

University Exams Previous Year Practice 2017 (2017)

Subject: General | Topic: C Programming

1. What is the most accurate beginner-level explanation of malloc?
2. Which statement best describes pointers in C Programming? (variation 90)
3. A student says 'segmentation faults' is not relevant to real projects. What is the best correction? (variation 109)
4. Which option is a correct use case for preprocessor macros in C Programming? (variation 88)
5. Which option is a correct use case for preprocessor macros in C Programming? (variation 98)
6. What is the most accurate beginner-level explanation of malloc? (variation 92)
7. When working with C Programming, why would a developer use null terminator?
8. Which statement best describes the stack in C Programming? (variation 75)
9. When working with C Programming, why would a developer use arrays? (variation 71)
10. Which option is a correct use case for preprocessor macros in C Programming?
11. What is the most accurate beginner-level explanation of malloc? (variation 82)
12. Which statement best describes pointers in C Programming? (variation 80)
13. What is the most accurate beginner-level explanation of pass by pointer? (variation 77)
14. A student says 'header files' is not relevant to real projects. What is the best correction? (variation 354)
15. Which option is a correct use case for structs in C Programming? (variation 353)
16. When working with C Programming, why would a developer use null terminator? (variation 76)
17. Which statement best describes pointers in C Programming?

18. What is the most accurate beginner-level explanation of pass by pointer? (variation 87)
19. Which option is a correct use case for preprocessor macros in C Programming? (variation 108)
20. A student says 'header files' is not relevant to real projects. What is the best correction? (variation 74)
21. Which statement best describes the stack in C Programming? (variation 355)
22. A student says 'segmentation faults' is not relevant to real projects. What is the best correction?
23. Which statement best describes the stack in C Programming? (variation 105)
24. When working with C Programming, why would a developer use null terminator? (variation 86)
25. Which option is a correct use case for structs in C Programming? (variation 73)
26. What is the most accurate beginner-level explanation of malloc? (variation 72)
27. When working with C Programming, why would a developer use arrays?
28. Which option is a correct use case for structs in C Programming? (variation 93)
29. When working with C Programming, why would a developer use arrays? (variation 91)
30. What is the most accurate beginner-level explanation of pass by pointer? (variation 357)
31. Which option is a correct use case for preprocessor macros in C Programming? (variation 78)
32. A student says 'header files' is not relevant to real projects. What is the best correction? (variation 94)
33. Which statement best describes the stack in C Programming? (variation 95)
34. When working with C Programming, why would a developer use null terminator? (variation 96)
35. When working with C Programming, why would a developer use arrays? (variation 81)
36. A student says 'header files' is not relevant to real projects. What is the best correction? (variation 84)

37. Which option is a correct use case for structs in C Programming? (variation 103)
38. Which statement best describes pointers in C Programming? (variation 100)
39. Which statement best describes the stack in C Programming? (variation 85)
40. A student says 'header files' is not relevant to real projects. What is the best correction?
41. A student says 'segmentation faults' is not relevant to real projects. What is the best correction? (variation 99)
42. Which option is a correct use case for structs in C Programming? (variation 83)
43. When working with C Programming, why would a developer use null terminator? (variation 106)
44. A student says 'segmentation faults' is not relevant to real projects. What is the best correction? (variation 359)
45. What is the most accurate beginner-level explanation of pass by pointer?
46. Which statement best describes pointers in C Programming? (variation 350)
47. A student says 'segmentation faults' is not relevant to real projects. What is the best correction? (variation 79)
48. A student says 'header files' is not relevant to real projects. What is the best correction? (variation 104)
49. Which statement best describes the stack in C Programming?
50. When working with C Programming, why would a developer use null terminator? (variation 356)
51. When working with C Programming, why would a developer use arrays? (variation 101)
52. What is the most accurate beginner-level explanation of malloc? (variation 352)
53. Which option is a correct use case for structs in C Programming?
54. What is the most accurate beginner-level explanation of pass by pointer? (variation 107)
55. What is the most accurate beginner-level explanation of malloc? (variation 102)

56. Which statement best describes pointers in C Programming? (variation 70)

57. A student says 'segmentation faults' is not relevant to real projects. What is the best correction? (variation 89)

58. When working with C Programming, why would a developer use arrays? (variation 351)

59. What is the most accurate beginner-level explanation of pass by pointer? (variation 97)

60. Which option is a correct use case for preprocessor macros in C Programming? (variation 358)
