

University Exams Previous Year Practice 2021 (2021)

Subject: General | Topic: C Programming

1. What is the most accurate beginner-level explanation of pass by pointer? (variation 77)
2. Which option is a correct use case for preprocessor macros in C Programming? (variation 88)
3. Which option is a correct use case for structs in C Programming?
4. A student says 'header files' is not relevant to real projects. What is the best correction? (variation 104)
5. A student says 'segmentation faults' is not relevant to real projects. What is the best correction?
6. Which option is a correct use case for structs in C Programming? (variation 103)
7. What is the most accurate beginner-level explanation of pass by pointer? (variation 357)
8. What is the most accurate beginner-level explanation of malloc? (variation 92)
9. What is the most accurate beginner-level explanation of pass by pointer? (variation 87)
10. A student says 'header files' is not relevant to real projects. What is the best correction? (variation 84)
11. Which option is a correct use case for preprocessor macros in C Programming?
12. When working with C Programming, why would a developer use arrays? (variation 71)
13. Which option is a correct use case for structs in C Programming? (variation 73)
14. When working with C Programming, why would a developer use null terminator?
15. When working with C Programming, why would a developer use null terminator? (variation 106)
16. Which statement best describes the stack in C Programming? (variation 85)
17. Which statement best describes pointers in C Programming? (variation 80)

18. Which statement best describes the stack in C Programming?
19. What is the most accurate beginner-level explanation of malloc?
20. A student says 'header files' is not relevant to real projects. What is the best correction?
21. A student says 'segmentation faults' is not relevant to real projects. What is the best correction? (variation 89)
22. A student says 'segmentation faults' is not relevant to real projects. What is the best correction? (variation 359)
23. Which option is a correct use case for preprocessor macros in C Programming? (variation 108)
24. What is the most accurate beginner-level explanation of malloc? (variation 102)
25. When working with C Programming, why would a developer use null terminator? (variation 356)
26. When working with C Programming, why would a developer use arrays? (variation 91)
27. Which statement best describes pointers in C Programming? (variation 90)
28. Which option is a correct use case for structs in C Programming? (variation 93)
29. A student says 'header files' is not relevant to real projects. What is the best correction? (variation 74)
30. Which statement best describes the stack in C Programming? (variation 355)
31. Which option is a correct use case for preprocessor macros in C Programming? (variation 98)
32. Which statement best describes the stack in C Programming? (variation 75)
33. A student says 'segmentation faults' is not relevant to real projects. What is the best correction? (variation 109)
34. When working with C Programming, why would a developer use arrays? (variation 101)
35. When working with C Programming, why would a developer use arrays?
36. Which option is a correct use case for preprocessor macros in C Programming? (variation 358)

37. Which option is a correct use case for structs in C Programming? (variation 353)
38. Which statement best describes the stack in C Programming? (variation 105)
39. When working with C Programming, why would a developer use null terminator? (variation 96)
40. Which statement best describes pointers in C Programming?
41. When working with C Programming, why would a developer use arrays? (variation 81)
42. What is the most accurate beginner-level explanation of pass by pointer? (variation 97)
43. Which option is a correct use case for structs in C Programming? (variation 83)
44. A student says 'segmentation faults' is not relevant to real projects. What is the best correction? (variation 79)
45. Which option is a correct use case for preprocessor macros in C Programming? (variation 78)
46. Which statement best describes the stack in C Programming? (variation 95)
47. A student says 'header files' is not relevant to real projects. What is the best correction? (variation 94)
48. What is the most accurate beginner-level explanation of malloc? (variation 352)
49. A student says 'header files' is not relevant to real projects. What is the best correction? (variation 354)
50. When working with C Programming, why would a developer use null terminator? (variation 86)
51. When working with C Programming, why would a developer use arrays? (variation 351)
52. What is the most accurate beginner-level explanation of pass by pointer? (variation 107)
53. A student says 'segmentation faults' is not relevant to real projects. What is the best correction? (variation 99)
54. When working with C Programming, why would a developer use null terminator? (variation 76)
55. Which statement best describes pointers in C Programming? (variation 100)

56. What is the most accurate beginner-level explanation of malloc? (variation 82)

57. Which statement best describes pointers in C Programming? (variation 350)

58. What is the most accurate beginner-level explanation of pass by pointer?

59. What is the most accurate beginner-level explanation of malloc? (variation 72)

60. Which statement best describes pointers in C Programming? (variation 70)
