

State Board Previous Year Practice 2024 (2024)

Subject: General | Topic: C Programming

1. What is the most accurate beginner-level explanation of pass by pointer? (variation 87)
2. A student says 'header files' is not relevant to real projects. What is the best correction? (variation 354)
3. What is the most accurate beginner-level explanation of malloc? (variation 92)
4. When working with C Programming, why would a developer use null terminator? (variation 86)
5. A student says 'segmentation faults' is not relevant to real projects. What is the best correction?
6. A student says 'header files' is not relevant to real projects. What is the best correction? (variation 74)
7. A student says 'header files' is not relevant to real projects. What is the best correction? (variation 104)
8. When working with C Programming, why would a developer use null terminator? (variation 356)
9. What is the most accurate beginner-level explanation of pass by pointer? (variation 107)
10. When working with C Programming, why would a developer use null terminator? (variation 96)
11. A student says 'segmentation faults' is not relevant to real projects. What is the best correction? (variation 109)
12. When working with C Programming, why would a developer use arrays? (variation 81)
13. A student says 'header files' is not relevant to real projects. What is the best correction? (variation 84)
14. Which statement best describes the stack in C Programming? (variation 95)
15. Which statement best describes pointers in C Programming? (variation 100)
16. What is the most accurate beginner-level explanation of pass by pointer? (variation 97)
17. A student says 'header files' is not relevant to real projects. What is the best correction?

18. Which statement best describes the stack in C Programming? (variation 105)
19. A student says 'segmentation faults' is not relevant to real projects. What is the best correction? (variation 79)
20. What is the most accurate beginner-level explanation of pass by pointer? (variation 77)
21. Which option is a correct use case for preprocessor macros in C Programming? (variation 108)
22. When working with C Programming, why would a developer use arrays?
23. Which option is a correct use case for preprocessor macros in C Programming?
24. When working with C Programming, why would a developer use arrays? (variation 101)
25. When working with C Programming, why would a developer use null terminator? (variation 76)
26. Which option is a correct use case for preprocessor macros in C Programming? (variation 358)
27. What is the most accurate beginner-level explanation of malloc? (variation 72)
28. Which option is a correct use case for preprocessor macros in C Programming? (variation 78)
29. A student says 'segmentation faults' is not relevant to real projects. What is the best correction? (variation 359)
30. Which option is a correct use case for structs in C Programming? (variation 103)
31. What is the most accurate beginner-level explanation of malloc? (variation 352)
32. What is the most accurate beginner-level explanation of pass by pointer?
33. When working with C Programming, why would a developer use arrays? (variation 71)
34. When working with C Programming, why would a developer use arrays? (variation 351)
35. Which statement best describes the stack in C Programming? (variation 85)
36. Which statement best describes the stack in C Programming?

37. A student says 'header files' is not relevant to real projects. What is the best correction? (variation 94)
38. Which statement best describes the stack in C Programming? (variation 355)
39. Which option is a correct use case for structs in C Programming? (variation 83)
40. Which statement best describes pointers in C Programming? (variation 80)
41. Which option is a correct use case for structs in C Programming? (variation 353)
42. When working with C Programming, why would a developer use arrays? (variation 91)
43. When working with C Programming, why would a developer use null terminator?
44. When working with C Programming, why would a developer use null terminator? (variation 106)
45. Which option is a correct use case for structs in C Programming? (variation 73)
46. Which option is a correct use case for preprocessor macros in C Programming? (variation 88)
47. Which option is a correct use case for structs in C Programming? (variation 93)
48. Which statement best describes pointers in C Programming? (variation 90)
49. Which statement best describes the stack in C Programming? (variation 75)
50. Which option is a correct use case for structs in C Programming?
51. What is the most accurate beginner-level explanation of malloc?
52. A student says 'segmentation faults' is not relevant to real projects. What is the best correction? (variation 99)
53. Which statement best describes pointers in C Programming? (variation 350)
54. A student says 'segmentation faults' is not relevant to real projects. What is the best correction? (variation 89)
55. What is the most accurate beginner-level explanation of malloc? (variation 102)

56. Which statement best describes pointers in C Programming? (variation 70)

57. What is the most accurate beginner-level explanation of malloc? (variation 82)

58. What is the most accurate beginner-level explanation of pass by pointer? (variation 357)

59. Which statement best describes pointers in C Programming?

60. Which option is a correct use case for preprocessor macros in C Programming? (variation 98)
