

NEET Previous Year Practice 2026 (2026)

Subject: General | Topic: C Programming

1. A student says 'segmentation faults' is not relevant to real projects. What is the best correction?
2. Which statement best describes the stack in C Programming? (variation 105)
3. What is the most accurate beginner-level explanation of pass by pointer?
4. What is the most accurate beginner-level explanation of pass by pointer? (variation 97)
5. Which option is a correct use case for preprocessor macros in C Programming? (variation 358)
6. When working with C Programming, why would a developer use arrays?
7. Which option is a correct use case for preprocessor macros in C Programming? (variation 98)
8. When working with C Programming, why would a developer use null terminator? (variation 86)
9. When working with C Programming, why would a developer use null terminator? (variation 106)
10. A student says 'segmentation faults' is not relevant to real projects. What is the best correction? (variation 109)
11. Which statement best describes pointers in C Programming? (variation 100)
12. Which statement best describes the stack in C Programming?
13. Which statement best describes the stack in C Programming? (variation 95)
14. A student says 'segmentation faults' is not relevant to real projects. What is the best correction? (variation 79)
15. A student says 'segmentation faults' is not relevant to real projects. What is the best correction? (variation 89)
16. A student says 'segmentation faults' is not relevant to real projects. What is the best correction? (variation 99)
17. Which statement best describes pointers in C Programming? (variation 80)

18. Which statement best describes the stack in C Programming? (variation 75)
19. When working with C Programming, why would a developer use arrays? (variation 91)
20. Which option is a correct use case for preprocessor macros in C Programming? (variation 78)
21. A student says 'header files' is not relevant to real projects. What is the best correction?
22. A student says 'segmentation faults' is not relevant to real projects. What is the best correction? (variation 359)
23. Which statement best describes the stack in C Programming? (variation 355)
24. When working with C Programming, why would a developer use arrays? (variation 81)
25. Which option is a correct use case for structs in C Programming? (variation 353)
26. When working with C Programming, why would a developer use null terminator? (variation 76)
27. Which statement best describes pointers in C Programming? (variation 70)
28. When working with C Programming, why would a developer use arrays? (variation 101)
29. Which option is a correct use case for preprocessor macros in C Programming? (variation 88)
30. Which option is a correct use case for structs in C Programming? (variation 73)
31. A student says 'header files' is not relevant to real projects. What is the best correction? (variation 354)
32. Which statement best describes pointers in C Programming? (variation 350)
33. When working with C Programming, why would a developer use null terminator?
34. Which option is a correct use case for preprocessor macros in C Programming? (variation 108)
35. What is the most accurate beginner-level explanation of pass by pointer? (variation 107)
36. Which option is a correct use case for structs in C Programming? (variation 93)

37. What is the most accurate beginner-level explanation of malloc? (variation 92)
38. When working with C Programming, why would a developer use null terminator? (variation 96)
39. A student says 'header files' is not relevant to real projects. What is the best correction? (variation 94)
40. What is the most accurate beginner-level explanation of malloc?
41. What is the most accurate beginner-level explanation of pass by pointer? (variation 357)
42. When working with C Programming, why would a developer use null terminator? (variation 356)
43. What is the most accurate beginner-level explanation of malloc? (variation 102)
44. Which statement best describes pointers in C Programming? (variation 90)
45. When working with C Programming, why would a developer use arrays? (variation 351)
46. When working with C Programming, why would a developer use arrays? (variation 71)
47. What is the most accurate beginner-level explanation of pass by pointer? (variation 77)
48. What is the most accurate beginner-level explanation of malloc? (variation 82)
49. What is the most accurate beginner-level explanation of malloc? (variation 72)
50. Which option is a correct use case for structs in C Programming?
51. Which option is a correct use case for structs in C Programming? (variation 83)
52. Which option is a correct use case for structs in C Programming? (variation 103)
53. What is the most accurate beginner-level explanation of malloc? (variation 352)
54. A student says 'header files' is not relevant to real projects. What is the best correction? (variation 74)
55. A student says 'header files' is not relevant to real projects. What is the best correction? (variation 84)

56. Which statement best describes pointers in C Programming?

57. A student says 'header files' is not relevant to real projects. What is the best correction? (variation 104)

58. What is the most accurate beginner-level explanation of pass by pointer? (variation 87)

59. Which option is a correct use case for preprocessor macros in C Programming?

60. Which statement best describes the stack in C Programming? (variation 85)
