

NEET Previous Year Practice 2021 (2021)

Subject: General | Topic: C Programming

1. Which statement best describes pointers in C Programming? (variation 70)
2. A student says 'header files' is not relevant to real projects. What is the best correction? (variation 354)
3. Which option is a correct use case for structs in C Programming?
4. A student says 'segmentation faults' is not relevant to real projects. What is the best correction? (variation 99)
5. When working with C Programming, why would a developer use arrays? (variation 81)
6. A student says 'header files' is not relevant to real projects. What is the best correction? (variation 94)
7. Which statement best describes pointers in C Programming? (variation 100)
8. A student says 'segmentation faults' is not relevant to real projects. What is the best correction? (variation 89)
9. When working with C Programming, why would a developer use null terminator? (variation 96)
10. Which statement best describes pointers in C Programming?
11. Which option is a correct use case for structs in C Programming? (variation 353)
12. What is the most accurate beginner-level explanation of pass by pointer?
13. When working with C Programming, why would a developer use null terminator? (variation 106)
14. What is the most accurate beginner-level explanation of pass by pointer? (variation 77)
15. Which option is a correct use case for preprocessor macros in C Programming? (variation 98)
16. When working with C Programming, why would a developer use arrays?
17. Which statement best describes pointers in C Programming? (variation 80)

18. When working with C Programming, why would a developer use arrays? (variation 351)
19. When working with C Programming, why would a developer use arrays? (variation 71)
20. What is the most accurate beginner-level explanation of malloc?
21. Which option is a correct use case for preprocessor macros in C Programming? (variation 108)
22. When working with C Programming, why would a developer use null terminator? (variation 86)
23. Which statement best describes pointers in C Programming? (variation 90)
24. When working with C Programming, why would a developer use arrays? (variation 91)
25. Which option is a correct use case for preprocessor macros in C Programming? (variation 78)
26. A student says 'segmentation faults' is not relevant to real projects. What is the best correction? (variation 359)
27. What is the most accurate beginner-level explanation of malloc? (variation 102)
28. What is the most accurate beginner-level explanation of malloc? (variation 72)
29. A student says 'header files' is not relevant to real projects. What is the best correction? (variation 104)
30. When working with C Programming, why would a developer use null terminator?
31. A student says 'header files' is not relevant to real projects. What is the best correction?
32. What is the most accurate beginner-level explanation of pass by pointer? (variation 97)
33. Which option is a correct use case for structs in C Programming? (variation 83)
34. What is the most accurate beginner-level explanation of malloc? (variation 82)
35. A student says 'segmentation faults' is not relevant to real projects. What is the best correction? (variation 109)
36. A student says 'segmentation faults' is not relevant to real projects. What is the best correction?

37. Which option is a correct use case for preprocessor macros in C Programming? (variation 88)
38. Which option is a correct use case for structs in C Programming? (variation 93)
39. Which option is a correct use case for preprocessor macros in C Programming? (variation 358)
40. A student says 'header files' is not relevant to real projects. What is the best correction? (variation 84)
41. Which statement best describes the stack in C Programming? (variation 105)
42. Which option is a correct use case for preprocessor macros in C Programming?
43. What is the most accurate beginner-level explanation of malloc? (variation 352)
44. When working with C Programming, why would a developer use arrays? (variation 101)
45. Which statement best describes pointers in C Programming? (variation 350)
46. Which statement best describes the stack in C Programming?
47. Which statement best describes the stack in C Programming? (variation 355)
48. What is the most accurate beginner-level explanation of pass by pointer? (variation 87)
49. When working with C Programming, why would a developer use null terminator? (variation 76)
50. Which statement best describes the stack in C Programming? (variation 95)
51. A student says 'segmentation faults' is not relevant to real projects. What is the best correction? (variation 79)
52. What is the most accurate beginner-level explanation of pass by pointer? (variation 357)
53. Which statement best describes the stack in C Programming? (variation 85)
54. What is the most accurate beginner-level explanation of pass by pointer? (variation 107)
55. Which option is a correct use case for structs in C Programming? (variation 73)

56. When working with C Programming, why would a developer use null terminator? (variation 356)
57. Which statement best describes the stack in C Programming? (variation 75)
58. Which option is a correct use case for structs in C Programming? (variation 103)
59. What is the most accurate beginner-level explanation of malloc? (variation 92)
60. A student says 'header files' is not relevant to real projects. What is the best correction? (variation 74)
