

# IIT-JEE Previous Year Practice 2017 (2017)

Subject: General | Topic: C Programming

1. Which statement best describes pointers in C Programming? (variation 100)
2. When working with C Programming, why would a developer use arrays?
3. A student says 'header files' is not relevant to real projects. What is the best correction? (variation 354)
4. Which statement best describes the stack in C Programming? (variation 95)
5. A student says 'header files' is not relevant to real projects. What is the best correction? (variation 74)
6. Which option is a correct use case for preprocessor macros in C Programming? (variation 88)
7. When working with C Programming, why would a developer use null terminator? (variation 356)
8. A student says 'header files' is not relevant to real projects. What is the best correction?
9. When working with C Programming, why would a developer use arrays? (variation 101)
10. What is the most accurate beginner-level explanation of malloc? (variation 82)
11. When working with C Programming, why would a developer use arrays? (variation 91)
12. Which option is a correct use case for structs in C Programming?
13. Which statement best describes the stack in C Programming? (variation 355)
14. What is the most accurate beginner-level explanation of malloc? (variation 72)
15. Which statement best describes the stack in C Programming?
16. Which option is a correct use case for structs in C Programming? (variation 73)
17. Which statement best describes the stack in C Programming? (variation 85)

18. Which option is a correct use case for structs in C Programming? (variation 353)
19. What is the most accurate beginner-level explanation of pass by pointer? (variation 97)
20. What is the most accurate beginner-level explanation of pass by pointer? (variation 107)
21. When working with C Programming, why would a developer use null terminator? (variation 76)
22. What is the most accurate beginner-level explanation of malloc? (variation 92)
23. Which statement best describes pointers in C Programming? (variation 80)
24. What is the most accurate beginner-level explanation of pass by pointer?
25. Which option is a correct use case for preprocessor macros in C Programming? (variation 108)
26. A student says 'segmentation faults' is not relevant to real projects. What is the best correction? (variation 89)
27. A student says 'segmentation faults' is not relevant to real projects. What is the best correction? (variation 99)
28. Which option is a correct use case for preprocessor macros in C Programming? (variation 98)
29. Which option is a correct use case for structs in C Programming? (variation 103)
30. Which statement best describes the stack in C Programming? (variation 105)
31. When working with C Programming, why would a developer use null terminator?
32. A student says 'header files' is not relevant to real projects. What is the best correction? (variation 84)
33. Which option is a correct use case for preprocessor macros in C Programming? (variation 78)
34. When working with C Programming, why would a developer use null terminator? (variation 96)
35. Which statement best describes pointers in C Programming? (variation 90)
36. When working with C Programming, why would a developer use null terminator? (variation 106)

37. What is the most accurate beginner-level explanation of pass by pointer? (variation 357)
38. What is the most accurate beginner-level explanation of malloc? (variation 102)
39. A student says 'segmentation faults' is not relevant to real projects. What is the best correction? (variation 109)
40. What is the most accurate beginner-level explanation of pass by pointer? (variation 87)
41. Which statement best describes pointers in C Programming?
42. When working with C Programming, why would a developer use arrays? (variation 71)
43. What is the most accurate beginner-level explanation of malloc? (variation 352)
44. Which statement best describes pointers in C Programming? (variation 70)
45. When working with C Programming, why would a developer use arrays? (variation 351)
46. A student says 'header files' is not relevant to real projects. What is the best correction? (variation 104)
47. Which option is a correct use case for preprocessor macros in C Programming?
48. Which statement best describes pointers in C Programming? (variation 350)
49. A student says 'segmentation faults' is not relevant to real projects. What is the best correction?
50. What is the most accurate beginner-level explanation of pass by pointer? (variation 77)
51. Which option is a correct use case for structs in C Programming? (variation 83)
52. A student says 'segmentation faults' is not relevant to real projects. What is the best correction? (variation 79)
53. Which option is a correct use case for structs in C Programming? (variation 93)
54. When working with C Programming, why would a developer use arrays? (variation 81)
55. A student says 'header files' is not relevant to real projects. What is the best correction? (variation 94)

56. Which statement best describes the stack in C Programming? (variation 75)
57. What is the most accurate beginner-level explanation of malloc?
58. When working with C Programming, why would a developer use null terminator? (variation 86)
59. A student says 'segmentation faults' is not relevant to real projects. What is the best correction? (variation 359)
60. Which option is a correct use case for preprocessor macros in C Programming? (variation 358)
