

UPSC Previous Year Practice 2026 (2026)

Subject: General | Topic: C Programming

1. What is the most accurate beginner-level explanation of pass by pointer?
2. A student says 'header files' is not relevant to real projects. What is the best correction? (variation 104)
3. A student says 'segmentation faults' is not relevant to real projects. What is the best correction? (variation 89)
4. Which option is a correct use case for preprocessor macros in C Programming? (variation 98)
5. Which statement best describes the stack in C Programming? (variation 105)
6. When working with C Programming, why would a developer use arrays? (variation 91)
7. What is the most accurate beginner-level explanation of malloc? (variation 72)
8. What is the most accurate beginner-level explanation of pass by pointer? (variation 357)
9. What is the most accurate beginner-level explanation of malloc? (variation 352)
10. Which option is a correct use case for structs in C Programming?
11. Which statement best describes the stack in C Programming? (variation 75)
12. A student says 'header files' is not relevant to real projects. What is the best correction? (variation 94)
13. What is the most accurate beginner-level explanation of malloc?
14. When working with C Programming, why would a developer use arrays? (variation 351)
15. When working with C Programming, why would a developer use arrays? (variation 71)
16. Which option is a correct use case for structs in C Programming? (variation 93)
17. What is the most accurate beginner-level explanation of pass by pointer? (variation 77)

18. Which statement best describes pointers in C Programming?
19. What is the most accurate beginner-level explanation of pass by pointer? (variation 97)
20. A student says 'segmentation faults' is not relevant to real projects. What is the best correction? (variation 79)
21. A student says 'header files' is not relevant to real projects. What is the best correction? (variation 354)
22. Which option is a correct use case for structs in C Programming? (variation 353)
23. Which option is a correct use case for structs in C Programming? (variation 103)
24. When working with C Programming, why would a developer use null terminator? (variation 96)
25. What is the most accurate beginner-level explanation of malloc? (variation 102)
26. Which option is a correct use case for structs in C Programming? (variation 73)
27. Which option is a correct use case for preprocessor macros in C Programming? (variation 358)
28. A student says 'segmentation faults' is not relevant to real projects. What is the best correction?
29. A student says 'segmentation faults' is not relevant to real projects. What is the best correction? (variation 109)
30. A student says 'segmentation faults' is not relevant to real projects. What is the best correction? (variation 359)
31. Which statement best describes pointers in C Programming? (variation 90)
32. When working with C Programming, why would a developer use null terminator? (variation 356)
33. When working with C Programming, why would a developer use null terminator? (variation 86)
34. Which statement best describes the stack in C Programming? (variation 95)
35. What is the most accurate beginner-level explanation of malloc? (variation 82)
36. Which option is a correct use case for preprocessor macros in C Programming? (variation 78)

37. Which option is a correct use case for preprocessor macros in C Programming?
38. A student says 'header files' is not relevant to real projects. What is the best correction?
39. A student says 'segmentation faults' is not relevant to real projects. What is the best correction? (variation 99)
40. When working with C Programming, why would a developer use null terminator? (variation 106)
41. When working with C Programming, why would a developer use arrays? (variation 81)
42. A student says 'header files' is not relevant to real projects. What is the best correction? (variation 84)
43. Which statement best describes pointers in C Programming? (variation 100)
44. When working with C Programming, why would a developer use null terminator? (variation 76)
45. Which statement best describes the stack in C Programming?
46. Which statement best describes pointers in C Programming? (variation 80)
47. What is the most accurate beginner-level explanation of pass by pointer? (variation 107)
48. Which option is a correct use case for structs in C Programming? (variation 83)
49. When working with C Programming, why would a developer use arrays? (variation 101)
50. What is the most accurate beginner-level explanation of malloc? (variation 92)
51. Which statement best describes pointers in C Programming? (variation 350)
52. What is the most accurate beginner-level explanation of pass by pointer? (variation 87)
53. When working with C Programming, why would a developer use null terminator?
54. Which statement best describes pointers in C Programming? (variation 70)
55. When working with C Programming, why would a developer use arrays?

56. Which statement best describes the stack in C Programming? (variation 85)

57. Which option is a correct use case for preprocessor macros in C Programming? (variation 88)

58. A student says 'header files' is not relevant to real projects. What is the best correction? (variation 74)

59. Which statement best describes the stack in C Programming? (variation 355)

60. Which option is a correct use case for preprocessor macros in C Programming? (variation 108)
