

State Board Previous Year Practice 2023 (2023)

Subject: General | Topic: C Programming

1. Which statement best describes pointers in C Programming? (variation 90)
2. Which statement best describes pointers in C Programming?
3. Which statement best describes the stack in C Programming? (variation 95)
4. When working with C Programming, why would a developer use null terminator? (variation 76)
5. Which option is a correct use case for preprocessor macros in C Programming? (variation 78)
6. Which option is a correct use case for structs in C Programming? (variation 73)
7. Which option is a correct use case for preprocessor macros in C Programming? (variation 98)
8. Which statement best describes pointers in C Programming? (variation 350)
9. Which option is a correct use case for preprocessor macros in C Programming? (variation 358)
10. What is the most accurate beginner-level explanation of malloc? (variation 82)
11. What is the most accurate beginner-level explanation of pass by pointer? (variation 97)
12. What is the most accurate beginner-level explanation of pass by pointer? (variation 357)
13. When working with C Programming, why would a developer use arrays? (variation 351)
14. When working with C Programming, why would a developer use arrays?
15. What is the most accurate beginner-level explanation of malloc? (variation 102)
16. Which statement best describes pointers in C Programming? (variation 70)
17. Which option is a correct use case for structs in C Programming? (variation 103)

18. A student says 'segmentation faults' is not relevant to real projects. What is the best correction?
19. What is the most accurate beginner-level explanation of pass by pointer? (variation 107)
20. Which statement best describes the stack in C Programming? (variation 105)
21. A student says 'segmentation faults' is not relevant to real projects. What is the best correction? (variation 109)
22. A student says 'header files' is not relevant to real projects. What is the best correction? (variation 94)
23. A student says 'segmentation faults' is not relevant to real projects. What is the best correction? (variation 89)
24. Which option is a correct use case for structs in C Programming? (variation 353)
25. When working with C Programming, why would a developer use arrays? (variation 71)
26. Which statement best describes pointers in C Programming? (variation 80)
27. Which option is a correct use case for preprocessor macros in C Programming? (variation 108)
28. A student says 'header files' is not relevant to real projects. What is the best correction? (variation 84)
29. What is the most accurate beginner-level explanation of malloc? (variation 352)
30. A student says 'header files' is not relevant to real projects. What is the best correction? (variation 354)
31. When working with C Programming, why would a developer use arrays? (variation 101)
32. Which statement best describes pointers in C Programming? (variation 100)
33. When working with C Programming, why would a developer use null terminator? (variation 96)
34. When working with C Programming, why would a developer use arrays? (variation 81)
35. When working with C Programming, why would a developer use null terminator? (variation 356)
36. Which option is a correct use case for structs in C Programming? (variation 83)

37. A student says 'segmentation faults' is not relevant to real projects. What is the best correction? (variation 79)
38. Which option is a correct use case for preprocessor macros in C Programming?
39. What is the most accurate beginner-level explanation of pass by pointer?
40. What is the most accurate beginner-level explanation of pass by pointer? (variation 87)
41. When working with C Programming, why would a developer use null terminator? (variation 86)
42. Which option is a correct use case for structs in C Programming? (variation 93)
43. What is the most accurate beginner-level explanation of malloc?
44. When working with C Programming, why would a developer use null terminator?
45. A student says 'segmentation faults' is not relevant to real projects. What is the best correction? (variation 359)
46. A student says 'segmentation faults' is not relevant to real projects. What is the best correction? (variation 99)
47. What is the most accurate beginner-level explanation of malloc? (variation 92)
48. Which statement best describes the stack in C Programming? (variation 355)
49. A student says 'header files' is not relevant to real projects. What is the best correction?
50. Which statement best describes the stack in C Programming? (variation 85)
51. A student says 'header files' is not relevant to real projects. What is the best correction? (variation 74)
52. Which option is a correct use case for structs in C Programming?
53. When working with C Programming, why would a developer use arrays? (variation 91)
54. What is the most accurate beginner-level explanation of malloc? (variation 72)
55. Which statement best describes the stack in C Programming? (variation 75)

56. What is the most accurate beginner-level explanation of pass by pointer? (variation 77)
57. When working with C Programming, why would a developer use null terminator? (variation 106)
58. A student says 'header files' is not relevant to real projects. What is the best correction? (variation 104)
59. Which option is a correct use case for preprocessor macros in C Programming? (variation 88)
60. Which statement best describes the stack in C Programming?
