

State Board Previous Year Practice 2022 (2022)

Subject: General | Topic: C Programming

1. A student says 'segmentation faults' is not relevant to real projects. What is the best correction?
2. When working with C Programming, why would a developer use null terminator? (variation 96)
3. Which statement best describes pointers in C Programming? (variation 350)
4. What is the most accurate beginner-level explanation of pass by pointer? (variation 357)
5. Which statement best describes the stack in C Programming? (variation 75)
6. Which statement best describes the stack in C Programming? (variation 95)
7. When working with C Programming, why would a developer use arrays?
8. Which option is a correct use case for structs in C Programming? (variation 73)
9. A student says 'header files' is not relevant to real projects. What is the best correction? (variation 74)
10. Which option is a correct use case for structs in C Programming? (variation 103)
11. Which option is a correct use case for structs in C Programming? (variation 353)
12. A student says 'header files' is not relevant to real projects. What is the best correction? (variation 354)
13. When working with C Programming, why would a developer use arrays? (variation 351)
14. Which statement best describes pointers in C Programming?
15. A student says 'segmentation faults' is not relevant to real projects. What is the best correction? (variation 359)
16. Which option is a correct use case for preprocessor macros in C Programming? (variation 98)
17. When working with C Programming, why would a developer use arrays? (variation 71)

18. A student says 'segmentation faults' is not relevant to real projects. What is the best correction? (variation 89)
19. When working with C Programming, why would a developer use arrays? (variation 101)
20. Which statement best describes pointers in C Programming? (variation 70)
21. Which option is a correct use case for preprocessor macros in C Programming? (variation 358)
22. What is the most accurate beginner-level explanation of pass by pointer? (variation 87)
23. When working with C Programming, why would a developer use arrays? (variation 81)
24. What is the most accurate beginner-level explanation of malloc? (variation 92)
25. Which statement best describes pointers in C Programming? (variation 80)
26. A student says 'header files' is not relevant to real projects. What is the best correction?
27. Which option is a correct use case for structs in C Programming? (variation 93)
28. What is the most accurate beginner-level explanation of pass by pointer? (variation 107)
29. Which option is a correct use case for preprocessor macros in C Programming? (variation 78)
30. When working with C Programming, why would a developer use null terminator? (variation 76)
31. A student says 'header files' is not relevant to real projects. What is the best correction? (variation 84)
32. What is the most accurate beginner-level explanation of malloc? (variation 82)
33. When working with C Programming, why would a developer use null terminator?
34. When working with C Programming, why would a developer use arrays? (variation 91)
35. Which option is a correct use case for preprocessor macros in C Programming? (variation 88)
36. A student says 'segmentation faults' is not relevant to real projects. What is the best correction? (variation 99)

37. When working with C Programming, why would a developer use null terminator? (variation 106)
38. What is the most accurate beginner-level explanation of pass by pointer?
39. Which option is a correct use case for preprocessor macros in C Programming? (variation 108)
40. What is the most accurate beginner-level explanation of pass by pointer? (variation 77)
41. Which statement best describes pointers in C Programming? (variation 100)
42. Which statement best describes the stack in C Programming? (variation 355)
43. Which option is a correct use case for structs in C Programming? (variation 83)
44. When working with C Programming, why would a developer use null terminator? (variation 86)
45. Which option is a correct use case for structs in C Programming?
46. What is the most accurate beginner-level explanation of malloc? (variation 102)
47. A student says 'segmentation faults' is not relevant to real projects. What is the best correction? (variation 79)
48. What is the most accurate beginner-level explanation of malloc? (variation 72)
49. A student says 'segmentation faults' is not relevant to real projects. What is the best correction? (variation 109)
50. What is the most accurate beginner-level explanation of malloc?
51. Which option is a correct use case for preprocessor macros in C Programming?
52. Which statement best describes the stack in C Programming?
53. What is the most accurate beginner-level explanation of malloc? (variation 352)
54. A student says 'header files' is not relevant to real projects. What is the best correction? (variation 94)
55. When working with C Programming, why would a developer use null terminator? (variation 356)

56. Which statement best describes the stack in C Programming? (variation 105)

57. Which statement best describes pointers in C Programming? (variation 90)

58. What is the most accurate beginner-level explanation of pass by pointer? (variation 97)

59. A student says 'header files' is not relevant to real projects. What is the best correction? (variation 104)

60. Which statement best describes the stack in C Programming? (variation 85)
