

NEET Previous Year Practice 2019 (2019)

Subject: General | Topic: C Programming

1. A student says 'segmentation faults' is not relevant to real projects. What is the best correction? (variation 99)
2. Which statement best describes the stack in C Programming? (variation 105)
3. A student says 'segmentation faults' is not relevant to real projects. What is the best correction? (variation 79)
4. Which option is a correct use case for structs in C Programming? (variation 73)
5. Which statement best describes the stack in C Programming? (variation 355)
6. When working with C Programming, why would a developer use arrays? (variation 71)
7. Which option is a correct use case for preprocessor macros in C Programming? (variation 98)
8. When working with C Programming, why would a developer use arrays? (variation 101)
9. Which option is a correct use case for structs in C Programming?
10. Which statement best describes the stack in C Programming? (variation 95)
11. Which option is a correct use case for preprocessor macros in C Programming? (variation 358)
12. When working with C Programming, why would a developer use null terminator?
13. A student says 'segmentation faults' is not relevant to real projects. What is the best correction? (variation 109)
14. Which option is a correct use case for structs in C Programming? (variation 353)
15. When working with C Programming, why would a developer use null terminator? (variation 96)
16. Which statement best describes pointers in C Programming? (variation 80)
17. What is the most accurate beginner-level explanation of pass by pointer? (variation 107)

18. When working with C Programming, why would a developer use null terminator? (variation 356)
19. Which statement best describes the stack in C Programming? (variation 75)
20. What is the most accurate beginner-level explanation of malloc? (variation 72)
21. What is the most accurate beginner-level explanation of malloc? (variation 82)
22. When working with C Programming, why would a developer use null terminator? (variation 86)
23. When working with C Programming, why would a developer use null terminator? (variation 76)
24. What is the most accurate beginner-level explanation of pass by pointer?
25. Which option is a correct use case for preprocessor macros in C Programming?
26. What is the most accurate beginner-level explanation of malloc? (variation 102)
27. A student says 'segmentation faults' is not relevant to real projects. What is the best correction?
28. What is the most accurate beginner-level explanation of pass by pointer? (variation 357)
29. Which statement best describes pointers in C Programming?
30. What is the most accurate beginner-level explanation of pass by pointer? (variation 97)
31. A student says 'header files' is not relevant to real projects. What is the best correction? (variation 104)
32. A student says 'header files' is not relevant to real projects. What is the best correction? (variation 74)
33. Which statement best describes pointers in C Programming? (variation 70)
34. Which option is a correct use case for preprocessor macros in C Programming? (variation 88)
35. A student says 'segmentation faults' is not relevant to real projects. What is the best correction? (variation 89)
36. What is the most accurate beginner-level explanation of pass by pointer? (variation 87)

37. When working with C Programming, why would a developer use arrays? (variation 81)
38. Which option is a correct use case for preprocessor macros in C Programming? (variation 108)
39. A student says 'header files' is not relevant to real projects. What is the best correction? (variation 94)
40. Which option is a correct use case for structs in C Programming? (variation 93)
41. When working with C Programming, why would a developer use null terminator? (variation 106)
42. Which statement best describes the stack in C Programming?
43. When working with C Programming, why would a developer use arrays? (variation 351)
44. When working with C Programming, why would a developer use arrays?
45. Which statement best describes pointers in C Programming? (variation 90)
46. A student says 'header files' is not relevant to real projects. What is the best correction? (variation 354)
47. A student says 'segmentation faults' is not relevant to real projects. What is the best correction? (variation 359)
48. When working with C Programming, why would a developer use arrays? (variation 91)
49. What is the most accurate beginner-level explanation of malloc? (variation 92)
50. Which option is a correct use case for preprocessor macros in C Programming? (variation 78)
51. Which statement best describes pointers in C Programming? (variation 350)
52. Which statement best describes pointers in C Programming? (variation 100)
53. A student says 'header files' is not relevant to real projects. What is the best correction?
54. Which option is a correct use case for structs in C Programming? (variation 103)
55. What is the most accurate beginner-level explanation of malloc?

56. What is the most accurate beginner-level explanation of pass by pointer? (variation 77)

57. What is the most accurate beginner-level explanation of malloc? (variation 352)

58. A student says 'header files' is not relevant to real projects. What is the best correction? (variation 84)

59. Which option is a correct use case for structs in C Programming? (variation 83)

60. Which statement best describes the stack in C Programming? (variation 85)
