

University Exams Previous Year Practice 2026 (2026)

Subject: General | Topic: C Programming

1. When working with C Programming, why would a developer use null terminator? (variation 76)
2. Which statement best describes pointers in C Programming? (variation 90)
3. Which option is a correct use case for preprocessor macros in C Programming?
4. Which option is a correct use case for structs in C Programming? (variation 83)
5. What is the most accurate beginner-level explanation of malloc? (variation 72)
6. A student says 'segmentation faults' is not relevant to real projects. What is the best correction? (variation 89)
7. A student says 'segmentation faults' is not relevant to real projects. What is the best correction? (variation 359)
8. What is the most accurate beginner-level explanation of malloc? (variation 82)
9. What is the most accurate beginner-level explanation of pass by pointer? (variation 87)
10. A student says 'header files' is not relevant to real projects. What is the best correction? (variation 84)
11. When working with C Programming, why would a developer use null terminator?
12. When working with C Programming, why would a developer use arrays? (variation 91)
13. When working with C Programming, why would a developer use arrays? (variation 101)
14. Which statement best describes the stack in C Programming?
15. A student says 'header files' is not relevant to real projects. What is the best correction?
16. Which option is a correct use case for preprocessor macros in C Programming? (variation 78)
17. Which option is a correct use case for structs in C Programming? (variation 353)

18. What is the most accurate beginner-level explanation of pass by pointer? (variation 77)
19. A student says 'segmentation faults' is not relevant to real projects. What is the best correction? (variation 99)
20. What is the most accurate beginner-level explanation of pass by pointer? (variation 357)
21. Which option is a correct use case for structs in C Programming?
22. When working with C Programming, why would a developer use null terminator? (variation 106)
23. A student says 'header files' is not relevant to real projects. What is the best correction? (variation 354)
24. A student says 'header files' is not relevant to real projects. What is the best correction? (variation 74)
25. A student says 'header files' is not relevant to real projects. What is the best correction? (variation 104)
26. When working with C Programming, why would a developer use null terminator? (variation 86)
27. A student says 'segmentation faults' is not relevant to real projects. What is the best correction? (variation 79)
28. Which option is a correct use case for structs in C Programming? (variation 73)
29. Which statement best describes the stack in C Programming? (variation 355)
30. What is the most accurate beginner-level explanation of malloc? (variation 352)
31. Which statement best describes pointers in C Programming? (variation 350)
32. Which option is a correct use case for preprocessor macros in C Programming? (variation 108)
33. Which statement best describes pointers in C Programming?
34. Which option is a correct use case for preprocessor macros in C Programming? (variation 98)
35. What is the most accurate beginner-level explanation of pass by pointer?
36. What is the most accurate beginner-level explanation of pass by pointer? (variation 107)

37. Which option is a correct use case for structs in C Programming? (variation 93)
38. When working with C Programming, why would a developer use null terminator? (variation 356)
39. Which option is a correct use case for preprocessor macros in C Programming? (variation 358)
40. What is the most accurate beginner-level explanation of malloc? (variation 92)
41. Which statement best describes the stack in C Programming? (variation 95)
42. Which option is a correct use case for structs in C Programming? (variation 103)
43. Which statement best describes pointers in C Programming? (variation 80)
44. When working with C Programming, why would a developer use arrays?
45. When working with C Programming, why would a developer use arrays? (variation 71)
46. Which statement best describes the stack in C Programming? (variation 75)
47. A student says 'header files' is not relevant to real projects. What is the best correction? (variation 94)
48. When working with C Programming, why would a developer use null terminator? (variation 96)
49. Which statement best describes pointers in C Programming? (variation 70)
50. Which statement best describes the stack in C Programming? (variation 85)
51. What is the most accurate beginner-level explanation of malloc?
52. What is the most accurate beginner-level explanation of pass by pointer? (variation 97)
53. A student says 'segmentation faults' is not relevant to real projects. What is the best correction? (variation 109)
54. Which statement best describes pointers in C Programming? (variation 100)
55. When working with C Programming, why would a developer use arrays? (variation 351)

56. Which statement best describes the stack in C Programming? (variation 105)
57. What is the most accurate beginner-level explanation of malloc? (variation 102)
58. Which option is a correct use case for preprocessor macros in C Programming? (variation 88)
59. A student says 'segmentation faults' is not relevant to real projects. What is the best correction?
60. When working with C Programming, why would a developer use arrays? (variation 81)
