

State Board Previous Year Practice 2026 (2026)

Subject: General | Topic: C Programming

1. What is the most accurate beginner-level explanation of pass by pointer? (variation 97)
2. A student says 'segmentation faults' is not relevant to real projects. What is the best correction? (variation 99)
3. Which statement best describes pointers in C Programming? (variation 350)
4. Which statement best describes the stack in C Programming? (variation 105)
5. A student says 'segmentation faults' is not relevant to real projects. What is the best correction? (variation 109)
6. Which option is a correct use case for preprocessor macros in C Programming? (variation 98)
7. Which statement best describes the stack in C Programming?
8. A student says 'segmentation faults' is not relevant to real projects. What is the best correction?
9. Which option is a correct use case for structs in C Programming? (variation 353)
10. Which option is a correct use case for preprocessor macros in C Programming? (variation 78)
11. Which statement best describes the stack in C Programming? (variation 85)
12. When working with C Programming, why would a developer use arrays?
13. Which option is a correct use case for structs in C Programming? (variation 93)
14. What is the most accurate beginner-level explanation of malloc? (variation 82)
15. What is the most accurate beginner-level explanation of malloc? (variation 72)
16. When working with C Programming, why would a developer use null terminator?
17. A student says 'header files' is not relevant to real projects. What is the best correction?

18. Which option is a correct use case for preprocessor macros in C Programming? (variation 358)
19. A student says 'header files' is not relevant to real projects. What is the best correction? (variation 74)
20. A student says 'header files' is not relevant to real projects. What is the best correction? (variation 94)
21. Which option is a correct use case for structs in C Programming?
22. Which option is a correct use case for preprocessor macros in C Programming?
23. What is the most accurate beginner-level explanation of pass by pointer?
24. Which statement best describes pointers in C Programming?
25. What is the most accurate beginner-level explanation of malloc? (variation 92)
26. When working with C Programming, why would a developer use null terminator? (variation 76)
27. When working with C Programming, why would a developer use null terminator? (variation 106)
28. When working with C Programming, why would a developer use arrays? (variation 351)
29. Which statement best describes pointers in C Programming? (variation 70)
30. When working with C Programming, why would a developer use arrays? (variation 81)
31. Which option is a correct use case for preprocessor macros in C Programming? (variation 88)
32. When working with C Programming, why would a developer use arrays? (variation 91)
33. Which statement best describes pointers in C Programming? (variation 100)
34. Which statement best describes pointers in C Programming? (variation 80)
35. What is the most accurate beginner-level explanation of pass by pointer? (variation 77)
36. A student says 'segmentation faults' is not relevant to real projects. What is the best correction? (variation 89)

37. What is the most accurate beginner-level explanation of malloc? (variation 102)
38. Which statement best describes the stack in C Programming? (variation 355)
39. What is the most accurate beginner-level explanation of pass by pointer? (variation 87)
40. A student says 'segmentation faults' is not relevant to real projects. What is the best correction? (variation 359)
41. A student says 'header files' is not relevant to real projects. What is the best correction? (variation 104)
42. Which statement best describes the stack in C Programming? (variation 95)
43. Which option is a correct use case for preprocessor macros in C Programming? (variation 108)
44. When working with C Programming, why would a developer use arrays? (variation 101)
45. A student says 'header files' is not relevant to real projects. What is the best correction? (variation 354)
46. A student says 'header files' is not relevant to real projects. What is the best correction? (variation 84)
47. What is the most accurate beginner-level explanation of pass by pointer? (variation 107)
48. Which option is a correct use case for structs in C Programming? (variation 73)
49. When working with C Programming, why would a developer use null terminator? (variation 96)
50. Which statement best describes the stack in C Programming? (variation 75)
51. Which option is a correct use case for structs in C Programming? (variation 103)
52. What is the most accurate beginner-level explanation of pass by pointer? (variation 357)
53. What is the most accurate beginner-level explanation of malloc?
54. What is the most accurate beginner-level explanation of malloc? (variation 352)
55. When working with C Programming, why would a developer use null terminator? (variation 86)

56. Which option is a correct use case for structs in C Programming? (variation 83)
57. Which statement best describes pointers in C Programming? (variation 90)
58. When working with C Programming, why would a developer use arrays? (variation 71)
59. When working with C Programming, why would a developer use null terminator? (variation 356)
60. A student says 'segmentation faults' is not relevant to real projects. What is the best correction? (variation 79)
