

UPSC Previous Year Practice 2020 (2020)

Subject: General | Topic: C Programming

1. When working with C Programming, why would a developer use arrays? (variation 71)
2. A student says 'header files' is not relevant to real projects. What is the best correction? (variation 94)
3. When working with C Programming, why would a developer use null terminator? (variation 76)
4. What is the most accurate beginner-level explanation of pass by pointer? (variation 357)
5. Which option is a correct use case for preprocessor macros in C Programming?
6. A student says 'header files' is not relevant to real projects. What is the best correction? (variation 354)
7. Which option is a correct use case for structs in C Programming? (variation 83)
8. What is the most accurate beginner-level explanation of pass by pointer?
9. When working with C Programming, why would a developer use arrays? (variation 81)
10. When working with C Programming, why would a developer use arrays? (variation 101)
11. What is the most accurate beginner-level explanation of malloc? (variation 352)
12. Which option is a correct use case for structs in C Programming?
13. When working with C Programming, why would a developer use null terminator? (variation 96)
14. What is the most accurate beginner-level explanation of malloc? (variation 72)
15. Which statement best describes the stack in C Programming? (variation 355)
16. A student says 'segmentation faults' is not relevant to real projects. What is the best correction?
17. Which option is a correct use case for preprocessor macros in C Programming? (variation 88)

18. A student says 'header files' is not relevant to real projects. What is the best correction? (variation 104)
19. What is the most accurate beginner-level explanation of pass by pointer? (variation 97)
20. A student says 'segmentation faults' is not relevant to real projects. What is the best correction? (variation 359)
21. When working with C Programming, why would a developer use null terminator?
22. Which option is a correct use case for preprocessor macros in C Programming? (variation 78)
23. Which statement best describes pointers in C Programming? (variation 90)
24. When working with C Programming, why would a developer use null terminator? (variation 356)
25. Which option is a correct use case for structs in C Programming? (variation 103)
26. Which option is a correct use case for structs in C Programming? (variation 93)
27. What is the most accurate beginner-level explanation of pass by pointer? (variation 87)
28. Which statement best describes pointers in C Programming? (variation 350)
29. What is the most accurate beginner-level explanation of malloc? (variation 102)
30. A student says 'header files' is not relevant to real projects. What is the best correction?
31. A student says 'header files' is not relevant to real projects. What is the best correction? (variation 84)
32. Which statement best describes the stack in C Programming? (variation 95)
33. What is the most accurate beginner-level explanation of malloc? (variation 92)
34. When working with C Programming, why would a developer use null terminator? (variation 86)
35. What is the most accurate beginner-level explanation of malloc?
36. A student says 'segmentation faults' is not relevant to real projects. What is the best correction? (variation 109)

37. What is the most accurate beginner-level explanation of malloc? (variation 82)
38. A student says 'segmentation faults' is not relevant to real projects. What is the best correction? (variation 79)
39. Which option is a correct use case for structs in C Programming? (variation 353)
40. Which option is a correct use case for preprocessor macros in C Programming? (variation 108)
41. When working with C Programming, why would a developer use arrays?
42. A student says 'segmentation faults' is not relevant to real projects. What is the best correction? (variation 89)
43. Which statement best describes the stack in C Programming? (variation 105)
44. When working with C Programming, why would a developer use arrays? (variation 91)
45. Which statement best describes the stack in C Programming? (variation 85)
46. When working with C Programming, why would a developer use null terminator? (variation 106)
47. Which statement best describes the stack in C Programming? (variation 75)
48. What is the most accurate beginner-level explanation of pass by pointer? (variation 77)
49. A student says 'segmentation faults' is not relevant to real projects. What is the best correction? (variation 99)
50. Which statement best describes the stack in C Programming?
51. A student says 'header files' is not relevant to real projects. What is the best correction? (variation 74)
52. Which option is a correct use case for structs in C Programming? (variation 73)
53. Which statement best describes pointers in C Programming?
54. Which statement best describes pointers in C Programming? (variation 100)
55. Which option is a correct use case for preprocessor macros in C Programming? (variation 358)

56. What is the most accurate beginner-level explanation of pass by pointer? (variation 107)

57. Which statement best describes pointers in C Programming? (variation 70)

58. When working with C Programming, why would a developer use arrays? (variation 351)

59. Which option is a correct use case for preprocessor macros in C Programming? (variation 98)

60. Which statement best describes pointers in C Programming? (variation 80)
