

IIT-JEE Previous Year Practice 2021 (2021)

Subject: General | Topic: C Programming

1. Which option is a correct use case for preprocessor macros in C Programming?
2. What is the most accurate beginner-level explanation of pass by pointer? (variation 357)
3. What is the most accurate beginner-level explanation of pass by pointer? (variation 87)
4. Which option is a correct use case for preprocessor macros in C Programming? (variation 98)
5. When working with C Programming, why would a developer use arrays? (variation 101)
6. Which option is a correct use case for preprocessor macros in C Programming? (variation 108)
7. Which option is a correct use case for preprocessor macros in C Programming? (variation 358)
8. A student says 'header files' is not relevant to real projects. What is the best correction? (variation 94)
9. When working with C Programming, why would a developer use null terminator? (variation 76)
10. When working with C Programming, why would a developer use null terminator?
11. When working with C Programming, why would a developer use null terminator? (variation 86)
12. Which option is a correct use case for structs in C Programming?
13. A student says 'segmentation faults' is not relevant to real projects. What is the best correction? (variation 99)
14. What is the most accurate beginner-level explanation of malloc? (variation 352)
15. What is the most accurate beginner-level explanation of malloc? (variation 72)
16. When working with C Programming, why would a developer use arrays? (variation 71)
17. Which option is a correct use case for preprocessor macros in C Programming? (variation 88)

18. When working with C Programming, why would a developer use null terminator? (variation 106)
19. A student says 'segmentation faults' is not relevant to real projects. What is the best correction? (variation 89)
20. What is the most accurate beginner-level explanation of malloc? (variation 102)
21. When working with C Programming, why would a developer use arrays? (variation 351)
22. Which statement best describes the stack in C Programming?
23. A student says 'header files' is not relevant to real projects. What is the best correction? (variation 74)
24. Which statement best describes the stack in C Programming? (variation 355)
25. Which statement best describes pointers in C Programming? (variation 80)
26. Which statement best describes the stack in C Programming? (variation 95)
27. What is the most accurate beginner-level explanation of malloc? (variation 82)
28. What is the most accurate beginner-level explanation of malloc? (variation 92)
29. When working with C Programming, why would a developer use arrays? (variation 81)
30. When working with C Programming, why would a developer use arrays? (variation 91)
31. Which statement best describes pointers in C Programming?
32. Which option is a correct use case for structs in C Programming? (variation 83)
33. When working with C Programming, why would a developer use arrays?
34. Which statement best describes the stack in C Programming? (variation 85)
35. A student says 'segmentation faults' is not relevant to real projects. What is the best correction? (variation 79)
36. Which statement best describes pointers in C Programming? (variation 90)

37. When working with C Programming, why would a developer use null terminator? (variation 356)
38. A student says 'header files' is not relevant to real projects. What is the best correction? (variation 84)
39. A student says 'segmentation faults' is not relevant to real projects. What is the best correction?
40. Which option is a correct use case for structs in C Programming? (variation 73)
41. What is the most accurate beginner-level explanation of pass by pointer? (variation 107)
42. Which option is a correct use case for preprocessor macros in C Programming? (variation 78)
43. Which statement best describes pointers in C Programming? (variation 100)
44. Which statement best describes pointers in C Programming? (variation 350)
45. A student says 'header files' is not relevant to real projects. What is the best correction? (variation 354)
46. Which option is a correct use case for structs in C Programming? (variation 103)
47. Which statement best describes pointers in C Programming? (variation 70)
48. A student says 'header files' is not relevant to real projects. What is the best correction? (variation 104)
49. What is the most accurate beginner-level explanation of pass by pointer?
50. Which statement best describes the stack in C Programming? (variation 105)
51. Which option is a correct use case for structs in C Programming? (variation 353)
52. When working with C Programming, why would a developer use null terminator? (variation 96)
53. What is the most accurate beginner-level explanation of pass by pointer? (variation 77)
54. A student says 'header files' is not relevant to real projects. What is the best correction?
55. What is the most accurate beginner-level explanation of malloc?

56. What is the most accurate beginner-level explanation of pass by pointer? (variation 97)

57. A student says 'segmentation faults' is not relevant to real projects. What is the best correction? (variation 359)

58. Which option is a correct use case for structs in C Programming? (variation 93)

59. A student says 'segmentation faults' is not relevant to real projects. What is the best correction? (variation 109)

60. Which statement best describes the stack in C Programming? (variation 75)
