is not relevant to real projects. What is the best correction? (variation 89)
24. What is the most accurate beginner-level explanation of malloc? (variation 352)
25. Which statement best describes the stack in C Programming? (variation 105)
26. A student says 'segmentation faults' is not relevant to real projects. What is the best correction? (variation 79)
27. Which option is a correct use case for structs in C Programming? (variation 93)
28. A student says 'header files' is not relevant to real projects. What is the best correction? (variation 104)
29. When working with C Programming, why would a developer use arrays? (variation 101)
30. Which option is a correct use case for preprocessor macros in C Programming? (variation 88)
31. What is the most accurate beginner-level explanation of pass by pointer?
32. Which option is a correct use case for preprocessor macros in C Programming? (variation 78)
33. When working with C Programming, why would a developer use null terminator? (variation 356)
34. A student says 'segmentation faults' is not relevant to real projects. What is the best correction? (variation 99)
35. Which option is a correct use case for preprocessor macros in C Programming? (variation 98)
36. Which option is a correct use case for structs in C Programming?

37. When working with C Programming, why would a developer use null terminator? (variation 76)
38. A student says 'header files' is not relevant to real projects. What is the best correction? (variation 74)
39. Which statement best describes pointers in C Programming? (variation 90)
40. Which option is a correct use case for structs in C Programming? (variation 353)
41. When working with C Programming, why would a developer use null terminator? (variation 106)
42. A student says 'header files' is not relevant to real projects. What is the best correction?
43. When working with C Programming, why would a developer use null terminator?
44. Which statement best describes the stack in C Programming? (variation 75)
45. Which statement best describes the stack in C Programming? (variation 85)
46. Which option is a correct use case for structs in C Programming? (variation 103)
47. Which statement best describes the stack in C Programming? (variation 355)
48. Which statement best describes pointers in C Programming? (variation 100)
49. A student says 'header files' is not relevant to real projects. What is the best correction? (variation 354)
50. Which statement best describes pointers in C Programming? (variation 70)
51. Which option is a correct use case for preprocessor macros in C Programming? (variation 358)
52. A student says 'header files' is not relevant to real projects. What is the best correction? (variation 84)
53. What is the most accurate beginner-level explanation of malloc? (variation 72)
54. What is the most accurate beginner-level explanation of malloc? (variation 102)
55. When working with C Programming, why would a developer use arrays?

56. Which option is a correct use case for preprocessor macros in C Programming? (variation 108)

57. When working with C Programming, why would a developer use arrays? (variation 91)

58. A student says 'segmentation faults' is not relevant to real projects. What is the best correction?

59. What is the most accurate beginner-level explanation of pass by pointer? (variation 107)

60. What is the most accurate beginner-level explanation of malloc?
