

IIT-JEE Previous Year Practice 2022 (2022)

Subject: General | Topic: C Programming

1. A student says 'header files' is not relevant to real projects. What is the best correction? (variation 104)
2. What is the most accurate beginner-level explanation of malloc? (variation 352)
3. Which statement best describes the stack in C Programming? (variation 105)
4. Which option is a correct use case for preprocessor macros in C Programming? (variation 98)
5. Which option is a correct use case for preprocessor macros in C Programming? (variation 358)
6. Which option is a correct use case for preprocessor macros in C Programming? (variation 88)
7. When working with C Programming, why would a developer use null terminator? (variation 76)
8. A student says 'segmentation faults' is not relevant to real projects. What is the best correction? (variation 89)
9. Which option is a correct use case for structs in C Programming? (variation 93)
10. A student says 'segmentation faults' is not relevant to real projects. What is the best correction? (variation 359)
11. When working with C Programming, why would a developer use null terminator? (variation 106)
12. Which statement best describes pointers in C Programming? (variation 100)
13. Which option is a correct use case for structs in C Programming? (variation 73)
14. Which statement best describes pointers in C Programming? (variation 90)
15. What is the most accurate beginner-level explanation of pass by pointer? (variation 87)
16. Which statement best describes the stack in C Programming? (variation 75)
17. When working with C Programming, why would a developer use arrays? (variation 91)

18. What is the most accurate beginner-level explanation of pass by pointer? (variation 77)
19. Which option is a correct use case for structs in C Programming? (variation 83)
20. A student says 'header files' is not relevant to real projects. What is the best correction? (variation 354)
21. When working with C Programming, why would a developer use arrays? (variation 351)
22. A student says 'header files' is not relevant to real projects. What is the best correction? (variation 74)
23. What is the most accurate beginner-level explanation of pass by pointer?
24. What is the most accurate beginner-level explanation of pass by pointer? (variation 97)
25. A student says 'header files' is not relevant to real projects. What is the best correction? (variation 94)
26. When working with C Programming, why would a developer use arrays? (variation 71)
27. Which statement best describes the stack in C Programming? (variation 95)
28. Which statement best describes pointers in C Programming? (variation 350)
29. Which statement best describes pointers in C Programming? (variation 70)
30. What is the most accurate beginner-level explanation of pass by pointer? (variation 107)
31. When working with C Programming, why would a developer use null terminator? (variation 96)
32. When working with C Programming, why would a developer use arrays? (variation 101)
33. A student says 'segmentation faults' is not relevant to real projects. What is the best correction? (variation 99)
34. What is the most accurate beginner-level explanation of malloc? (variation 72)
35. When working with C Programming, why would a developer use null terminator?
36. Which option is a correct use case for structs in C Programming? (variation 353)

37. When working with C Programming, why would a developer use arrays?
38. What is the most accurate beginner-level explanation of malloc? (variation 92)
39. Which statement best describes pointers in C Programming? (variation 80)
40. A student says 'segmentation faults' is not relevant to real projects. What is the best correction?
41. When working with C Programming, why would a developer use null terminator? (variation 86)
42. What is the most accurate beginner-level explanation of pass by pointer? (variation 357)
43. Which option is a correct use case for preprocessor macros in C Programming? (variation 108)
44. What is the most accurate beginner-level explanation of malloc? (variation 102)
45. Which statement best describes pointers in C Programming?
46. Which option is a correct use case for structs in C Programming?
47. Which statement best describes the stack in C Programming?
48. A student says 'segmentation faults' is not relevant to real projects. What is the best correction? (variation 79)
49. What is the most accurate beginner-level explanation of malloc?
50. When working with C Programming, why would a developer use null terminator? (variation 356)
51. When working with C Programming, why would a developer use arrays? (variation 81)
52. Which option is a correct use case for preprocessor macros in C Programming?
53. What is the most accurate beginner-level explanation of malloc? (variation 82)
54. Which statement best describes the stack in C Programming? (variation 85)
55. A student says 'header files' is not relevant to real projects. What is the best correction?

56. A student says 'header files' is not relevant to real projects. What is the best correction? (variation 84)
57. Which option is a correct use case for preprocessor macros in C Programming? (variation 78)
58. Which option is a correct use case for structs in C Programming? (variation 103)
59. Which statement best describes the stack in C Programming? (variation 355)
60. A student says 'segmentation faults' is not relevant to real projects. What is the best correction? (variation 109)
