

# University Exams Previous Year Practice 2019 (2019)

Subject: General | Topic: C Programming

1. Which option is a correct use case for structs in C Programming? (variation 73)
2. A student says 'segmentation faults' is not relevant to real projects. What is the best correction? (variation 89)
3. A student says 'segmentation faults' is not relevant to real projects. What is the best correction? (variation 79)
4. Which statement best describes pointers in C Programming? (variation 90)
5. What is the most accurate beginner-level explanation of malloc? (variation 92)
6. Which option is a correct use case for preprocessor macros in C Programming? (variation 98)
7. What is the most accurate beginner-level explanation of pass by pointer? (variation 97)
8. What is the most accurate beginner-level explanation of malloc? (variation 72)
9. Which statement best describes pointers in C Programming? (variation 350)
10. A student says 'header files' is not relevant to real projects. What is the best correction? (variation 74)
11. When working with C Programming, why would a developer use arrays? (variation 351)
12. When working with C Programming, why would a developer use null terminator? (variation 96)
13. When working with C Programming, why would a developer use arrays?
14. When working with C Programming, why would a developer use null terminator? (variation 76)
15. Which statement best describes the stack in C Programming? (variation 95)
16. What is the most accurate beginner-level explanation of pass by pointer? (variation 77)
17. A student says 'segmentation faults' is not relevant to real projects. What is the best correction?

18. What is the most accurate beginner-level explanation of malloc?
19. What is the most accurate beginner-level explanation of pass by pointer? (variation 357)
20. A student says 'header files' is not relevant to real projects. What is the best correction?
21. Which statement best describes the stack in C Programming? (variation 75)
22. When working with C Programming, why would a developer use null terminator? (variation 86)
23. When working with C Programming, why would a developer use null terminator? (variation 356)
24. When working with C Programming, why would a developer use null terminator?
25. Which option is a correct use case for structs in C Programming?
26. Which statement best describes the stack in C Programming? (variation 355)
27. Which option is a correct use case for structs in C Programming? (variation 353)
28. Which statement best describes pointers in C Programming? (variation 80)
29. A student says 'segmentation faults' is not relevant to real projects. What is the best correction? (variation 99)
30. Which statement best describes pointers in C Programming? (variation 70)
31. Which statement best describes the stack in C Programming? (variation 105)
32. What is the most accurate beginner-level explanation of pass by pointer? (variation 107)
33. When working with C Programming, why would a developer use arrays? (variation 81)
34. Which statement best describes pointers in C Programming?
35. A student says 'header files' is not relevant to real projects. What is the best correction? (variation 84)
36. Which statement best describes the stack in C Programming?

37. A student says 'header files' is not relevant to real projects. What is the best correction? (variation 104)
38. What is the most accurate beginner-level explanation of malloc? (variation 352)
39. Which option is a correct use case for preprocessor macros in C Programming? (variation 78)
40. Which option is a correct use case for structs in C Programming? (variation 103)
41. What is the most accurate beginner-level explanation of pass by pointer? (variation 87)
42. Which statement best describes pointers in C Programming? (variation 100)
43. What is the most accurate beginner-level explanation of pass by pointer?
44. When working with C Programming, why would a developer use arrays? (variation 101)
45. Which option is a correct use case for structs in C Programming? (variation 83)
46. Which option is a correct use case for preprocessor macros in C Programming? (variation 108)
47. What is the most accurate beginner-level explanation of malloc? (variation 82)
48. A student says 'segmentation faults' is not relevant to real projects. What is the best correction? (variation 109)
49. Which option is a correct use case for preprocessor macros in C Programming? (variation 88)
50. When working with C Programming, why would a developer use arrays? (variation 71)
51. Which option is a correct use case for preprocessor macros in C Programming? (variation 358)
52. Which option is a correct use case for structs in C Programming? (variation 93)
53. A student says 'segmentation faults' is not relevant to real projects. What is the best correction? (variation 359)
54. A student says 'header files' is not relevant to real projects. What is the best correction? (variation 354)
55. A student says 'header files' is not relevant to real projects. What is the best correction? (variation 94)

56. What is the most accurate beginner-level explanation of malloc? (variation 102)
57. When working with C Programming, why would a developer use arrays? (variation 91)
58. When working with C Programming, why would a developer use null terminator? (variation 106)
59. Which statement best describes the stack in C Programming? (variation 85)
60. Which option is a correct use case for preprocessor macros in C Programming?
