

State Board Previous Year Practice 2025 (2025)

Subject: General | Topic: C Programming

1. Which statement best describes pointers in C Programming? (variation 70)
2. A student says 'segmentation faults' is not relevant to real projects. What is the best correction? (variation 359)
3. A student says 'segmentation faults' is not relevant to real projects. What is the best correction? (variation 89)
4. Which statement best describes pointers in C Programming? (variation 350)
5. When working with C Programming, why would a developer use arrays?
6. Which statement best describes the stack in C Programming? (variation 95)
7. A student says 'header files' is not relevant to real projects. What is the best correction? (variation 74)
8. When working with C Programming, why would a developer use arrays? (variation 91)
9. A student says 'header files' is not relevant to real projects. What is the best correction? (variation 354)
10. A student says 'header files' is not relevant to real projects. What is the best correction?
11. A student says 'segmentation faults' is not relevant to real projects. What is the best correction? (variation 99)
12. When working with C Programming, why would a developer use null terminator?
13. Which option is a correct use case for preprocessor macros in C Programming?
14. What is the most accurate beginner-level explanation of malloc? (variation 72)
15. When working with C Programming, why would a developer use arrays? (variation 81)
16. What is the most accurate beginner-level explanation of pass by pointer? (variation 107)
17. Which statement best describes the stack in C Programming? (variation 85)

18. Which option is a correct use case for preprocessor macros in C Programming? (variation 108)
19. When working with C Programming, why would a developer use arrays? (variation 101)
20. Which statement best describes pointers in C Programming? (variation 90)
21. When working with C Programming, why would a developer use null terminator? (variation 86)
22. Which option is a correct use case for preprocessor macros in C Programming? (variation 88)
23. What is the most accurate beginner-level explanation of pass by pointer?
24. What is the most accurate beginner-level explanation of pass by pointer? (variation 77)
25. What is the most accurate beginner-level explanation of pass by pointer? (variation 97)
26. A student says 'header files' is not relevant to real projects. What is the best correction? (variation 84)
27. When working with C Programming, why would a developer use arrays? (variation 71)
28. A student says 'header files' is not relevant to real projects. What is the best correction? (variation 94)
29. A student says 'segmentation faults' is not relevant to real projects. What is the best correction?
30. What is the most accurate beginner-level explanation of pass by pointer? (variation 357)
31. When working with C Programming, why would a developer use null terminator? (variation 76)
32. Which statement best describes the stack in C Programming? (variation 105)
33. A student says 'segmentation faults' is not relevant to real projects. What is the best correction? (variation 109)
34. Which option is a correct use case for structs in C Programming?
35. What is the most accurate beginner-level explanation of malloc? (variation 102)
36. Which option is a correct use case for structs in C Programming? (variation 103)

37. When working with C Programming, why would a developer use arrays? (variation 351)
38. Which option is a correct use case for preprocessor macros in C Programming? (variation 358)
39. Which option is a correct use case for preprocessor macros in C Programming? (variation 78)
40. What is the most accurate beginner-level explanation of pass by pointer? (variation 87)
41. Which statement best describes pointers in C Programming? (variation 100)
42. Which option is a correct use case for structs in C Programming? (variation 73)
43. What is the most accurate beginner-level explanation of malloc? (variation 82)
44. What is the most accurate beginner-level explanation of malloc? (variation 92)
45. When working with C Programming, why would a developer use null terminator? (variation 356)
46. Which statement best describes the stack in C Programming?
47. A student says 'header files' is not relevant to real projects. What is the best correction? (variation 104)
48. Which option is a correct use case for structs in C Programming? (variation 83)
49. Which option is a correct use case for structs in C Programming? (variation 353)
50. Which statement best describes pointers in C Programming?
51. Which statement best describes pointers in C Programming? (variation 80)
52. Which statement best describes the stack in C Programming? (variation 355)
53. When working with C Programming, why would a developer use null terminator? (variation 106)
54. What is the most accurate beginner-level explanation of malloc? (variation 352)
55. Which option is a correct use case for preprocessor macros in C Programming? (variation 98)

56. When working with C Programming, why would a developer use null terminator? (variation 96)

57. Which option is a correct use case for structs in C Programming? (variation 93)

58. What is the most accurate beginner-level explanation of malloc?

59. Which statement best describes the stack in C Programming? (variation 75)

60. A student says 'segmentation faults' is not relevant to real projects. What is the best correction? (variation 79)
