

CBSE Previous Year Practice 2025 (2025)

Subject: General | Topic: Machine Learning

1. A student says 'classification' is not relevant to real projects. What is the best correction? (variation 354)
2. What is the most accurate beginner-level explanation of accuracy?
3. Which statement best describes training data in Machine Learning?
4. Which option is a correct use case for confusion matrix in Machine Learning? (variation 358)
5. When working with Machine Learning, why would a developer use train-test split? (variation 96)
6. What is the most accurate beginner-level explanation of labels? (variation 92)
7. Which option is a correct use case for regression in Machine Learning?
8. What is the most accurate beginner-level explanation of accuracy? (variation 97)
9. Which statement best describes overfitting in Machine Learning? (variation 355)
10. When working with Machine Learning, why would a developer use features? (variation 71)
11. Which statement best describes overfitting in Machine Learning? (variation 75)
12. A student says 'gradient descent' is not relevant to real projects. What is the best correction? (variation 89)
13. What is the most accurate beginner-level explanation of labels? (variation 102)
14. Which option is a correct use case for confusion matrix in Machine Learning? (variation 78)
15. A student says 'gradient descent' is not relevant to real projects. What is the best correction? (variation 109)
16. When working with Machine Learning, why would a developer use train-test split? (variation 86)
17. When working with Machine Learning, why would a developer use features? (variation 81)

18. Which statement best describes training data in Machine Learning? (variation 80)
19. Which option is a correct use case for regression in Machine Learning? (variation 103)
20. A student says 'gradient descent' is not relevant to real projects. What is the best correction?
21. When working with Machine Learning, why would a developer use features? (variation 351)
22. Which option is a correct use case for regression in Machine Learning? (variation 83)
23. Which statement best describes overfitting in Machine Learning? (variation 85)
24. A student says 'classification' is not relevant to real projects. What is the best correction?
25. Which option is a correct use case for confusion matrix in Machine Learning? (variation 108)
26. When working with Machine Learning, why would a developer use features? (variation 101)
27. A student says 'gradient descent' is not relevant to real projects. What is the best correction? (variation 99)
28. When working with Machine Learning, why would a developer use features?
29. Which option is a correct use case for regression in Machine Learning? (variation 93)
30. When working with Machine Learning, why would a developer use features? (variation 91)
31. What is the most accurate beginner-level explanation of accuracy? (variation 357)
32. What is the most accurate beginner-level explanation of labels?
33. A student says 'gradient descent' is not relevant to real projects. What is the best correction? (variation 79)
34. What is the most accurate beginner-level explanation of accuracy? (variation 107)
35. What is the most accurate beginner-level explanation of accuracy? (variation 87)
36. What is the most accurate beginner-level explanation of labels? (variation 352)

37. Which statement best describes training data in Machine Learning? (variation 350)
38. Which statement best describes overfitting in Machine Learning?
39. When working with Machine Learning, why would a developer use train-test split? (variation 356)
40. Which option is a correct use case for confusion matrix in Machine Learning? (variation 98)
41. What is the most accurate beginner-level explanation of labels? (variation 72)
42. When working with Machine Learning, why would a developer use train-test split? (variation 106)
43. When working with Machine Learning, why would a developer use train-test split?
44. Which statement best describes overfitting in Machine Learning? (variation 105)
45. Which statement best describes training data in Machine Learning? (variation 90)
46. What is the most accurate beginner-level explanation of labels? (variation 82)
47. Which statement best describes overfitting in Machine Learning? (variation 95)
48. Which option is a correct use case for regression in Machine Learning? (variation 353)
49. Which option is a correct use case for regression in Machine Learning? (variation 73)
50. A student says 'gradient descent' is not relevant to real projects. What is the best correction? (variation 359)
51. A student says 'classification' is not relevant to real projects. What is the best correction? (variation 94)
52. When working with Machine Learning, why would a developer use train-test split? (variation 76)
53. A student says 'classification' is not relevant to real projects. What is the best correction? (variation 84)
54. A student says 'classification' is not relevant to real projects. What is the best correction? (variation 74)
55. Which statement best describes training data in Machine Learning? (variation 70)

56. Which option is a correct use case for confusion matrix in Machine Learning? (variation 88)

57. What is the most accurate beginner-level explanation of accuracy? (variation 77)

58. A student says 'classification' is not relevant to real projects. What is the best correction? (variation 104)

59. Which option is a correct use case for confusion matrix in Machine Learning?

60. Which statement best describes training data in Machine Learning? (variation 100)
