

UPSC Previous Year Practice 2019 (2019)

Subject: General | Topic: C Programming

1. Which option is a correct use case for structs in C Programming? (variation 93)
2. What is the most accurate beginner-level explanation of malloc? (variation 82)
3. What is the most accurate beginner-level explanation of pass by pointer? (variation 77)
4. Which statement best describes pointers in C Programming? (variation 100)
5. What is the most accurate beginner-level explanation of malloc? (variation 92)
6. What is the most accurate beginner-level explanation of pass by pointer? (variation 97)
7. Which option is a correct use case for structs in C Programming?
8. A student says 'segmentation faults' is not relevant to real projects. What is the best correction?
9. A student says 'segmentation faults' is not relevant to real projects. What is the best correction? (variation 109)
10. What is the most accurate beginner-level explanation of pass by pointer? (variation 107)
11. When working with C Programming, why would a developer use arrays? (variation 71)
12. Which option is a correct use case for preprocessor macros in C Programming? (variation 78)
13. When working with C Programming, why would a developer use null terminator?
14. Which option is a correct use case for preprocessor macros in C Programming? (variation 98)
15. Which statement best describes the stack in C Programming? (variation 95)
16. Which option is a correct use case for preprocessor macros in C Programming? (variation 108)
17. Which statement best describes the stack in C Programming? (variation 85)

18. Which statement best describes pointers in C Programming? (variation 90)
19. Which statement best describes the stack in C Programming? (variation 105)
20. Which statement best describes the stack in C Programming? (variation 75)
21. A student says 'header files' is not relevant to real projects. What is the best correction? (variation 74)
22. What is the most accurate beginner-level explanation of malloc?
23. When working with C Programming, why would a developer use arrays? (variation 101)
24. A student says 'segmentation faults' is not relevant to real projects. What is the best correction? (variation 99)
25. A student says 'header files' is not relevant to real projects. What is the best correction? (variation 84)
26. Which option is a correct use case for preprocessor macros in C Programming? (variation 358)
27. When working with C Programming, why would a developer use null terminator? (variation 96)
28. When working with C Programming, why would a developer use null terminator? (variation 86)
29. Which statement best describes the stack in C Programming? (variation 355)
30. When working with C Programming, why would a developer use null terminator? (variation 106)
31. A student says 'header files' is not relevant to real projects. What is the best correction? (variation 94)
32. A student says 'header files' is not relevant to real projects. What is the best correction?
33. A student says 'header files' is not relevant to real projects. What is the best correction? (variation 354)
34. What is the most accurate beginner-level explanation of malloc? (variation 352)
35. Which statement best describes the stack in C Programming?
36. Which statement best describes pointers in C Programming? (variation 350)

37. Which option is a correct use case for structs in C Programming? (variation 83)
38. A student says 'segmentation faults' is not relevant to real projects. What is the best correction? (variation 359)
39. What is the most accurate beginner-level explanation of malloc? (variation 72)
40. What is the most accurate beginner-level explanation of pass by pointer?
41. What is the most accurate beginner-level explanation of pass by pointer? (variation 87)
42. Which option is a correct use case for structs in C Programming? (variation 73)
43. Which statement best describes pointers in C Programming? (variation 70)
44. Which statement best describes pointers in C Programming?
45. When working with C Programming, why would a developer use null terminator? (variation 356)
46. When working with C Programming, why would a developer use arrays? (variation 91)
47. When working with C Programming, why would a developer use arrays? (variation 81)
48. Which option is a correct use case for preprocessor macros in C Programming?
49. When working with C Programming, why would a developer use arrays? (variation 351)
50. A student says 'header files' is not relevant to real projects. What is the best correction? (variation 104)
51. A student says 'segmentation faults' is not relevant to real projects. What is the best correction? (variation 89)
52. A student says 'segmentation faults' is not relevant to real projects. What is the best correction? (variation 79)
53. Which option is a correct use case for preprocessor macros in C Programming? (variation 88)
54. Which option is a correct use case for structs in C Programming? (variation 353)
55. When working with C Programming, why would a developer use arrays?

56. When working with C Programming, why would a developer use null terminator? (variation 76)

57. Which option is a correct use case for structs in C Programming? (variation 103)

58. What is the most accurate beginner-level explanation of malloc? (variation 102)

59. Which statement best describes pointers in C Programming? (variation 80)

60. What is the most accurate beginner-level explanation of pass by pointer? (variation 357)
