

University Exams Previous Year Practice 2018 (2018)

Subject: General | Topic: C Programming

1. Which option is a correct use case for structs in C Programming? (variation 83)
2. When working with C Programming, why would a developer use null terminator? (variation 76)
3. A student says 'header files' is not relevant to real projects. What is the best correction? (variation 354)
4. Which statement best describes pointers in C Programming? (variation 70)
5. Which option is a correct use case for structs in C Programming? (variation 93)
6. When working with C Programming, why would a developer use null terminator? (variation 356)
7. What is the most accurate beginner-level explanation of pass by pointer? (variation 97)
8. A student says 'header files' is not relevant to real projects. What is the best correction? (variation 104)
9. When working with C Programming, why would a developer use null terminator? (variation 86)
10. Which statement best describes the stack in C Programming? (variation 95)
11. Which option is a correct use case for structs in C Programming? (variation 103)
12. When working with C Programming, why would a developer use null terminator? (variation 96)
13. Which statement best describes the stack in C Programming? (variation 75)
14. Which option is a correct use case for preprocessor macros in C Programming? (variation 108)
15. Which statement best describes pointers in C Programming?
16. Which option is a correct use case for structs in C Programming? (variation 353)
17. Which option is a correct use case for preprocessor macros in C Programming?

18. What is the most accurate beginner-level explanation of malloc? (variation 92)
19. A student says 'header files' is not relevant to real projects. What is the best correction? (variation 94)
20. What is the most accurate beginner-level explanation of pass by pointer? (variation 357)
21. A student says 'segmentation faults' is not relevant to real projects. What is the best correction? (variation 79)
22. What is the most accurate beginner-level explanation of pass by pointer?
23. When working with C Programming, why would a developer use arrays? (variation 81)
24. Which option is a correct use case for preprocessor macros in C Programming? (variation 98)
25. Which statement best describes the stack in C Programming?
26. A student says 'segmentation faults' is not relevant to real projects. What is the best correction?
27. Which statement best describes the stack in C Programming? (variation 355)
28. A student says 'header files' is not relevant to real projects. What is the best correction? (variation 74)
29. A student says 'segmentation faults' is not relevant to real projects. What is the best correction? (variation 89)
30. Which statement best describes pointers in C Programming? (variation 90)
31. A student says 'header files' is not relevant to real projects. What is the best correction? (variation 84)
32. Which option is a correct use case for structs in C Programming?
33. When working with C Programming, why would a developer use arrays? (variation 351)
34. What is the most accurate beginner-level explanation of malloc?
35. Which statement best describes pointers in C Programming? (variation 80)
36. When working with C Programming, why would a developer use null terminator? (variation 106)

37. What is the most accurate beginner-level explanation of pass by pointer? (variation 87)
38. Which statement best describes the stack in C Programming? (variation 85)
39. A student says 'header files' is not relevant to real projects. What is the best correction?
40. What is the most accurate beginner-level explanation of malloc? (variation 82)
41. What is the most accurate beginner-level explanation of malloc? (variation 352)
42. A student says 'segmentation faults' is not relevant to real projects. What is the best correction? (variation 99)
43. What is the most accurate beginner-level explanation of pass by pointer? (variation 107)
44. Which statement best describes pointers in C Programming? (variation 350)
45. When working with C Programming, why would a developer use arrays? (variation 91)
46. What is the most accurate beginner-level explanation of pass by pointer? (variation 77)
47. Which statement best describes the stack in C Programming? (variation 105)
48. When working with C Programming, why would a developer use arrays?
49. Which option is a correct use case for preprocessor macros in C Programming? (variation 78)
50. Which option is a correct use case for preprocessor macros in C Programming? (variation 88)
51. When working with C Programming, why would a developer use arrays? (variation 71)
52. Which statement best describes pointers in C Programming? (variation 100)
53. A student says 'segmentation faults' is not relevant to real projects. What is the best correction? (variation 359)
54. A student says 'segmentation faults' is not relevant to real projects. What is the best correction? (variation 109)
55. What is the most accurate beginner-level explanation of malloc? (variation 72)

56. When working with C Programming, why would a developer use arrays? (variation 101)

57. Which option is a correct use case for preprocessor macros in C Programming? (variation 358)

58. Which option is a correct use case for structs in C Programming? (variation 73)

59. What is the most accurate beginner-level explanation of malloc? (variation 102)

60. When working with C Programming, why would a developer use null terminator?
