

NEET Previous Year Practice 2018 (2018)

Subject: General | Topic: C Programming

1. What is the most accurate beginner-level explanation of pass by pointer? (variation 87)
2. What is the most accurate beginner-level explanation of pass by pointer?
3. Which option is a correct use case for preprocessor macros in C Programming?
4. A student says 'segmentation faults' is not relevant to real projects. What is the best correction? (variation 99)
5. Which statement best describes pointers in C Programming? (variation 100)
6. A student says 'segmentation faults' is not relevant to real projects. What is the best correction?
7. What is the most accurate beginner-level explanation of malloc? (variation 92)
8. Which statement best describes the stack in C Programming? (variation 75)
9. Which option is a correct use case for preprocessor macros in C Programming? (variation 88)
10. When working with C Programming, why would a developer use null terminator? (variation 96)
11. When working with C Programming, why would a developer use arrays?
12. Which option is a correct use case for structs in C Programming? (variation 83)
13. When working with C Programming, why would a developer use arrays? (variation 81)
14. Which option is a correct use case for structs in C Programming?
15. Which statement best describes pointers in C Programming? (variation 70)
16. When working with C Programming, why would a developer use arrays? (variation 101)
17. A student says 'segmentation faults' is not relevant to real projects. What is the best correction? (variation 79)

18. What is the most accurate beginner-level explanation of pass by pointer? (variation 107)
19. A student says 'header files' is not relevant to real projects. What is the best correction? (variation 74)
20. When working with C Programming, why would a developer use null terminator?
21. Which statement best describes the stack in C Programming? (variation 85)
22. A student says 'segmentation faults' is not relevant to real projects. What is the best correction? (variation 89)
23. When working with C Programming, why would a developer use null terminator? (variation 86)
24. Which statement best describes pointers in C Programming? (variation 90)
25. Which statement best describes pointers in C Programming?
26. Which option is a correct use case for structs in C Programming? (variation 103)
27. Which option is a correct use case for structs in C Programming? (variation 73)
28. Which statement best describes the stack in C Programming? (variation 95)
29. When working with C Programming, why would a developer use null terminator? (variation 106)
30. Which option is a correct use case for preprocessor macros in C Programming? (variation 98)
31. When working with C Programming, why would a developer use arrays? (variation 91)
32. What is the most accurate beginner-level explanation of pass by pointer? (variation 97)
33. A student says 'header files' is not relevant to real projects. What is the best correction? (variation 94)
34. A student says 'header files' is not relevant to real projects. What is the best correction? (variation 354)
35. A student says 'header files' is not relevant to real projects. What is the best correction? (variation 84)
36. Which option is a correct use case for preprocessor macros in C Programming? (variation 78)

37. A student says 'header files' is not relevant to real projects. What is the best correction? (variation 104)
38. When working with C Programming, why would a developer use null terminator? (variation 356)
39. When working with C Programming, why would a developer use arrays? (variation 71)
40. What is the most accurate beginner-level explanation of pass by pointer? (variation 77)
41. What is the most accurate beginner-level explanation of malloc? (variation 352)
42. What is the most accurate beginner-level explanation of malloc?
43. A student says 'segmentation faults' is not relevant to real projects. What is the best correction? (variation 359)
44. When working with C Programming, why would a developer use null terminator? (variation 76)
45. Which option is a correct use case for structs in C Programming? (variation 353)
46. Which statement best describes pointers in C Programming? (variation 350)
47. Which statement best describes the stack in C Programming? (variation 105)
48. What is the most accurate beginner-level explanation of malloc? (variation 72)
49. A student says 'header files' is not relevant to real projects. What is the best correction?
50. What is the most accurate beginner-level explanation of pass by pointer? (variation 357)
51. Which option is a correct use case for preprocessor macros in C Programming? (variation 358)
52. When working with C Programming, why would a developer use arrays? (variation 351)
53. Which option is a correct use case for structs in C Programming? (variation 93)
54. A student says 'segmentation faults' is not relevant to real projects. What is the best correction? (variation 109)
55. Which statement best describes pointers in C Programming? (variation 80)

56. What is the most accurate beginner-level explanation of malloc? (variation 102)

57. Which statement best describes the stack in C Programming?

58. Which statement best describes the stack in C Programming? (variation 355)

59. What is the most accurate beginner-level explanation of malloc? (variation 82)

60. Which option is a correct use case for preprocessor macros in C Programming? (variation 108)
