

UPSC Previous Year Practice 2023 (2023)

Subject: General | Topic: C Programming

1. Which option is a correct use case for preprocessor macros in C Programming? (variation 358)
2. What is the most accurate beginner-level explanation of pass by pointer? (variation 77)
3. Which option is a correct use case for structs in C Programming? (variation 93)
4. Which option is a correct use case for preprocessor macros in C Programming? (variation 108)
5. Which statement best describes the stack in C Programming? (variation 95)
6. Which option is a correct use case for structs in C Programming? (variation 353)
7. Which option is a correct use case for preprocessor macros in C Programming?
8. What is the most accurate beginner-level explanation of malloc? (variation 72)
9. When working with C Programming, why would a developer use arrays?
10. When working with C Programming, why would a developer use null terminator? (variation 356)
11. Which option is a correct use case for preprocessor macros in C Programming? (variation 78)
12. A student says 'header files' is not relevant to real projects. What is the best correction? (variation 94)
13. When working with C Programming, why would a developer use null terminator? (variation 96)
14. A student says 'segmentation faults' is not relevant to real projects. What is the best correction? (variation 99)
15. A student says 'header files' is not relevant to real projects. What is the best correction? (variation 354)
16. When working with C Programming, why would a developer use null terminator? (variation 76)
17. Which statement best describes pointers in C Programming? (variation 100)

18. A student says 'segmentation faults' is not relevant to real projects. What is the best correction? (variation 109)
19. A student says 'segmentation faults' is not relevant to real projects. What is the best correction? (variation 359)
20. Which statement best describes the stack in C Programming? (variation 355)
21. A student says 'header files' is not relevant to real projects. What is the best correction? (variation 104)
22. What is the most accurate beginner-level explanation of malloc? (variation 92)
23. Which statement best describes pointers in C Programming? (variation 80)
24. What is the most accurate beginner-level explanation of pass by pointer? (variation 357)
25. Which option is a correct use case for structs in C Programming? (variation 83)
26. A student says 'segmentation faults' is not relevant to real projects. What is the best correction?
27. A student says 'header files' is not relevant to real projects. What is the best correction?
28. When working with C Programming, why would a developer use arrays? (variation 81)
29. What is the most accurate beginner-level explanation of pass by pointer? (variation 87)
30. What is the most accurate beginner-level explanation of malloc? (variation 352)
31. Which statement best describes the stack in C Programming?
32. When working with C Programming, why would a developer use null terminator?
33. Which statement best describes pointers in C Programming? (variation 350)
34. Which statement best describes the stack in C Programming? (variation 75)
35. What is the most accurate beginner-level explanation of pass by pointer? (variation 107)
36. Which option is a correct use case for preprocessor macros in C Programming? (variation 88)

37. A student says 'segmentation faults' is not relevant to real projects. What is the best correction? (variation 79)
38. A student says 'segmentation faults' is not relevant to real projects. What is the best correction? (variation 89)
39. What is the most accurate beginner-level explanation of malloc? (variation 102)
40. What is the most accurate beginner-level explanation of malloc?
41. When working with C Programming, why would a developer use arrays? (variation 101)
42. Which option is a correct use case for preprocessor macros in C Programming? (variation 98)
43. Which statement best describes pointers in C Programming?
44. Which option is a correct use case for structs in C Programming? (variation 103)
45. Which statement best describes the stack in C Programming? (variation 105)
46. What is the most accurate beginner-level explanation of pass by pointer? (variation 97)
47. When working with C Programming, why would a developer use arrays? (variation 71)
48. When working with C Programming, why would a developer use arrays? (variation 91)
49. Which statement best describes the stack in C Programming? (variation 85)
50. What is the most accurate beginner-level explanation of malloc? (variation 82)
51. When working with C Programming, why would a developer use null terminator? (variation 86)
52. What is the most accurate beginner-level explanation of pass by pointer?
53. Which statement best describes pointers in C Programming? (variation 90)
54. Which option is a correct use case for structs in C Programming? (variation 73)
55. A student says 'header files' is not relevant to real projects. What is the best correction? (variation 84)

56. When working with C Programming, why would a developer use arrays? (variation 351)

57. Which statement best describes pointers in C Programming? (variation 70)

58. A student says 'header files' is not relevant to real projects. What is the best correction? (variation 74)

59. When working with C Programming, why would a developer use null terminator? (variation 106)

60. Which option is a correct use case for structs in C Programming?
