

UPSC Previous Year Practice 2022 (2022)

Subject: General | Topic: C Programming

1. A student says 'segmentation faults' is not relevant to real projects. What is the best correction? (variation 99)
2. A student says 'header files' is not relevant to real projects. What is the best correction? (variation 94)
3. Which statement best describes the stack in C Programming? (variation 355)
4. Which option is a correct use case for preprocessor macros in C Programming? (variation 358)
5. Which statement best describes the stack in C Programming? (variation 85)
6. Which statement best describes the stack in C Programming? (variation 95)
7. Which option is a correct use case for preprocessor macros in C Programming? (variation 88)
8. A student says 'header files' is not relevant to real projects. What is the best correction? (variation 104)
9. Which option is a correct use case for preprocessor macros in C Programming? (variation 98)
10. Which option is a correct use case for structs in C Programming?
11. Which statement best describes pointers in C Programming? (variation 90)
12. When working with C Programming, why would a developer use null terminator? (variation 106)
13. A student says 'segmentation faults' is not relevant to real projects. What is the best correction?
14. Which statement best describes pointers in C Programming? (variation 80)
15. What is the most accurate beginner-level explanation of malloc? (variation 82)
16. A student says 'header files' is not relevant to real projects. What is the best correction? (variation 74)
17. When working with C Programming, why would a developer use null terminator?

18. Which statement best describes pointers in C Programming? (variation 350)
19. What is the most accurate beginner-level explanation of malloc? (variation 72)
20. When working with C Programming, why would a developer use arrays? (variation 81)
21. A student says 'segmentation faults' is not relevant to real projects. What is the best correction? (variation 89)
22. When working with C Programming, why would a developer use arrays? (variation 101)
23. What is the most accurate beginner-level explanation of pass by pointer? (variation 77)
24. Which option is a correct use case for structs in C Programming? (variation 83)
25. A student says 'segmentation faults' is not relevant to real projects. What is the best correction? (variation 79)
26. What is the most accurate beginner-level explanation of pass by pointer?
27. What is the most accurate beginner-level explanation of malloc? (variation 102)
28. Which option is a correct use case for structs in C Programming? (variation 73)
29. A student says 'segmentation faults' is not relevant to real projects. What is the best correction? (variation 109)
30. What is the most accurate beginner-level explanation of pass by pointer? (variation 107)
31. When working with C Programming, why would a developer use arrays? (variation 351)
32. What is the most accurate beginner-level explanation of pass by pointer? (variation 357)
33. When working with C Programming, why would a developer use arrays?
34. Which option is a correct use case for structs in C Programming? (variation 103)
35. Which statement best describes pointers in C Programming?
36. What is the most accurate beginner-level explanation of pass by pointer? (variation 87)

37. What is the most accurate beginner-level explanation of malloc?
38. Which statement best describes pointers in C Programming? (variation 100)
39. When working with C Programming, why would a developer use null terminator? (variation 356)
40. Which option is a correct use case for structs in C Programming? (variation 93)
41. What is the most accurate beginner-level explanation of pass by pointer? (variation 97)
42. What is the most accurate beginner-level explanation of malloc? (variation 92)
43. When working with C Programming, why would a developer use null terminator? (variation 76)
44. Which option is a correct use case for preprocessor macros in C Programming? (variation 108)
45. A student says 'segmentation faults' is not relevant to real projects. What is the best correction? (variation 359)
46. When working with C Programming, why would a developer use arrays? (variation 71)
47. Which statement best describes the stack in C Programming?
48. Which statement best describes the stack in C Programming? (variation 105)
49. Which statement best describes the stack in C Programming? (variation 75)
50. Which option is a correct use case for preprocessor macros in C Programming? (variation 78)
51. Which statement best describes pointers in C Programming? (variation 70)
52. A student says 'header files' is not relevant to real projects. What is the best correction? (variation 354)
53. A student says 'header files' is not relevant to real projects. What is the best correction?
54. When working with C Programming, why would a developer use arrays? (variation 91)
55. What is the most accurate beginner-level explanation of malloc? (variation 352)

56. When working with C Programming, why would a developer use null terminator? (variation 96)

57. A student says 'header files' is not relevant to real projects. What is the best correction? (variation 84)

58. Which option is a correct use case for preprocessor macros in C Programming?

59. Which option is a correct use case for structs in C Programming? (variation 353)

60. When working with C Programming, why would a developer use null terminator? (variation 86)
