

UPSC Previous Year Practice 2018 (2018)

Subject: General | Topic: C Programming

1. What is the most accurate beginner-level explanation of malloc? (variation 352)
2. When working with C Programming, why would a developer use arrays? (variation 101)
3. Which statement best describes pointers in C Programming? (variation 70)
4. What is the most accurate beginner-level explanation of pass by pointer?
5. A student says 'segmentation faults' is not relevant to real projects. What is the best correction? (variation 99)
6. A student says 'header files' is not relevant to real projects. What is the best correction? (variation 84)
7. When working with C Programming, why would a developer use null terminator? (variation 76)
8. A student says 'segmentation faults' is not relevant to real projects. What is the best correction?
9. Which statement best describes the stack in C Programming?
10. Which statement best describes the stack in C Programming? (variation 95)
11. Which statement best describes the stack in C Programming? (variation 75)
12. Which option is a correct use case for structs in C Programming? (variation 353)
13. Which statement best describes the stack in C Programming? (variation 355)
14. When working with C Programming, why would a developer use arrays? (variation 351)
15. When working with C Programming, why would a developer use null terminator? (variation 96)
16. Which statement best describes pointers in C Programming? (variation 80)
17. When working with C Programming, why would a developer use arrays? (variation 71)

18. Which statement best describes pointers in C Programming?
19. A student says 'header files' is not relevant to real projects. What is the best correction? (variation 104)
20. Which statement best describes the stack in C Programming? (variation 105)
21. What is the most accurate beginner-level explanation of pass by pointer? (variation 357)
22. Which statement best describes the stack in C Programming? (variation 85)
23. What is the most accurate beginner-level explanation of malloc?
24. What is the most accurate beginner-level explanation of pass by pointer? (variation 77)
25. What is the most accurate beginner-level explanation of malloc? (variation 82)
26. What is the most accurate beginner-level explanation of malloc? (variation 102)
27. Which option is a correct use case for preprocessor macros in C Programming? (variation 88)
28. Which option is a correct use case for preprocessor macros in C Programming? (variation 108)
29. Which statement best describes pointers in C Programming? (variation 100)
30. Which statement best describes pointers in C Programming? (variation 350)
31. When working with C Programming, why would a developer use arrays? (variation 81)
32. Which option is a correct use case for structs in C Programming? (variation 83)
33. When working with C Programming, why would a developer use null terminator? (variation 106)
34. Which option is a correct use case for structs in C Programming? (variation 93)
35. A student says 'segmentation faults' is not relevant to real projects. What is the best correction? (variation 79)
36. When working with C Programming, why would a developer use null terminator?

37. When working with C Programming, why would a developer use null terminator? (variation 356)
38. Which option is a correct use case for preprocessor macros in C Programming? (variation 78)
39. What is the most accurate beginner-level explanation of malloc? (variation 72)
40. Which statement best describes pointers in C Programming? (variation 90)
41. Which option is a correct use case for structs in C Programming?
42. A student says 'header files' is not relevant to real projects. What is the best correction?
43. A student says 'segmentation faults' is not relevant to real projects. What is the best correction? (variation 89)
44. Which option is a correct use case for preprocessor macros in C Programming?
45. A student says 'header files' is not relevant to real projects. What is the best correction? (variation 354)
46. Which option is a correct use case for structs in C Programming? (variation 73)
47. A student says 'header files' is not relevant to real projects. What is the best correction? (variation 94)
48. What is the most accurate beginner-level explanation of pass by pointer? (variation 107)
49. When working with C Programming, why would a developer use null terminator? (variation 86)
50. A student says 'segmentation faults' is not relevant to real projects. What is the best correction? (variation 109)
51. Which option is a correct use case for preprocessor macros in C Programming? (variation 98)
52. When working with C Programming, why would a developer use arrays?
53. When working with C Programming, why would a developer use arrays? (variation 91)
54. Which option is a correct use case for preprocessor macros in C Programming? (variation 358)
55. Which option is a correct use case for structs in C Programming? (variation 103)

56. What is the most accurate beginner-level explanation of pass by pointer? (variation 97)

57. What is the most accurate beginner-level explanation of pass by pointer? (variation 87)

58. A student says 'segmentation faults' is not relevant to real projects. What is the best correction? (variation 359)

59. What is the most accurate beginner-level explanation of malloc? (variation 92)

60. A student says 'header files' is not relevant to real projects. What is the best correction? (variation 74)
