

UPSC Previous Year Practice 2024 (2024)

Subject: General | Topic: C Programming

1. Which statement best describes the stack in C Programming? (variation 355)
2. What is the most accurate beginner-level explanation of malloc? (variation 72)
3. When working with C Programming, why would a developer use arrays? (variation 101)
4. Which statement best describes pointers in C Programming? (variation 80)
5. A student says 'header files' is not relevant to real projects. What is the best correction? (variation 104)
6. When working with C Programming, why would a developer use arrays? (variation 351)
7. Which statement best describes the stack in C Programming? (variation 75)
8. What is the most accurate beginner-level explanation of malloc?
9. What is the most accurate beginner-level explanation of pass by pointer? (variation 87)
10. Which option is a correct use case for structs in C Programming? (variation 93)
11. Which statement best describes pointers in C Programming?
12. Which option is a correct use case for preprocessor macros in C Programming? (variation 88)
13. What is the most accurate beginner-level explanation of pass by pointer? (variation 107)
14. Which option is a correct use case for preprocessor macros in C Programming? (variation 358)
15. Which statement best describes pointers in C Programming? (variation 70)
16. What is the most accurate beginner-level explanation of malloc? (variation 82)
17. When working with C Programming, why would a developer use arrays? (variation 71)

18. Which option is a correct use case for structs in C Programming? (variation 353)
19. Which statement best describes the stack in C Programming? (variation 95)
20. A student says 'header files' is not relevant to real projects. What is the best correction?
21. Which option is a correct use case for structs in C Programming? (variation 83)
22. When working with C Programming, why would a developer use null terminator? (variation 106)
23. Which option is a correct use case for preprocessor macros in C Programming? (variation 98)
24. A student says 'segmentation faults' is not relevant to real projects. What is the best correction? (variation 99)
25. When working with C Programming, why would a developer use arrays? (variation 91)
26. Which option is a correct use case for preprocessor macros in C Programming? (variation 108)
27. Which statement best describes pointers in C Programming? (variation 350)
28. A student says 'header files' is not relevant to real projects. What is the best correction? (variation 84)
29. Which statement best describes the stack in C Programming? (variation 85)
30. What is the most accurate beginner-level explanation of pass by pointer?
31. What is the most accurate beginner-level explanation of pass by pointer? (variation 97)
32. What is the most accurate beginner-level explanation of malloc? (variation 92)
33. Which option is a correct use case for preprocessor macros in C Programming?
34. What is the most accurate beginner-level explanation of pass by pointer? (variation 357)
35. What is the most accurate beginner-level explanation of malloc? (variation 352)
36. Which statement best describes the stack in C Programming?

37. Which option is a correct use case for structs in C Programming? (variation 103)
38. A student says 'header files' is not relevant to real projects. What is the best correction? (variation 354)
39. Which statement best describes pointers in C Programming? (variation 90)
40. Which option is a correct use case for structs in C Programming?
41. What is the most accurate beginner-level explanation of pass by pointer? (variation 77)
42. When working with C Programming, why would a developer use null terminator? (variation 76)
43. Which statement best describes the stack in C Programming? (variation 105)
44. When working with C Programming, why would a developer use null terminator? (variation 356)
45. A student says 'header files' is not relevant to real projects. What is the best correction? (variation 74)
46. A student says 'segmentation faults' is not relevant to real projects. What is the best correction? (variation 359)
47. Which option is a correct use case for preprocessor macros in C Programming? (variation 78)
48. Which statement best describes pointers in C Programming? (variation 100)
49. A student says 'segmentation faults' is not relevant to real projects. What is the best correction? (variation 89)
50. A student says 'header files' is not relevant to real projects. What is the best correction? (variation 94)
51. When working with C Programming, why would a developer use arrays?
52. A student says 'segmentation faults' is not relevant to real projects. What is the best correction? (variation 109)
53. What is the most accurate beginner-level explanation of malloc? (variation 102)
54. When working with C Programming, why would a developer use null terminator? (variation 96)
55. A student says 'segmentation faults' is not relevant to real projects. What is the best correction? (variation 79)

56. When working with C Programming, why would a developer use null terminator?

57. When working with C Programming, why would a developer use null terminator? (variation 86)

58. A student says 'segmentation faults' is not relevant to real projects. What is the best correction?

59. Which option is a correct use case for structs in C Programming? (variation 73)

60. When working with C Programming, why would a developer use arrays? (variation 81)
