

IIT-JEE Previous Year Practice 2020 (2020)

Subject: General | Topic: C Programming

1. A student says 'header files' is not relevant to real projects. What is the best correction? (variation 84)
2. What is the most accurate beginner-level explanation of pass by pointer? (variation 357)
3. Which statement best describes pointers in C Programming?
4. When working with C Programming, why would a developer use null terminator? (variation 86)
5. When working with C Programming, why would a developer use arrays? (variation 351)
6. Which statement best describes the stack in C Programming? (variation 355)
7. Which option is a correct use case for preprocessor macros in C Programming? (variation 108)
8. What is the most accurate beginner-level explanation of pass by pointer? (variation 77)
9. Which option is a correct use case for preprocessor macros in C Programming? (variation 98)
10. Which statement best describes pointers in C Programming? (variation 100)
11. What is the most accurate beginner-level explanation of malloc? (variation 92)
12. Which statement best describes the stack in C Programming? (variation 95)
13. What is the most accurate beginner-level explanation of pass by pointer?
14. A student says 'segmentation faults' is not relevant to real projects. What is the best correction? (variation 89)
15. Which statement best describes the stack in C Programming? (variation 85)
16. What is the most accurate beginner-level explanation of pass by pointer? (variation 87)
17. A student says 'segmentation faults' is not relevant to real projects. What is the best correction? (variation 99)

18. When working with C Programming, why would a developer use arrays? (variation 81)
19. Which option is a correct use case for structs in C Programming? (variation 73)
20. A student says 'header files' is not relevant to real projects. What is the best correction? (variation 354)
21. A student says 'segmentation faults' is not relevant to real projects. What is the best correction? (variation 359)
22. What is the most accurate beginner-level explanation of malloc? (variation 72)
23. When working with C Programming, why would a developer use null terminator? (variation 96)
24. When working with C Programming, why would a developer use arrays? (variation 71)
25. A student says 'header files' is not relevant to real projects. What is the best correction?
26. Which statement best describes pointers in C Programming? (variation 350)
27. Which option is a correct use case for structs in C Programming?
28. A student says 'segmentation faults' is not relevant to real projects. What is the best correction? (variation 79)
29. Which statement best describes pointers in C Programming? (variation 80)
30. When working with C Programming, why would a developer use arrays?
31. A student says 'segmentation faults' is not relevant to real projects. What is the best correction?
32. Which statement best describes pointers in C Programming? (variation 90)
33. Which statement best describes the stack in C Programming?
34. When working with C Programming, why would a developer use null terminator? (variation 106)
35. What is the most accurate beginner-level explanation of malloc? (variation 352)
36. Which option is a correct use case for preprocessor macros in C Programming? (variation 358)

37. Which statement best describes pointers in C Programming? (variation 70)
38. Which option is a correct use case for preprocessor macros in C Programming? (variation 78)
39. Which option is a correct use case for structs in C Programming? (variation 83)
40. What is the most accurate beginner-level explanation of pass by pointer? (variation 107)
41. A student says 'header files' is not relevant to real projects. What is the best correction? (variation 74)
42. Which option is a correct use case for preprocessor macros in C Programming?
43. When working with C Programming, why would a developer use null terminator? (variation 356)
44. Which option is a correct use case for structs in C Programming? (variation 103)
45. When working with C Programming, why would a developer use arrays? (variation 91)
46. Which option is a correct use case for preprocessor macros in C Programming? (variation 88)
47. A student says 'segmentation faults' is not relevant to real projects. What is the best correction? (variation 109)
48. Which option is a correct use case for structs in C Programming? (variation 353)
49. A student says 'header files' is not relevant to real projects. What is the best correction? (variation 104)
50. Which statement best describes the stack in C Programming? (variation 105)
51. Which statement best describes the stack in C Programming? (variation 75)
52. What is the most accurate beginner-level explanation of malloc? (variation 82)
53. What is the most accurate beginner-level explanation of malloc?
54. When working with C Programming, why would a developer use null terminator?
55. When working with C Programming, why would a developer use null terminator? (variation 76)

56. When working with C Programming, why would a developer use arrays? (variation 101)
57. Which option is a correct use case for structs in C Programming? (variation 93)
58. What is the most accurate beginner-level explanation of pass by pointer? (variation 97)
59. What is the most accurate beginner-level explanation of malloc? (variation 102)
60. A student says 'header files' is not relevant to real projects. What is the best correction? (variation 94)
