

NEET Previous Year Practice 2017 (2017)

Subject: General | Topic: C Programming

1. What is the most accurate beginner-level explanation of pass by pointer? (variation 357)
2. When working with C Programming, why would a developer use arrays? (variation 351)
3. Which statement best describes the stack in C Programming? (variation 95)
4. A student says 'header files' is not relevant to real projects. What is the best correction? (variation 94)
5. Which statement best describes pointers in C Programming? (variation 80)
6. A student says 'header files' is not relevant to real projects. What is the best correction? (variation 354)
7. A student says 'header files' is not relevant to real projects. What is the best correction? (variation 84)
8. A student says 'header files' is not relevant to real projects. What is the best correction? (variation 104)
9. Which statement best describes the stack in C Programming? (variation 75)
10. Which option is a correct use case for preprocessor macros in C Programming? (variation 98)
11. When working with C Programming, why would a developer use null terminator? (variation 86)
12. Which statement best describes the stack in C Programming?
13. Which statement best describes pointers in C Programming? (variation 70)
14. Which option is a correct use case for preprocessor macros in C Programming? (variation 78)
15. A student says 'segmentation faults' is not relevant to real projects. What is the best correction? (variation 99)
16. What is the most accurate beginner-level explanation of pass by pointer? (variation 77)
17. What is the most accurate beginner-level explanation of pass by pointer?

18. A student says 'header files' is not relevant to real projects. What is the best correction? (variation 74)
19. Which option is a correct use case for structs in C Programming? (variation 93)
20. Which option is a correct use case for structs in C Programming? (variation 353)
21. A student says 'segmentation faults' is not relevant to real projects. What is the best correction? (variation 359)
22. Which statement best describes the stack in C Programming? (variation 85)
23. Which statement best describes the stack in C Programming? (variation 355)
24. What is the most accurate beginner-level explanation of pass by pointer? (variation 107)
25. Which statement best describes pointers in C Programming? (variation 350)
26. Which option is a correct use case for structs in C Programming?
27. What is the most accurate beginner-level explanation of malloc? (variation 82)
28. Which option is a correct use case for preprocessor macros in C Programming? (variation 108)
29. When working with C Programming, why would a developer use null terminator? (variation 356)
30. A student says 'segmentation faults' is not relevant to real projects. What is the best correction? (variation 89)
31. When working with C Programming, why would a developer use arrays?
32. A student says 'segmentation faults' is not relevant to real projects. What is the best correction? (variation 109)
33. Which statement best describes pointers in C Programming? (variation 100)
34. What is the most accurate beginner-level explanation of malloc? (variation 352)
35. When working with C Programming, why would a developer use arrays? (variation 91)
36. A student says 'header files' is not relevant to real projects. What is the best correction?

37. Which option is a correct use case for preprocessor macros in C Programming?
38. When working with C Programming, why would a developer use null terminator? (variation 96)
39. What is the most accurate beginner-level explanation of malloc? (variation 92)
40. A student says 'segmentation faults' is not relevant to real projects. What is the best correction? (variation 79)
41. What is the most accurate beginner-level explanation of pass by pointer? (variation 97)
42. When working with C Programming, why would a developer use arrays? (variation 71)
43. When working with C Programming, why would a developer use null terminator? (variation 76)
44. When working with C Programming, why would a developer use null terminator? (variation 106)
45. Which statement best describes the stack in C Programming? (variation 105)
46. What is the most accurate beginner-level explanation of malloc? (variation 72)
47. Which option is a correct use case for preprocessor macros in C Programming? (variation 88)
48. When working with C Programming, why would a developer use arrays? (variation 101)
49. Which option is a correct use case for structs in C Programming? (variation 103)
50. What is the most accurate beginner-level explanation of malloc?
51. What is the most accurate beginner-level explanation of malloc? (variation 102)
52. Which option is a correct use case for structs in C Programming? (variation 83)
53. Which option is a correct use case for structs in C Programming? (variation 73)
54. A student says 'segmentation faults' is not relevant to real projects. What is the best correction?
55. What is the most accurate beginner-level explanation of pass by pointer? (variation 87)

56. Which statement best describes pointers in C Programming? (variation 90)

57. Which option is a correct use case for preprocessor macros in C Programming? (variation 358)

58. When working with C Programming, why would a developer use null terminator?

59. When working with C Programming, why would a developer use arrays? (variation 81)

60. Which statement best describes pointers in C Programming?
