

IIT-JEE Previous Year Practice 2024 (2024)

Subject: General | Topic: C Programming

1. When working with C Programming, why would a developer use arrays? (variation 351)
2. Which statement best describes the stack in C Programming? (variation 95)
3. Which option is a correct use case for preprocessor macros in C Programming? (variation 88)
4. When working with C Programming, why would a developer use null terminator? (variation 86)
5. When working with C Programming, why would a developer use null terminator? (variation 356)
6. When working with C Programming, why would a developer use arrays? (variation 81)
7. What is the most accurate beginner-level explanation of pass by pointer? (variation 87)
8. A student says 'header files' is not relevant to real projects. What is the best correction? (variation 104)
9. Which statement best describes pointers in C Programming? (variation 350)
10. Which option is a correct use case for structs in C Programming? (variation 353)
11. A student says 'segmentation faults' is not relevant to real projects. What is the best correction? (variation 99)
12. What is the most accurate beginner-level explanation of malloc? (variation 72)
13. What is the most accurate beginner-level explanation of pass by pointer? (variation 357)
14. A student says 'header files' is not relevant to real projects. What is the best correction? (variation 354)
15. When working with C Programming, why would a developer use null terminator?
16. Which option is a correct use case for preprocessor macros in C Programming?
17. A student says 'header files' is not relevant to real projects. What is the best correction?

18. A student says 'segmentation faults' is not relevant to real projects. What is the best correction?
19. What is the most accurate beginner-level explanation of pass by pointer?
20. Which option is a correct use case for structs in C Programming? (variation 93)
21. Which statement best describes the stack in C Programming? (variation 105)
22. What is the most accurate beginner-level explanation of malloc? (variation 352)
23. Which option is a correct use case for structs in C Programming?
24. When working with C Programming, why would a developer use null terminator? (variation 96)
25. When working with C Programming, why would a developer use arrays? (variation 71)
26. Which option is a correct use case for preprocessor macros in C Programming? (variation 358)
27. A student says 'segmentation faults' is not relevant to real projects. What is the best correction? (variation 89)
28. When working with C Programming, why would a developer use arrays? (variation 91)
29. Which statement best describes pointers in C Programming? (variation 100)
30. Which option is a correct use case for preprocessor macros in C Programming? (variation 78)
31. A student says 'header files' is not relevant to real projects. What is the best correction? (variation 84)
32. Which option is a correct use case for structs in C Programming? (variation 73)
33. Which statement best describes pointers in C Programming? (variation 70)
34. What is the most accurate beginner-level explanation of pass by pointer? (variation 107)
35. Which statement best describes the stack in C Programming?
36. Which statement best describes pointers in C Programming? (variation 90)

37. When working with C Programming, why would a developer use null terminator? (variation 76)
38. What is the most accurate beginner-level explanation of pass by pointer? (variation 97)
39. What is the most accurate beginner-level explanation of malloc? (variation 82)
40. What is the most accurate beginner-level explanation of pass by pointer? (variation 77)
41. What is the most accurate beginner-level explanation of malloc? (variation 102)
42. Which statement best describes the stack in C Programming? (variation 75)
43. What is the most accurate beginner-level explanation of malloc?
44. A student says 'segmentation faults' is not relevant to real projects. What is the best correction? (variation 359)
45. Which statement best describes the stack in C Programming? (variation 355)
46. Which statement best describes pointers in C Programming? (variation 80)
47. A student says 'segmentation faults' is not relevant to real projects. What is the best correction? (variation 79)
48. A student says 'header files' is not relevant to real projects. What is the best correction? (variation 74)
49. When working with C Programming, why would a developer use arrays? (variation 101)
50. When working with C Programming, why would a developer use arrays?
51. Which option is a correct use case for preprocessor macros in C Programming? (variation 108)
52. Which statement best describes the stack in C Programming? (variation 85)
53. What is the most accurate beginner-level explanation of malloc? (variation 92)
54. Which option is a correct use case for preprocessor macros in C Programming? (variation 98)
55. A student says 'header files' is not relevant to real projects. What is the best correction? (variation 94)

56. Which option is a correct use case for structs in C Programming? (variation 83)
57. A student says 'segmentation faults' is not relevant to real projects. What is the best correction? (variation 109)
58. Which option is a correct use case for structs in C Programming? (variation 103)
59. When working with C Programming, why would a developer use null terminator? (variation 106)
60. Which statement best describes pointers in C Programming?
