

IIT-JEE Previous Year Practice 2023 (2023)

Subject: General | Topic: C Programming

1. What is the most accurate beginner-level explanation of malloc? (variation 92)
2. When working with C Programming, why would a developer use null terminator? (variation 86)
3. A student says 'segmentation faults' is not relevant to real projects. What is the best correction?
4. What is the most accurate beginner-level explanation of pass by pointer? (variation 357)
5. A student says 'segmentation faults' is not relevant to real projects. What is the best correction? (variation 79)
6. A student says 'header files' is not relevant to real projects. What is the best correction? (variation 74)
7. When working with C Programming, why would a developer use null terminator? (variation 356)
8. A student says 'header files' is not relevant to real projects. What is the best correction? (variation 354)
9. Which statement best describes pointers in C Programming? (variation 100)
10. When working with C Programming, why would a developer use null terminator? (variation 76)
11. What is the most accurate beginner-level explanation of malloc? (variation 72)
12. A student says 'header files' is not relevant to real projects. What is the best correction? (variation 94)
13. When working with C Programming, why would a developer use null terminator?
14. What is the most accurate beginner-level explanation of malloc? (variation 352)
15. A student says 'header files' is not relevant to real projects. What is the best correction? (variation 84)
16. Which option is a correct use case for structs in C Programming?
17. Which option is a correct use case for structs in C Programming? (variation 93)

18. When working with C Programming, why would a developer use arrays? (variation 71)
19. A student says 'segmentation faults' is not relevant to real projects. What is the best correction? (variation 359)
20. Which statement best describes pointers in C Programming?
21. When working with C Programming, why would a developer use arrays?
22. Which statement best describes pointers in C Programming? (variation 70)
23. What is the most accurate beginner-level explanation of malloc? (variation 82)
24. What is the most accurate beginner-level explanation of pass by pointer?
25. A student says 'header files' is not relevant to real projects. What is the best correction?
26. Which statement best describes the stack in C Programming? (variation 85)
27. Which statement best describes pointers in C Programming? (variation 350)
28. Which option is a correct use case for structs in C Programming? (variation 83)
29. Which statement best describes the stack in C Programming? (variation 355)
30. When working with C Programming, why would a developer use arrays? (variation 101)
31. A student says 'segmentation faults' is not relevant to real projects. What is the best correction? (variation 109)
32. When working with C Programming, why would a developer use arrays? (variation 81)
33. What is the most accurate beginner-level explanation of pass by pointer? (variation 77)
34. Which statement best describes pointers in C Programming? (variation 90)
35. Which statement best describes the stack in C Programming? (variation 75)
36. A student says 'segmentation faults' is not relevant to real projects. What is the best correction? (variation 99)

37. Which option is a correct use case for structs in C Programming? (variation 103)
38. Which statement best describes the stack in C Programming? (variation 105)
39. Which statement best describes the stack in C Programming? (variation 95)
40. Which statement best describes the stack in C Programming?
41. What is the most accurate beginner-level explanation of pass by pointer? (variation 87)
42. Which option is a correct use case for preprocessor macros in C Programming? (variation 78)
43. A student says 'segmentation faults' is not relevant to real projects. What is the best correction? (variation 89)
44. When working with C Programming, why would a developer use arrays? (variation 351)
45. What is the most accurate beginner-level explanation of pass by pointer? (variation 107)
46. Which option is a correct use case for preprocessor macros in C Programming? (variation 88)
47. Which option is a correct use case for preprocessor macros in C Programming? (variation 358)
48. When working with C Programming, why would a developer use null terminator? (variation 96)
49. What is the most accurate beginner-level explanation of pass by pointer? (variation 97)
50. Which option is a correct use case for structs in C Programming? (variation 73)
51. When working with C Programming, why would a developer use arrays? (variation 91)
52. What is the most accurate beginner-level explanation of malloc? (variation 102)
53. Which option is a correct use case for structs in C Programming? (variation 353)
54. Which option is a correct use case for preprocessor macros in C Programming? (variation 108)
55. What is the most accurate beginner-level explanation of malloc?

56. A student says 'header files' is not relevant to real projects. What is the best correction? (variation 104)

57. When working with C Programming, why would a developer use null terminator? (variation 106)

58. Which option is a correct use case for preprocessor macros in C Programming?

59. Which option is a correct use case for preprocessor macros in C Programming? (variation 98)

60. Which statement best describes pointers in C Programming? (variation 80)
