

NEET Previous Year Practice 2023 (2023)

Subject: General | Topic: C Programming

1. When working with C Programming, why would a developer use null terminator? (variation 76)
2. A student says 'segmentation faults' is not relevant to real projects. What is the best correction? (variation 79)
3. What is the most accurate beginner-level explanation of pass by pointer? (variation 357)
4. A student says 'header files' is not relevant to real projects. What is the best correction? (variation 104)
5. Which statement best describes the stack in C Programming? (variation 95)
6. What is the most accurate beginner-level explanation of pass by pointer? (variation 77)
7. A student says 'header files' is not relevant to real projects. What is the best correction?
8. When working with C Programming, why would a developer use arrays? (variation 101)
9. When working with C Programming, why would a developer use null terminator?
10. A student says 'segmentation faults' is not relevant to real projects. What is the best correction? (variation 359)
11. A student says 'header files' is not relevant to real projects. What is the best correction? (variation 94)
12. What is the most accurate beginner-level explanation of malloc? (variation 92)
13. When working with C Programming, why would a developer use null terminator? (variation 96)
14. A student says 'header files' is not relevant to real projects. What is the best correction? (variation 84)
15. What is the most accurate beginner-level explanation of pass by pointer? (variation 97)
16. A student says 'header files' is not relevant to real projects. What is the best correction? (variation 74)
17. When working with C Programming, why would a developer use null terminator? (variation 356)

18. Which option is a correct use case for structs in C Programming?
19. What is the most accurate beginner-level explanation of malloc? (variation 82)
20. What is the most accurate beginner-level explanation of malloc? (variation 72)
21. When working with C Programming, why would a developer use arrays? (variation 71)
22. Which statement best describes pointers in C Programming? (variation 90)
23. Which statement best describes pointers in C Programming?
24. Which statement best describes pointers in C Programming? (variation 70)
25. Which option is a correct use case for preprocessor macros in C Programming? (variation 78)
26. Which statement best describes the stack in C Programming? (variation 355)
27. Which option is a correct use case for structs in C Programming? (variation 353)
28. Which statement best describes the stack in C Programming? (variation 85)
29. Which statement best describes pointers in C Programming? (variation 100)
30. What is the most accurate beginner-level explanation of malloc? (variation 102)
31. Which statement best describes pointers in C Programming? (variation 350)
32. A student says 'segmentation faults' is not relevant to real projects. What is the best correction? (variation 99)
33. When working with C Programming, why would a developer use arrays? (variation 81)
34. Which option is a correct use case for preprocessor macros in C Programming? (variation 108)
35. When working with C Programming, why would a developer use arrays? (variation 351)
36. When working with C Programming, why would a developer use null terminator? (variation 86)

37. A student says 'segmentation faults' is not relevant to real projects. What is the best correction? (variation 109)
38. What is the most accurate beginner-level explanation of pass by pointer?
39. What is the most accurate beginner-level explanation of malloc?
40. Which statement best describes pointers in C Programming? (variation 80)
41. A student says 'header files' is not relevant to real projects. What is the best correction? (variation 354)
42. Which option is a correct use case for preprocessor macros in C Programming?
43. When working with C Programming, why would a developer use arrays? (variation 91)
44. Which statement best describes the stack in C Programming? (variation 105)
45. Which statement best describes the stack in C Programming? (variation 75)
46. Which option is a correct use case for preprocessor macros in C Programming? (variation 88)
47. Which statement best describes the stack in C Programming?
48. A student says 'segmentation faults' is not relevant to real projects. What is the best correction? (variation 89)
49. When working with C Programming, why would a developer use null terminator? (variation 106)
50. Which option is a correct use case for structs in C Programming? (variation 103)
51. Which option is a correct use case for structs in C Programming? (variation 83)
52. What is the most accurate beginner-level explanation of malloc? (variation 352)
53. Which option is a correct use case for preprocessor macros in C Programming? (variation 98)
54. Which option is a correct use case for structs in C Programming? (variation 93)
55. When working with C Programming, why would a developer use arrays?

56. What is the most accurate beginner-level explanation of pass by pointer? (variation 107)
57. Which option is a correct use case for preprocessor macros in C Programming? (variation 358)
58. What is the most accurate beginner-level explanation of pass by pointer? (variation 87)
59. A student says 'segmentation faults' is not relevant to real projects. What is the best correction?
60. Which option is a correct use case for structs in C Programming? (variation 73)
