

NEET Previous Year Practice 2024 (2024)

Subject: General | Topic: C Programming

1. Which statement best describes pointers in C Programming? (variation 100)
2. Which statement best describes the stack in C Programming? (variation 75)
3. What is the most accurate beginner-level explanation of pass by pointer? (variation 357)
4. When working with C Programming, why would a developer use null terminator? (variation 96)
5. Which option is a correct use case for structs in C Programming? (variation 73)
6. Which option is a correct use case for preprocessor macros in C Programming? (variation 98)
7. Which option is a correct use case for structs in C Programming? (variation 353)
8. What is the most accurate beginner-level explanation of pass by pointer? (variation 87)
9. When working with C Programming, why would a developer use null terminator? (variation 356)
10. Which option is a correct use case for preprocessor macros in C Programming? (variation 108)
11. When working with C Programming, why would a developer use arrays? (variation 101)
12. Which statement best describes pointers in C Programming? (variation 80)
13. Which statement best describes the stack in C Programming? (variation 85)
14. What is the most accurate beginner-level explanation of pass by pointer? (variation 97)
15. Which statement best describes the stack in C Programming? (variation 95)
16. What is the most accurate beginner-level explanation of pass by pointer?
17. A student says 'segmentation faults' is not relevant to real projects. What is the best correction? (variation 89)

18. Which statement best describes pointers in C Programming? (variation 70)
19. What is the most accurate beginner-level explanation of malloc? (variation 82)
20. What is the most accurate beginner-level explanation of malloc? (variation 102)
21. A student says 'header files' is not relevant to real projects. What is the best correction? (variation 94)
22. When working with C Programming, why would a developer use null terminator? (variation 106)
23. Which statement best describes pointers in C Programming? (variation 350)
24. Which option is a correct use case for preprocessor macros in C Programming? (variation 88)
25. A student says 'segmentation faults' is not relevant to real projects. What is the best correction? (variation 109)
26. When working with C Programming, why would a developer use null terminator? (variation 86)
27. When working with C Programming, why would a developer use arrays?
28. A student says 'header files' is not relevant to real projects. What is the best correction? (variation 354)
29. A student says 'segmentation faults' is not relevant to real projects. What is the best correction? (variation 79)
30. When working with C Programming, why would a developer use arrays? (variation 81)
31. Which statement best describes the stack in C Programming?
32. When working with C Programming, why would a developer use arrays? (variation 91)
33. When working with C Programming, why would a developer use null terminator?
34. Which statement best describes pointers in C Programming?
35. What is the most accurate beginner-level explanation of malloc? (variation 352)
36. What is the most accurate beginner-level explanation of malloc? (variation 92)

37. Which statement best describes pointers in C Programming? (variation 90)
38. What is the most accurate beginner-level explanation of malloc?
39. What is the most accurate beginner-level explanation of pass by pointer? (variation 77)
40. Which option is a correct use case for structs in C Programming?
41. What is the most accurate beginner-level explanation of malloc? (variation 72)
42. Which option is a correct use case for structs in C Programming? (variation 93)
43. A student says 'header files' is not relevant to real projects. What is the best correction?
44. A student says 'header files' is not relevant to real projects. What is the best correction? (variation 74)
45. A student says 'segmentation faults' is not relevant to real projects. What is the best correction?
46. Which statement best describes the stack in C Programming? (variation 105)
47. Which option is a correct use case for structs in C Programming? (variation 83)
48. A student says 'header files' is not relevant to real projects. What is the best correction? (variation 84)
49. A student says 'header files' is not relevant to real projects. What is the best correction? (variation 104)
50. A student says 'segmentation faults' is not relevant to real projects. What is the best correction? (variation 359)
51. What is the most accurate beginner-level explanation of pass by pointer? (variation 107)
52. Which option is a correct use case for preprocessor macros in C Programming? (variation 78)
53. Which option is a correct use case for preprocessor macros in C Programming? (variation 358)
54. Which option is a correct use case for structs in C Programming? (variation 103)
55. Which option is a correct use case for preprocessor macros in C Programming?

56. Which statement best describes the stack in C Programming? (variation 355)
57. A student says 'segmentation faults' is not relevant to real projects. What is the best correction? (variation 99)
58. When working with C Programming, why would a developer use arrays? (variation 351)
59. When working with C Programming, why would a developer use arrays? (variation 71)
60. When working with C Programming, why would a developer use null terminator? (variation 76)
