

IIT-JEE Previous Year Practice 2019 (2019)

Subject: General | Topic: C Programming

1. Which statement best describes the stack in C Programming? (variation 75)
2. A student says 'segmentation faults' is not relevant to real projects. What is the best correction? (variation 359)
3. What is the most accurate beginner-level explanation of pass by pointer?
4. Which option is a correct use case for structs in C Programming? (variation 103)
5. When working with C Programming, why would a developer use null terminator? (variation 356)
6. When working with C Programming, why would a developer use arrays? (variation 81)
7. When working with C Programming, why would a developer use null terminator? (variation 76)
8. Which option is a correct use case for structs in C Programming? (variation 83)
9. A student says 'segmentation faults' is not relevant to real projects. What is the best correction? (variation 79)
10. When working with C Programming, why would a developer use arrays? (variation 351)
11. When working with C Programming, why would a developer use null terminator? (variation 106)
12. Which statement best describes pointers in C Programming? (variation 70)
13. Which statement best describes pointers in C Programming?
14. Which statement best describes the stack in C Programming? (variation 355)
15. Which option is a correct use case for preprocessor macros in C Programming? (variation 78)
16. A student says 'segmentation faults' is not relevant to real projects. What is the best correction? (variation 89)
17. When working with C Programming, why would a developer use arrays? (variation 71)

18. What is the most accurate beginner-level explanation of pass by pointer? (variation 97)
19. What is the most accurate beginner-level explanation of pass by pointer? (variation 357)
20. Which option is a correct use case for structs in C Programming? (variation 353)
21. What is the most accurate beginner-level explanation of malloc? (variation 92)
22. Which option is a correct use case for preprocessor macros in C Programming? (variation 358)
23. A student says 'segmentation faults' is not relevant to real projects. What is the best correction? (variation 99)
24. When working with C Programming, why would a developer use arrays? (variation 101)
25. Which option is a correct use case for structs in C Programming? (variation 93)
26. Which statement best describes the stack in C Programming?
27. What is the most accurate beginner-level explanation of malloc? (variation 82)
28. When working with C Programming, why would a developer use null terminator? (variation 96)
29. Which statement best describes pointers in C Programming? (variation 350)
30. A student says 'header files' is not relevant to real projects. What is the best correction? (variation 104)
31. Which statement best describes pointers in C Programming? (variation 90)
32. Which option is a correct use case for preprocessor macros in C Programming? (variation 108)
33. When working with C Programming, why would a developer use null terminator? (variation 86)
34. What is the most accurate beginner-level explanation of pass by pointer? (variation 87)
35. Which option is a correct use case for preprocessor macros in C Programming? (variation 88)
36. A student says 'header files' is not relevant to real projects. What is the best correction? (variation 94)

37. A student says 'header files' is not relevant to real projects. What is the best correction? (variation 84)
38. A student says 'header files' is not relevant to real projects. What is the best correction? (variation 354)
39. Which statement best describes the stack in C Programming? (variation 85)
40. A student says 'header files' is not relevant to real projects. What is the best correction? (variation 74)
41. A student says 'segmentation faults' is not relevant to real projects. What is the best correction?
42. What is the most accurate beginner-level explanation of malloc? (variation 352)
43. A student says 'segmentation faults' is not relevant to real projects. What is the best correction? (variation 109)
44. When working with C Programming, why would a developer use arrays?
45. Which option is a correct use case for preprocessor macros in C Programming?
46. When working with C Programming, why would a developer use null terminator?
47. Which statement best describes the stack in C Programming? (variation 105)
48. What is the most accurate beginner-level explanation of malloc?
49. When working with C Programming, why would a developer use arrays? (variation 91)
50. Which option is a correct use case for structs in C Programming?
51. What is the most accurate beginner-level explanation of malloc? (variation 72)
52. Which option is a correct use case for structs in C Programming? (variation 73)
53. What is the most accurate beginner-level explanation of pass by pointer? (variation 77)
54. What is the most accurate beginner-level explanation of pass by pointer? (variation 107)
55. Which option is a correct use case for preprocessor macros in C Programming? (variation 98)

56. What is the most accurate beginner-level explanation of malloc? (variation 102)
57. A student says 'header files' is not relevant to real projects. What is the best correction?
58. Which statement best describes pointers in C Programming? (variation 100)
59. Which statement best describes pointers in C Programming? (variation 80)
60. Which statement best describes the stack in C Programming? (variation 95)
