

# University Exams Previous Year Practice 2025 (2025)

Subject: General | Topic: Artificial Intelligence

1. A student says 'large language models' is not relevant to real projects. What is the best correction? (variation 109)
2. When working with Artificial Intelligence, why would a developer use planning? (variation 356)
3. When working with Artificial Intelligence, why would a developer use state space search? (variation 351)
4. Which option is a correct use case for reinforcement learning in Artificial Intelligence? (variation 108)
5. What is the most accurate beginner-level explanation of heuristics? (variation 92)
6. When working with Artificial Intelligence, why would a developer use planning? (variation 96)
7. What is the most accurate beginner-level explanation of heuristics? (variation 102)
8. What is the most accurate beginner-level explanation of expert systems? (variation 357)
9. A student says 'knowledge representation' is not relevant to real projects. What is the best correction? (variation 84)
10. Which statement best describes intelligent agents in Artificial Intelligence? (variation 100)
11. A student says 'knowledge representation' is not relevant to real projects. What is the best correction? (variation 94)
12. Which option is a correct use case for A\* search in Artificial Intelligence? (variation 83)
13. What is the most accurate beginner-level explanation of expert systems? (variation 107)
14. When working with Artificial Intelligence, why would a developer use state space search? (variation 81)
15. A student says 'knowledge representation' is not relevant to real projects. What is the best correction? (variation 104)
16. When working with Artificial Intelligence, why would a developer use state space search? (variation 101)
17. Which statement best describes intelligent agents in Artificial Intelligence? (variation 90)

18. What is the most accurate beginner-level explanation of expert systems? (variation 87)
19. What is the most accurate beginner-level explanation of heuristics?
20. Which statement best describes intelligent agents in Artificial Intelligence?
21. Which statement best describes natural language processing in Artificial Intelligence? (variation 95)
22. When working with Artificial Intelligence, why would a developer use state space search? (variation 71)
23. A student says 'knowledge representation' is not relevant to real projects. What is the best correction? (variation 74)
24. Which statement best describes natural language processing in Artificial Intelligence? (variation 85)
25. When working with Artificial Intelligence, why would a developer use state space search?
26. Which statement best describes natural language processing in Artificial Intelligence? (variation 75)
27. Which option is a correct use case for A\* search in Artificial Intelligence? (variation 73)
28. Which option is a correct use case for reinforcement learning in Artificial Intelligence? (variation 98)
29. A student says 'large language models' is not relevant to real projects. What is the best correction? (variation 79)
30. A student says 'large language models' is not relevant to real projects. What is the best correction?
31. Which option is a correct use case for A\* search in Artificial Intelligence? (variation 353)
32. Which statement best describes natural language processing in Artificial Intelligence?
33. A student says 'large language models' is not relevant to real projects. What is the best correction? (variation 359)
34. What is the most accurate beginner-level explanation of heuristics? (variation 352)
35. A student says 'knowledge representation' is not relevant to real projects. What is the best correction?
36. When working with Artificial Intelligence, why would a developer use planning? (variation 76)

37. What is the most accurate beginner-level explanation of expert systems? (variation 97)
38. A student says 'knowledge representation' is not relevant to real projects. What is the best correction? (variation 354)
39. When working with Artificial Intelligence, why would a developer use state space search? (variation 91)
40. Which option is a correct use case for reinforcement learning in Artificial Intelligence?
41. What is the most accurate beginner-level explanation of heuristics? (variation 82)
42. What is the most accurate beginner-level explanation of expert systems? (variation 77)
43. Which option is a correct use case for A\* search in Artificial Intelligence? (variation 103)
44. Which statement best describes intelligent agents in Artificial Intelligence? (variation 80)
45. What is the most accurate beginner-level explanation of heuristics? (variation 72)
46. A student says 'large language models' is not relevant to real projects. What is the best correction? (variation 89)
47. A student says 'large language models' is not relevant to real projects. What is the best correction? (variation 99)
48. Which option is a correct use case for reinforcement learning in Artificial Intelligence? (variation 88)
49. Which statement best describes natural language processing in Artificial Intelligence? (variation 105)
50. Which option is a correct use case for A\* search in Artificial Intelligence?
51. When working with Artificial Intelligence, why would a developer use planning? (variation 86)
52. Which option is a correct use case for reinforcement learning in Artificial Intelligence? (variation 358)
53. When working with Artificial Intelligence, why would a developer use planning? (variation 106)
54. Which option is a correct use case for A\* search in Artificial Intelligence? (variation 93)
55. Which statement best describes intelligent agents in Artificial Intelligence? (variation 70)

56. Which option is a correct use case for reinforcement learning in Artificial Intelligence? (variation 78)
57. When working with Artificial Intelligence, why would a developer use planning?
58. Which statement best describes natural language processing in Artificial Intelligence? (variation 355)
59. Which statement best describes intelligent agents in Artificial Intelligence? (variation 350)
60. What is the most accurate beginner-level explanation of expert systems?
