

University Exams Previous Year Practice 2025 (2025)

Subject: General | Topic: C Programming

1. What is the most accurate beginner-level explanation of malloc? (variation 92)
2. Which option is a correct use case for preprocessor macros in C Programming? (variation 108)
3. What is the most accurate beginner-level explanation of pass by pointer? (variation 97)
4. A student says 'header files' is not relevant to real projects. What is the best correction? (variation 94)
5. Which option is a correct use case for structs in C Programming? (variation 103)
6. What is the most accurate beginner-level explanation of pass by pointer? (variation 77)
7. Which statement best describes pointers in C Programming? (variation 350)
8. A student says 'header files' is not relevant to real projects. What is the best correction? (variation 74)
9. Which statement best describes pointers in C Programming?
10. Which option is a correct use case for preprocessor macros in C Programming?
11. Which statement best describes the stack in C Programming? (variation 85)
12. Which statement best describes the stack in C Programming? (variation 95)
13. A student says 'header files' is not relevant to real projects. What is the best correction? (variation 84)
14. When working with C Programming, why would a developer use null terminator? (variation 356)
15. Which option is a correct use case for preprocessor macros in C Programming? (variation 98)
16. When working with C Programming, why would a developer use null terminator? (variation 96)
17. What is the most accurate beginner-level explanation of pass by pointer? (variation 357)

18. A student says 'segmentation faults' is not relevant to real projects. What is the best correction? (variation 79)
19. Which statement best describes pointers in C Programming? (variation 70)
20. Which statement best describes pointers in C Programming? (variation 90)
21. A student says 'segmentation faults' is not relevant to real projects. What is the best correction? (variation 109)
22. When working with C Programming, why would a developer use arrays? (variation 71)
23. When working with C Programming, why would a developer use arrays? (variation 91)
24. When working with C Programming, why would a developer use null terminator?
25. A student says 'header files' is not relevant to real projects. What is the best correction? (variation 354)
26. What is the most accurate beginner-level explanation of pass by pointer? (variation 87)
27. What is the most accurate beginner-level explanation of malloc?
28. Which option is a correct use case for preprocessor macros in C Programming? (variation 88)
29. What is the most accurate beginner-level explanation of malloc? (variation 102)
30. What is the most accurate beginner-level explanation of malloc? (variation 72)
31. A student says 'segmentation faults' is not relevant to real projects. What is the best correction? (variation 359)
32. Which option is a correct use case for structs in C Programming? (variation 93)
33. A student says 'header files' is not relevant to real projects. What is the best correction? (variation 104)
34. Which option is a correct use case for structs in C Programming?
35. Which statement best describes the stack in C Programming?
36. Which option is a correct use case for structs in C Programming? (variation 73)

37. When working with C Programming, why would a developer use arrays? (variation 81)
38. Which statement best describes the stack in C Programming? (variation 75)
39. When working with C Programming, why would a developer use null terminator? (variation 86)
40. Which option is a correct use case for preprocessor macros in C Programming? (variation 358)
41. When working with C Programming, why would a developer use arrays? (variation 101)
42. A student says 'header files' is not relevant to real projects. What is the best correction?
43. What is the most accurate beginner-level explanation of malloc? (variation 82)
44. Which option is a correct use case for structs in C Programming? (variation 353)
45. When working with C Programming, why would a developer use arrays? (variation 351)
46. A student says 'segmentation faults' is not relevant to real projects. What is the best correction? (variation 89)
47. Which option is a correct use case for preprocessor macros in C Programming? (variation 78)
48. Which statement best describes the stack in C Programming? (variation 355)
49. Which statement best describes pointers in C Programming? (variation 100)
50. A student says 'segmentation faults' is not relevant to real projects. What is the best correction?
51. What is the most accurate beginner-level explanation of pass by pointer?
52. When working with C Programming, why would a developer use null terminator? (variation 106)
53. Which option is a correct use case for structs in C Programming? (variation 83)
54. When working with C Programming, why would a developer use null terminator? (variation 76)
55. Which statement best describes the stack in C Programming? (variation 105)

56. What is the most accurate beginner-level explanation of pass by pointer? (variation 107)

57. Which statement best describes pointers in C Programming? (variation 80)

58. A student says 'segmentation faults' is not relevant to real projects. What is the best correction? (variation 99)

59. When working with C Programming, why would a developer use arrays?

60. What is the most accurate beginner-level explanation of malloc? (variation 352)
