

IIT-JEE Previous Year Practice 2026 (2026)

Subject: General | Topic: C Programming

1. When working with C Programming, why would a developer use arrays? (variation 71)
2. Which statement best describes pointers in C Programming? (variation 100)
3. Which statement best describes the stack in C Programming? (variation 105)
4. What is the most accurate beginner-level explanation of malloc? (variation 82)
5. What is the most accurate beginner-level explanation of malloc? (variation 102)
6. Which option is a correct use case for preprocessor macros in C Programming? (variation 78)
7. When working with C Programming, why would a developer use arrays? (variation 101)
8. A student says 'segmentation faults' is not relevant to real projects. What is the best correction? (variation 99)
9. When working with C Programming, why would a developer use arrays? (variation 351)
10. Which statement best describes the stack in C Programming? (variation 85)
11. What is the most accurate beginner-level explanation of pass by pointer? (variation 97)
12. Which option is a correct use case for preprocessor macros in C Programming? (variation 98)
13. Which statement best describes pointers in C Programming?
14. A student says 'segmentation faults' is not relevant to real projects. What is the best correction? (variation 89)
15. Which statement best describes pointers in C Programming? (variation 350)
16. What is the most accurate beginner-level explanation of malloc? (variation 72)
17. When working with C Programming, why would a developer use null terminator? (variation 96)

18. A student says 'header files' is not relevant to real projects. What is the best correction? (variation 354)
19. When working with C Programming, why would a developer use null terminator? (variation 76)
20. What is the most accurate beginner-level explanation of pass by pointer? (variation 357)
21. Which option is a correct use case for structs in C Programming? (variation 83)
22. What is the most accurate beginner-level explanation of pass by pointer? (variation 107)
23. A student says 'header files' is not relevant to real projects. What is the best correction? (variation 74)
24. When working with C Programming, why would a developer use arrays?
25. Which option is a correct use case for preprocessor macros in C Programming? (variation 108)
26. Which statement best describes pointers in C Programming? (variation 90)
27. Which statement best describes the stack in C Programming? (variation 95)
28. Which statement best describes the stack in C Programming? (variation 355)
29. When working with C Programming, why would a developer use arrays? (variation 91)
30. Which option is a correct use case for preprocessor macros in C Programming? (variation 358)
31. What is the most accurate beginner-level explanation of malloc? (variation 92)
32. When working with C Programming, why would a developer use arrays? (variation 81)
33. A student says 'segmentation faults' is not relevant to real projects. What is the best correction?
34. A student says 'header files' is not relevant to real projects. What is the best correction?
35. A student says 'segmentation faults' is not relevant to real projects. What is the best correction? (variation 79)
36. Which option is a correct use case for structs in C Programming? (variation 73)

37. A student says 'header files' is not relevant to real projects. What is the best correction? (variation 84)
38. Which option is a correct use case for preprocessor macros in C Programming?
39. When working with C Programming, why would a developer use null terminator? (variation 106)
40. What is the most accurate beginner-level explanation of pass by pointer?
41. When working with C Programming, why would a developer use null terminator? (variation 86)
42. A student says 'segmentation faults' is not relevant to real projects. What is the best correction? (variation 109)
43. When working with C Programming, why would a developer use null terminator?
44. A student says 'segmentation faults' is not relevant to real projects. What is the best correction? (variation 359)
45. Which statement best describes the stack in C Programming?
46. Which option is a correct use case for preprocessor macros in C Programming? (variation 88)
47. Which option is a correct use case for structs in C Programming? (variation 353)
48. A student says 'header files' is not relevant to real projects. What is the best correction? (variation 94)
49. What is the most accurate beginner-level explanation of malloc? (variation 352)
50. Which statement best describes pointers in C Programming? (variation 80)
51. A student says 'header files' is not relevant to real projects. What is the best correction? (variation 104)
52. What is the most accurate beginner-level explanation of pass by pointer? (variation 87)
53. Which statement best describes pointers in C Programming? (variation 70)
54. Which option is a correct use case for structs in C Programming? (variation 103)
55. What is the most accurate beginner-level explanation of pass by pointer? (variation 77)

56. Which statement best describes the stack in C Programming? (variation 75)

57. Which option is a correct use case for structs in C Programming? (variation 93)

58. When working with C Programming, why would a developer use null terminator? (variation 356)

59. What is the most accurate beginner-level explanation of malloc?

60. Which option is a correct use case for structs in C Programming?
