

NEET Previous Year Practice 2022 (2022)

Subject: General | Topic: C Programming

1. What is the most accurate beginner-level explanation of malloc? (variation 102)
2. A student says 'header files' is not relevant to real projects. What is the best correction? (variation 74)
3. Which statement best describes pointers in C Programming? (variation 350)
4. Which option is a correct use case for preprocessor macros in C Programming? (variation 78)
5. Which option is a correct use case for structs in C Programming? (variation 73)
6. When working with C Programming, why would a developer use arrays? (variation 91)
7. What is the most accurate beginner-level explanation of pass by pointer? (variation 357)
8. Which option is a correct use case for preprocessor macros in C Programming? (variation 358)
9. Which option is a correct use case for structs in C Programming? (variation 83)
10. What is the most accurate beginner-level explanation of pass by pointer? (variation 77)
11. What is the most accurate beginner-level explanation of pass by pointer? (variation 97)
12. What is the most accurate beginner-level explanation of malloc? (variation 72)
13. Which statement best describes the stack in C Programming?
14. Which statement best describes the stack in C Programming? (variation 105)
15. Which statement best describes pointers in C Programming? (variation 100)
16. What is the most accurate beginner-level explanation of pass by pointer? (variation 107)
17. When working with C Programming, why would a developer use arrays?

18. Which option is a correct use case for preprocessor macros in C Programming? (variation 98)
19. What is the most accurate beginner-level explanation of pass by pointer?
20. A student says 'header files' is not relevant to real projects. What is the best correction? (variation 354)
21. What is the most accurate beginner-level explanation of malloc? (variation 352)
22. When working with C Programming, why would a developer use arrays? (variation 351)
23. A student says 'segmentation faults' is not relevant to real projects. What is the best correction?
24. When working with C Programming, why would a developer use null terminator? (variation 356)
25. Which option is a correct use case for preprocessor macros in C Programming? (variation 108)
26. What is the most accurate beginner-level explanation of malloc?
27. Which statement best describes the stack in C Programming? (variation 85)
28. Which option is a correct use case for structs in C Programming? (variation 353)
29. When working with C Programming, why would a developer use null terminator? (variation 106)
30. Which statement best describes the stack in C Programming? (variation 75)
31. When working with C Programming, why would a developer use null terminator? (variation 96)
32. What is the most accurate beginner-level explanation of malloc? (variation 82)
33. Which statement best describes pointers in C Programming? (variation 70)
34. Which option is a correct use case for preprocessor macros in C Programming?
35. A student says 'segmentation faults' is not relevant to real projects. What is the best correction? (variation 89)
36. What is the most accurate beginner-level explanation of pass by pointer? (variation 87)

37. A student says 'segmentation faults' is not relevant to real projects. What is the best correction? (variation 109)
38. A student says 'segmentation faults' is not relevant to real projects. What is the best correction? (variation 99)
39. What is the most accurate beginner-level explanation of malloc? (variation 92)
40. When working with C Programming, why would a developer use null terminator? (variation 86)
41. Which statement best describes pointers in C Programming?
42. When working with C Programming, why would a developer use null terminator?
43. When working with C Programming, why would a developer use arrays? (variation 81)
44. Which statement best describes the stack in C Programming? (variation 355)
45. Which option is a correct use case for structs in C Programming? (variation 103)
46. When working with C Programming, why would a developer use arrays? (variation 101)
47. A student says 'header files' is not relevant to real projects. What is the best correction? (variation 84)
48. A student says 'header files' is not relevant to real projects. What is the best correction? (variation 104)
49. A student says 'segmentation faults' is not relevant to real projects. What is the best correction? (variation 79)
50. Which option is a correct use case for structs in C Programming?
51. Which statement best describes pointers in C Programming? (variation 80)
52. Which statement best describes pointers in C Programming? (variation 90)
53. Which statement best describes the stack in C Programming? (variation 95)
54. When working with C Programming, why would a developer use null terminator? (variation 76)
55. Which option is a correct use case for preprocessor macros in C Programming? (variation 88)

56. A student says 'header files' is not relevant to real projects. What is the best correction?
57. Which option is a correct use case for structs in C Programming? (variation 93)
58. A student says 'header files' is not relevant to real projects. What is the best correction? (variation 94)
59. When working with C Programming, why would a developer use arrays? (variation 71)
60. A student says 'segmentation faults' is not relevant to real projects. What is the best correction? (variation 359)
