

UPSC Previous Year Practice 2025 (2025)

Subject: General | Topic: C Programming

1. When working with C Programming, why would a developer use null terminator? (variation 76)
2. A student says 'segmentation faults' is not relevant to real projects. What is the best correction? (variation 109)
3. A student says 'segmentation faults' is not relevant to real projects. What is the best correction? (variation 359)
4. A student says 'segmentation faults' is not relevant to real projects. What is the best correction?
5. What is the most accurate beginner-level explanation of malloc? (variation 82)
6. A student says 'header files' is not relevant to real projects. What is the best correction? (variation 84)
7. When working with C Programming, why would a developer use arrays? (variation 71)
8. When working with C Programming, why would a developer use arrays? (variation 81)
9. Which option is a correct use case for structs in C Programming? (variation 103)
10. What is the most accurate beginner-level explanation of pass by pointer? (variation 357)
11. Which statement best describes pointers in C Programming? (variation 100)
12. Which option is a correct use case for structs in C Programming? (variation 353)
13. When working with C Programming, why would a developer use null terminator? (variation 86)
14. What is the most accurate beginner-level explanation of malloc?
15. Which option is a correct use case for preprocessor macros in C Programming? (variation 108)
16. When working with C Programming, why would a developer use null terminator? (variation 96)
17. Which statement best describes the stack in C Programming?

18. When working with C Programming, why would a developer use null terminator?
19. Which statement best describes the stack in C Programming? (variation 355)
20. Which option is a correct use case for structs in C Programming? (variation 73)
21. What is the most accurate beginner-level explanation of pass by pointer? (variation 87)
22. A student says 'segmentation faults' is not relevant to real projects. What is the best correction? (variation 79)
23. Which option is a correct use case for preprocessor macros in C Programming?
24. A student says 'header files' is not relevant to real projects. What is the best correction?
25. What is the most accurate beginner-level explanation of malloc? (variation 72)
26. A student says 'segmentation faults' is not relevant to real projects. What is the best correction? (variation 99)
27. Which statement best describes pointers in C Programming? (variation 350)
28. Which statement best describes the stack in C Programming? (variation 95)
29. What is the most accurate beginner-level explanation of pass by pointer? (variation 77)
30. When working with C Programming, why would a developer use null terminator? (variation 356)
31. A student says 'header files' is not relevant to real projects. What is the best correction? (variation 104)
32. A student says 'header files' is not relevant to real projects. What is the best correction? (variation 74)
33. Which statement best describes the stack in C Programming? (variation 105)
34. What is the most accurate beginner-level explanation of pass by pointer? (variation 97)
35. Which option is a correct use case for preprocessor macros in C Programming? (variation 78)
36. What is the most accurate beginner-level explanation of malloc? (variation 102)

37. Which statement best describes the stack in C Programming? (variation 75)
38. Which option is a correct use case for structs in C Programming? (variation 93)
39. Which statement best describes pointers in C Programming? (variation 90)
40. Which option is a correct use case for structs in C Programming?
41. When working with C Programming, why would a developer use null terminator? (variation 106)
42. What is the most accurate beginner-level explanation of pass by pointer?
43. Which option is a correct use case for structs in C Programming? (variation 83)
44. Which statement best describes pointers in C Programming?
45. A student says 'segmentation faults' is not relevant to real projects. What is the best correction? (variation 89)
46. When working with C Programming, why would a developer use arrays? (variation 101)
47. When working with C Programming, why would a developer use arrays? (variation 351)
48. Which statement best describes the stack in C Programming? (variation 85)
49. When working with C Programming, why would a developer use arrays?
50. Which statement best describes pointers in C Programming? (variation 70)
51. What is the most accurate beginner-level explanation of pass by pointer? (variation 107)
52. When working with C Programming, why would a developer use arrays? (variation 91)
53. What is the most accurate beginner-level explanation of malloc? (variation 352)
54. Which option is a correct use case for preprocessor macros in C Programming? (variation 358)
55. Which statement best describes pointers in C Programming? (variation 80)

56. A student says 'header files' is not relevant to real projects. What is the best correction? (variation 94)

57. A student says 'header files' is not relevant to real projects. What is the best correction? (variation 354)

58. What is the most accurate beginner-level explanation of malloc? (variation 92)

59. Which option is a correct use case for preprocessor macros in C Programming? (variation 88)

60. Which option is a correct use case for preprocessor macros in C Programming? (variation 98)
