

University Exams Previous Year Practice 2022 (2022)

Subject: General | Topic: C Programming

1. When working with C Programming, why would a developer use null terminator? (variation 356)
2. When working with C Programming, why would a developer use null terminator? (variation 86)
3. A student says 'segmentation faults' is not relevant to real projects. What is the best correction? (variation 79)
4. What is the most accurate beginner-level explanation of pass by pointer? (variation 97)
5. What is the most accurate beginner-level explanation of malloc?
6. Which statement best describes pointers in C Programming?
7. Which statement best describes pointers in C Programming? (variation 80)
8. When working with C Programming, why would a developer use arrays? (variation 91)
9. What is the most accurate beginner-level explanation of malloc? (variation 72)
10. Which option is a correct use case for preprocessor macros in C Programming?
11. Which statement best describes the stack in C Programming? (variation 105)
12. Which statement best describes the stack in C Programming? (variation 85)
13. Which option is a correct use case for preprocessor macros in C Programming? (variation 358)
14. What is the most accurate beginner-level explanation of pass by pointer? (variation 107)
15. What is the most accurate beginner-level explanation of pass by pointer? (variation 87)
16. A student says 'header files' is not relevant to real projects. What is the best correction? (variation 94)
17. When working with C Programming, why would a developer use null terminator? (variation 96)

18. When working with C Programming, why would a developer use null terminator? (variation 106)
19. Which statement best describes pointers in C Programming? (variation 90)
20. A student says 'segmentation faults' is not relevant to real projects. What is the best correction? (variation 109)
21. A student says 'segmentation faults' is not relevant to real projects. What is the best correction? (variation 89)
22. What is the most accurate beginner-level explanation of malloc? (variation 102)
23. What is the most accurate beginner-level explanation of pass by pointer?
24. Which option is a correct use case for preprocessor macros in C Programming? (variation 88)
25. A student says 'header files' is not relevant to real projects. What is the best correction? (variation 104)
26. Which option is a correct use case for preprocessor macros in C Programming? (variation 98)
27. Which option is a correct use case for preprocessor macros in C Programming? (variation 78)
28. Which statement best describes pointers in C Programming? (variation 100)
29. Which statement best describes the stack in C Programming? (variation 355)
30. Which option is a correct use case for structs in C Programming? (variation 93)
31. Which statement best describes pointers in C Programming? (variation 350)
32. A student says 'header files' is not relevant to real projects. What is the best correction?
33. When working with C Programming, why would a developer use null terminator? (variation 76)
34. When working with C Programming, why would a developer use arrays?
35. A student says 'segmentation faults' is not relevant to real projects. What is the best correction?
36. Which option is a correct use case for structs in C Programming?

37. Which statement best describes the stack in C Programming? (variation 95)
38. A student says 'header files' is not relevant to real projects. What is the best correction? (variation 84)
39. What is the most accurate beginner-level explanation of pass by pointer? (variation 357)
40. When working with C Programming, why would a developer use arrays? (variation 81)
41. A student says 'header files' is not relevant to real projects. What is the best correction? (variation 354)
42. Which option is a correct use case for structs in C Programming? (variation 83)
43. Which option is a correct use case for structs in C Programming? (variation 73)
44. Which option is a correct use case for structs in C Programming? (variation 353)
45. What is the most accurate beginner-level explanation of malloc? (variation 352)
46. What is the most accurate beginner-level explanation of malloc? (variation 82)
47. Which option is a correct use case for structs in C Programming? (variation 103)
48. A student says 'segmentation faults' is not relevant to real projects. What is the best correction? (variation 99)
49. Which statement best describes pointers in C Programming? (variation 70)
50. When working with C Programming, why would a developer use arrays? (variation 71)
51. When working with C Programming, why would a developer use arrays? (variation 101)
52. A student says 'header files' is not relevant to real projects. What is the best correction? (variation 74)
53. A student says 'segmentation faults' is not relevant to real projects. What is the best correction? (variation 359)
54. What is the most accurate beginner-level explanation of pass by pointer? (variation 77)
55. Which option is a correct use case for preprocessor macros in C Programming? (variation 108)

56. What is the most accurate beginner-level explanation of malloc? (variation 92)
57. Which statement best describes the stack in C Programming?
58. When working with C Programming, why would a developer use arrays? (variation 351)
59. When working with C Programming, why would a developer use null terminator?
60. Which statement best describes the stack in C Programming? (variation 75)
